SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. Now combined with The Scientific Monthly. Copyright © 1984 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $53. Domestic institutional subscription (51 issues): $80. Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 (5$ by mail); back issues $5 (5.50 by mail); Biotechnology issue, $5.50 (5.50 by mail). classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 22 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075:93 $1 10. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
BOOK REVIEWS

Technological Trends and Challenges in Electronics, reviewed by N. H. Leff; Black Holes, White Dwarfs, and Neutron Stars, R. D. Blanford; Flora of Tierra del Fuego, J. Kummerow; Conditioning and Associative Learning, R. A. Rescorla; Development of Auditory and Vestibular Systems, K. D. Peusner; Books Received ................................................................. 386

Salt Taste Transduction Occurs Through an Amiloride-Sensitive Sodium Transport Pathway: G. L. Heck, S. Mierson, J. A. DeSimone .................................................... 403

Algal Chemical Defense Against Herbivores: Allocation of Phenolic Compounds in the Kelp Alaria marginata: P. D. Steinberg .................. 405

Expression of Gliial Fibrillary Acidic Protein in Immature Oligodendroglia: B. H. Choi and R. C. Kim ............................................. 407

Prenatal Exposure to Carbon Monoxide: Learning and Memory Deficits: C. F. Mactutus and L. D. Fechter ........................................ 409

Rapid Mechanical Responses of the Dark-Adapted Squid Retina to Light Pulses: I. Tasaki and T. Nakaye ......................................... 411

Crystals of the Octameric Histone Core of the Nucleosome: R. W. Burlingame, W. E. Love, E. N. Moudrianakis ................................. 413

PRODUCTS AND MATERIALS

Chromatography Data System; pH/Ion Meters; Spectrophotometer; Laboratory Computer; Laboratory Microscope; DNA Sequencing Cell; Literature ........ 416

COVER

The deployment of Pershing II and cruise missiles in Europe has created some painful and potentially lasting military and political problems for the United States and its Western allies (see page 371). This photo shows a platoon of three Pershing II missiles erected for a test at Fort Sill, Oklahoma, in mid-1983. The missiles declared operational on 31 December 1983, in Mutlangen, West Germany, are identical except that they lack the red and yellow stripes. [Martin Marietta Aerospace]
