Alan E. Leviton = Executive Director
Klaus D. Timmerhaus = President
SOUTHWESTERN AND ROCKY MOUNTAIN DIVISION 
M. Michelle Baj = Executive Director

Science is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 49440) paid at Washington, D.C., and at an additional entry. Now combined with The Scientific Monthly. Copyright © 1983 by the American Association for the Advancement of Science. Domestic: individual membership and subscription (51 issues): $53. Domestic institutional subscription (51 issues): $90. Foreign postage extra: Canada $24, other (surface mail) $15, air service via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $3 ($2.50 by mail). Biotechnology issues, $5 ($5.50 by mail). Room rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the far use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10.

REPORTS

Virus-Induced Autoimmunity: Monoclonal Antibodies That React with Endocrine Tissues: M. V. Haspel et al.

Biologically Active Chorionic Gonadotropin: Synthesis by the Human Fetus: W. G. McGregor, R. W. Kuhn, R. B. Jaffe

Mobilization of Cellular Calcium-45 and Lead-210: Effect of Physiological Stimuli: J. G. Pounds and R. A. Mittelstaedt

Enchenopa binotata Complex: Sympatric Speciation?: T. K. Wood and S. I. Gutman

Breathing Gas Mixtures Different from Air: An Adaptation for Survival under the Ice of a Facultative Air-Breathing Fish: J. J. Magnuson et al.

Irreversible Ligands with High Selectivity Toward δ or μ Opiate Receptors: K. C. Rice et al.

Toxic Shock Syndrome and Lysogeny in Staphylococcus aureus: S. E. Schutzer, V. A. Fischetti, J. B. Zaborske

Sodium Currents in Segments of Human Heart Cells: J. O. Bustamante and T. F. McDonald

Natural Distribution of the Ixodes dammini Spirochete: E. M. Bosler et al.

Systemic Cholinergic Agents Induce Seizures and Brain Damage in Lithium-Treated Rats: M. P. Honchar, J. W. Olney, W. R. Sherman

Altered Activity in the Hippocampus Is More Detrimental to Classical Conditioning Than Removing the Structure: P. R. Solomon et al.

Alcohol-Induced Spasms of Cerebral Blood Vessels: Relation to Cerebrovascular Accidents and Sudden Death: B. M. Altura, B. T. Altura, A. Gebrewold

Drug History Modifies the Behavioral Effects of Pentobarbital: J. R. Glowa and J. E. Barrett

COVER

Reactivity of a monoclonal autoantibody with normal gastric mucosa detected by the indirect immunoperoxidase method. Cells to which the autoantibodies bind show dark brown staining. Reovirus produces an autoimmune polyendocrine disease in young mice. By fusing spleen cells from these animals with myeloma cells, over 40 hybridomas were isolated that synthesize monoclonal autoantibodies reactive with hormones and certain normal tissues, including the pancreas, pituitary, and stomach (× about 380). See page 304. [M. V. Haspel et al., National Institutes of Health, Bethesda, Maryland 20205]
