The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to promote the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to increase the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.			

**COVER**

Hereford beef cattle in pasture in Winnebago, Minnesota. A new peptide growth factor has been extracted from bovine kidneys and salivary glands and used for the first time for experimental wound healing. See page 1329. [Thomas A. Sporn, Georgetown University School of Medicine, Washington, D.C.]
