Whether you're thinking retirement or not, review the plan that provides for cash withdrawal and/or a lifetime income.

TIAA-CREF Supplemental Retirement Annuities (SRAs) offer you substantial flexibility including cash withdrawal and/or lifetime retirement income. You can even reduce your income taxes now!

You can begin contributions to an SRA at any age and begin benefits at any age up to age 71 unless you are still employed (then you can delay beginning benefits until age 80). For example, you could start contributions at age 25, and choose to begin benefits or withdraw cash at age 34, 40 or 50, regardless of your employment status.

Get your money at any time.
You can receive benefits as a lifetime income or over a fixed period of from 2 to 10 years. What's more, if you need it (even while employed by your current employer), you can withdraw all the money you have accumulated by surrendering your contracts. Or, you can withdraw $1,000 or more every six months. There is never a cash surrender charge.

Contributions are tax-deferred, so you pay less income taxes now.
The federal income tax on your contributions is deferred until they are paid to you as benefits. So, you pay less tax now.

Changing employers? Take SRAs with you.
Since you own your Supplemental Retirement Annuities, you take them with you if you leave your current employer. You can make contributions through any institution that makes Supplemental Retirement Annuities available to staff members. Contributions can be as little as $25 a month.

Full information.
Complete and mail the coupon for an SRA Information Kit today. You'll get full details about all the advantages SRAs have to offer, why this plan suits so many financial situations and age groups and how much you may contribute to the plan.

*TIAA-CREF provides annuities and other services for employees of colleges, universities, private schools and certain other nonprofit tax-exempt educational and research institutions.

"I bought ISCO’s new Cygnet™ fraction collector sight unseen... because it had ISCO’s name on it. And because it cost only $665."

Dr. Lowell Satterlee, professor of food science at a major university, says he bought his Cygnet fraction collector because ISCO’s name on a lab instrument tells him he can trust it.

Cygnet was exactly the full-featured fraction collector Dr. Satterlee was looking for to help automate his Waters HPLC system—and to use in his gel filtration chromatography.

It collects 100 fractions by time or volume. And it even counts drops. That’s a feature he didn’t find on the other fraction collector he was considering—and that one would have cost him almost twice as much as Cygnet. He also likes the fact that Cygnet takes up only one square foot of his bench space.

"Frankly," Dr. Satterlee says, "I would have paid a lot more for a fraction collector that does what Cygnet does."

"But I didn’t have to."

Cygnet: The new research-grade fraction collector at a student lab price. $665.

For more information, call toll free [800] 228-4250, ISCO, P.O. Box 5347, Lincoln, Nebraska 68505.

Queue Radial Shakers are controlling aeration and mixing with microprocessor precision. New low profile, quiet and maintenance free.

New ideas in orbital shaker technology. Queue Radial Shakers use no motors, belts, or gears. A microprocessor controller with optical electronics regulates a powerful magnetic drive system to deliver smooth and accurate orbital motion with fewer moving parts. Accessories include universal trays with interchangeable stainless steel flask clamps. Ask for detailed literature.

Shaker with Model 4720 Incubator Hood

Model 4710 Countertop Shaker
The difference between an ordinary stereo microscope and the Nikon SMZ-10 is the difference between promise and fulfillment. Nikon delivers the full potential of stereo imaging.

 Legendary Nikon optics and 6:1 zoom ratio make it equal to any research or inspection task. Thoughtful mechanical design and a variety of accessories add to convenience. A one touch lever provides instant changeover between observation and photomicrography, for swift, certain documentation.

Ask to look into an SMZ-10. For information on the full line of Nikon stereo microscopes and a reproduction of this photomicrograph, write: Nikon Inc., Instrument Division, 623 Stewart Avenue, Garden City, NY 11530 (516) 222-0200.
