SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. New combined with The Scientific Monthly. Copyright © 1984 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $53; Domestic institutional subscription (51 issues): $90; Foreign postage extra: Canada $24; other (surface mail) $27; air-surface via Amsterdam $55. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $3 ($3.50 by mail); Biotechnology issue, $5 ($5.50 by mail). Classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/84 $1.00. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

BOOK REVIEWS

Magnetic Monopoles, reviewed by J. A. Harvey; Weather and Climate Responses to Solar Variations, W. C. Livingston; Costa Rican Natural History, E. G. Leigh, Jr.; Coba, D. L. Webster; Books Received .......................................................... 1170

REPORTS

End-Cretaceous Brachiopod Extinctions in the Chalk of Denmark: F. Surlyk and M. B. Johansen .......................................................... 1174

Terminal Cretaceous Extinctions in the Hell Creek Area, Montana: Compatible with Catastrophic Extinction: J. Smit and S. van der Kaars ......... 1177

The End of the Cretaceous: Sharp Boundary or Gradual Transition?: W. Alvarez et al. ........................................................................ 1183

Mass Spawning in Tropical Reef Corals: P. L. Harrison et al. ........................................................................ 1186

Phenylalanine Transfer RNA: Molecular Dynamics Simulation: S. C. Harvey et al. ........................................................................ 1189

Bioassay of Solubilized Bacillus thuringiensis var. israelensis Crystals by Attachment to Latex Beads: D. J. Schnell, M. A. Pfannensiel, K. W. Nickerson ................................................................. 1191

The Enzymatic Synthesis of 5-Amino-4-Imidazolecarboxamide Riboside Triphosphate (ZTP): R. L. Sabina, E. W. Holmes, M. A. Becker ........... 1193

A Transforming ras Gene in Tumorigenic Guinea Pig Cell Lines Initiated by Diverse Chemical Carcinogens: S. Sukumar et al. .................................................. 1197

Technical Comment: Health Effects of Dioxin: T. D. Sterling; P. H. Abelson ...... 1202

COVER

Synchronous spawning by polyps of a staghorn coral, Acropora listeri. The oral discs of the polyps bulge with apricot-colored egg-sperm bundles in readiness for release. The bundles float to the surface and break apart; subsequent external fertilization leads to development of planula larvae. See page 1186. [Peter Harrison, James Cook University of North Queensland, Australia]
