Now you can monitor your DNA synthesis automatically.

The Coupling Efficiency Monitor – built into all Beckman SYSTEM 1 DNA Synthesizers – makes sure your oligonucleotide synthesis is proceeding as planned.

It records the release of the dimethoxytrityl (DMT) blocking group, a measure of coupling efficiency. No need to keep checking tubes in a fraction collector to assure yourself that each coupling step has been completed successfully. And it will stop the synthesis automatically in the event of a DMT level lower than what you preset, guaranteeing that you will not waste chemicals or time.

The Coupling Efficiency Monitor is only one reason to prefer the SYSTEM 1 Synthesizer. It uses the licensed phosphoramidite chemistry to give you fast cycle times and high yields. And you get all reagents and solvents packaged in convenient kit form.

SYSTEM 1: the reassuring choice in DNA synthesizers, and one of a family of proven automated systems for nucleic acids, peptides, and amino acids – from Beckman.

For complete information, contact your local Beckman representative or write: Beckman Instruments, Inc., 1050 Page Mill Road, Palo Alto, California 94304; or Beckman Instruments International, S.A., P.O. Box 76, 1211 Geneva 6, Switzerland.

The transfer membranes with a memory.

GeneScreen Plus™
GeneScreen Plus™ is the new transfer membrane that gives you not only highest sensitivity and excellent band resolution, but trouble-free handling as well. The slight natural curl of the membrane makes it easier to select from the package and easier to place on a moist surface. After drying it returns to its original shape to remind you which side is carrying the bound material. Wet or dry, GeneScreen Plus™ is highly resistant to cracking, distorting, tearing, or shrinking.

Binding of all sizes of DNA is so strong you don't need to waste time baking the membranes. No need for refrigeration either; just keep the box handy on the shelf.

Colony/PlaqueScreen™ Discs
Colony/PlaqueScreen™ Discs have all of the performance and convenience features of GeneScreen Plus™ and are precut to culture dish sizes. The gentle curl of the discs makes them easier to place on the agar plate without smudging, and moisture causes them to lie flat with minimal air entrapment. Removal is easier too, because they are strong and tear resistant.

Our Applications Laboratory is available to answer your questions about hybridization methods using either of these products. Meanwhile we'll be glad to send you detailed information on their performance characteristics. Simply call New England Nuclear or circle the Reader Service Number.

New England Nuclear®
SECOND INTERNATIONAL CONGRESS ON
COMPUTERS IN SCIENCE
28 October - 1 November 1984
Washington Hilton, Washington DC

Chairman: Stephen R. Heller
Environmental Protection Agency, Washington DC 20460

THEME: Workstations for the Scientist

OPENING ADDRESS
Computer Education/Literacy for the Scientists – C.D. Martin, George Washington University, Washington, D.C.

SESSION TOPICS
Scientific Data Bases – G.W.A. Milne, National Cancer Institute, Bethesda, MD.
Artificial Intelligence – P. Friedland, Stamford University, Stamford, CA.
Management of the Electronic Laboratory – R. Dessy, Virginia Polytechnic Institute, Blackburn, VA.
Laboratory Automation and Robotics – J. Lemanowicz, Exxon Research and Engineering, Annadale; N.J.
Workstation Hardware – Speaker to be announced.
Workshops – To be announced.

POSTER SESSIONS: WORKSTATION APPLICATIONS
Participants are invited to submit abstracts for the poster sessions. These abstracts will be reviewed up until the time of the meeting; however, only those accepted by 15 September 1984 will be listed in the conference program. For abstract forms contact address listed below.

SCICOMP EXHIBITION
A large exhibit of state of the art hardware, software and systems will also be part of the overall conference.

Organized by Scherago Associates, Inc.
in conjunction with SCIENCE Magazine.

REGISTRATION FEES: Make checks payable to: Scherago Assoc., Inc., COMPUTERS IN SCIENCE
$200 On-site registration – Received after June 15th
$150 ADVANCE REGISTRATION – Received by June 15th
$125 Group Registrations – 4 or more received together from same organization by June 15th
$ 50 Student Registrations – Must have status confirmed in writing by department chairman.

Please reserve __________ space(s); Registration Fee of $ _____________ enclosed.

Please send EXHIBIT SPACE information.

Please Print

Next to your own expertise, this could be your most valuable resource.

Digital introduces a personal research system so complete yet so simple you’ll wonder how you ever got along without it—the Professional™ 350 with RS/1™ software.

At the heart of every Professional 350 is a PDP™-11 minicomputer that’s powerful enough to execute high-level data processing and versatile enough to interface with instrumentation right from your lab bench.

RS/1 is a software application for managing laboratory data. It integrates data base management, statistical analysis, modeling, curve fitting, and graphics into one comprehensive package. Using only English-language commands and familiar research constructs, experimental results can be manipulated and displayed in a variety of visual formats with speed and accuracy. RS/1 even enables you to customize the system capabilities for your specific applications. Best of all, you don’t have to be a programmer to use it.

Only the world’s recognized leader in scientific research computing could give you so much. Digital Equipment Corporation. For more information, call: 1-800-DIGITAL, ext. 801; In other countries, call your local Digital Sales Office.

RS/1 is a trademark of BBN Research Systems, Bolt Beranek and Newman Inc.
The Digital logo, Professional, and PDP are trademarks of Digital Equipment Corporation.
A new protein purification method - Hydrophobic Interaction Chromatography (HIC) - can be used to retain biomacromolecules in the column matrix without losing their biological activity. The UltroPac® Phenyl-5PW column is designed to meet the special demands of hydrophobic chromatography. The sample is a freeze-dried snake venom from Black Mamba, and the eluent is a gradient of $0.1 \text{M} \text{Na}_2\text{HPO}_4/\text{NaH}_2\text{PO}_4$, pH 7.0 to $0.0 \text{M} \text{Na}_2\text{SO}_4$ in $0.1 \text{M}$ composition. The flow rate is $0.5 \text{ ml/min}$, and detection is at $280 \text{ nm}$. The column used is $2.1 \times 100 \text{ Ultrapac TSK Phenyl-5PW, 75} \times 75 \text{ mm}$.

The problem

Purification of proteins, peptides and nucleic acids still presents the biochemist with the problem of how to preserve high biological activity, get good resolution, and do it fast.

The answer

A new separation mode - Hydrophobic Interaction Chromatography (HIC) - an aqueous system where salt gradients regulate the ability of the column matrix to retain biomacromolecules, and keep them active. Control interaction between the hydrophobic sites of a protein with the hydrophobic ligands of your packing material, and you've got the answer - HIC.

The facts

LKB now introduces a new HPLC column that's engineered to meet the special demands of hydrophobic chromatography. The UltroPac® Phenyl-5PW column eliminates all the problems caused by organic solvents and ensures complete accessibility even for biomacromolecules up to $10^6$. The result is outstandingly high biological activity, very fine resolution and fast chromatography. Whatever your separation method, be it GFC, IEC, RPC and now HIC, LKB's comprehensive range of prepacked columns lets you select the technique most suitable for your sample. A complete choice.
and you'll find it all in our new catalogue of HPLC columns and accessories. Get yourself a copy—and get the facts.

Waters™ HPLC Systems for Amino Acid Analysis.

Now analyze primary and secondary amino acids with one picomole sensitivity.

Introducing Waters high-speed PICO-TAG™ method. This innovative pre-column derivatization method is pre-packaged for guaranteed results. In 15 minutes, you can run a complete compositional analysis from as little as 100 nanograms of protein, with a detection limit of one picomole. Waters provides the complete methodology, plus reagents, buffers, column, Waters HPLC System and PICO-TAG Work Station.

With Waters Systems, choose the method that best meets your needs.

Waters AUTO-TAG™ OPA fully automated derivatization method. This exclusive method offers fully automated pre-column derivatization, separation and data reduction for high sensitivity analysis of primary amino acids. Perfect for process monitoring of amino acids in fermentation broths and cell cultures.

Classical Ion Exchange method with better quantitation. Waters improves this high resolution method with raw chromatographic data storage and re-integration capability for better quantitation, and full documentation of method, chromatography and integration.

More than offering just a choice of methodologies, Waters helps you get results.

For more information, contact Waters Life Science Dept., 34 Maple Street, Milford, MA 01757, 617-478-2000 (X 2665).
SAVE 58%
NOW ONLY $24.95

The most recent edition of the CRC Handbook of Chemistry and Physics is now available at considerable savings.

This 64th edition has been updated with the latest information of current demand yet retains the data you most frequently need.

The tabular format and unique indexing system of the CRC Handbook of Chemistry and Physics places a great mass of scientific knowledge at your fingertips. You'll find over 2300 pages of tables, graphs, formulas, and property information in this comprehensive resource.

And now, priced at $24.95, you can save 58% off the regular $59.95 cover price.

Order Form

Rush me the 64th Edition of the CRC Handbook of Chemistry and Physics for only $24.95.*
(regularly $59.95)

To qualify for this special offer, each order should:
• be prepaid by check, money order, or charged on an acceptable credit card
• be postmarked by May 31, 1984
• specify catalog no. 464KRS

Enclosed is my check/money order for $____

FOUR FRACTION COLLECTORS AREN'T TOO MANY IF YOU'RE TRYING TO PLEASE 98,579 SCIENTISTS.

All four let you enter fraction size by time, drop, volume — even directly in ml if you have an ISCO WIZ peristaltic pump. ISCO fraction collectors are coldroom proof and hold any common test tube or mini scintillation vial. All but Cygnet also hold 28 mm vials, have LED readouts, and can collect from multiple columns.

Workhorses
The Retriever III is our fraction collector for big jobs. It can hold 25 mm (70 ml) tubes, and carries up to 380 smaller tubes.

Retriever II is the ISCO medium-capacity linear fraction collector. It holds up to 174 tubes but needs only a square foot of your bench space—perfect for crowded labs. We’ve made about 20,000 instruments using the patented Retriever linear mechanism and many are still going strong after 15 years!

Budget
Cygnet is by far the least expensive fraction collector you can buy. Yet it still has all the basic features including drop counting. Stainless steel reels hold 100 tubes in a big range of sizes.

Smart
FOXY™ matches fractions to your chromatogram—not to the clock. It rejects void volumes, locates and saves desired peaks, and controls valves and pumps to make gradients or automate your system. For HPLC, collect successive injections without resetting, and overlay repeated injections of the same sample to collect identical peaks in the same tubes. The sloped keyboard, 12-digit display, and logical programming make it all easy to do.

You can’t beat an ISCO fraction collector for reliability, capability, or price. And you can’t match the ISCO 3-year warranty. Phone toll-free [800]228-4250 for our complete catalog. Or write ISCO, P.O. Box 5347, Lincoln, NE 68505.
MEASURE CO₂ CONTENT!

Smallest electrode available.
Carbon dioxide can be measured quickly and easily with the MI-720, a high quality electrode from the foremost authority in microelectrode technology.

YOU’VE GOT A BRIGHT IDEA for new biological or chemical compounds.

WE HAVE THE CAPITAL to develop new drugs.

We are not a pharmaceutical firm but a Swiss-based, independant financial group which is prepared to let you participate in a capital venture for the exploitation of your project.

Our objective: the development of new biological or chemical products having previous pharmacological screening up to the stage of clinical tolerance and efficacy required to permit licensing negotiations.

To obtain all the information required for initial selection, please write in English, French or German to:
DEBIOPHARM S.A. Petit-Chêne 38 – 1001 LAUSANNE (Switzerland).

The Bowens Illumitran.  
More than just another copy cat.

Dupe a slide? Simple.  
But crop, flop, enlarge, reduce, increase or decrease contrast, vary shadow coloration or correct color balance, add special effects or titles, create montages or superimpositions, salvage under or overexposed originals, make internegatives, use daylight or tungsten-balanced film?  
It's only simple with the Illumitran 3C featuring exclusive contrast control.

With the remarkable Illumitran, your original slide can be duped or used as a starting point for creative enhancement.

Versatile? Flexible? The Illumitran is that and more. Far from the same old copy cat. You might call it the most creative slide duplicator you can own. There's much more that the Illumitran can do for you than we can show you here. Please write for brochure.

Lester Bogen doesn't sell anything he wouldn't buy himself.

bogen
Now you can use Polaroid's Instant Slide System with any 35mm camera or instrument with a standard 35mm back.

Introducing Polaroid's three new instant slide films: Polaroid Polachrome CS 35mm color transparency film (ISO 40/17). Polaroid Polapan CT 35mm continuous tone black and white transparency film (ISO 125/22). And Polaroid Polagraph HC 35mm high contrast black and white transparency film (ISO 400/27).

The new Polaroid 35mm Instant Slide System lets you develop, mount, and project these films in under 5 minutes. And at a cost that's about the same as conventional transparency films with processing.* These Polaroid films are totally unlike any other 35mm films you've ever used. And the technology is totally different. Polachrome CS film is based on an additive process; its base density is greater, and the ISO film speed is a little slower. Yet it produces unbelievably accurate, saturated colors with medium grain, sharp detail, and high resolution. The black and white films offer you the world's simplest, most direct way to get high quality, fine grain, continuous tone or high contrast slides. Instantly. Processing is easy. You load the film into the AutoProcessor. Turn the handle. Wait a minute. And rewind the film into the cartridge. Mounting is simple, and you're ready to project. All in under 5 minutes.

The scientific applications are virtually limitless.

Polaroid instant slide films can be used in hand-held 35mm cameras or in the most sophisticated laboratory instruments equipped with standard 35mm backs.

And because the Instant Slide System can give you slides in under five minutes, you can have scientific images ready on-the-spot. Securely, in-house. No darkroom is needed.

And you can be sure you have the results you need for documentation, presentation, or consultation.

See your dealer today and ask about the exciting Polaroid-Nikon Promotion. For the Polaroid Dealer nearest you, call 800-526-7843 ext. 400 in the continental U.S.; 800-522-4503 ext. 400 in N.J.

*Comparison based on suggested list price of film and processing for 36 exposure roll.

The new 35mm Instant Slide System from Polaroid

*Polaroid", "Polapan", "Polachrome" and "Polagraph"*
The new Nikon Alphaphot brings to the classroom and laboratory high resolution CF optics, a bright 20W tungsten illuminator and rugged construction. Now you can get long term professional performance and Nikon system capabilities for an incredibly low investment.

With new CF-E Series objectives, the Alphaphot delivers unrivaled color fidelity, sharpness, and flatness of field. And, as part of the Nikon system, the Alphaphot is capable of phase contrast, darkfield, epi-fluorescence and polarized light. In addition, the Alphaphot is available with quartz-halogen Koehler illumination for critical applications and photomicrography.

The Alphaphot is designed with education in mind: rugged alloy stand, built-in stage-stop mechanism, and spring-loaded 40X and 100X objectives protect both microscope and specimen from accidental damage, while locking mechanisms on all optical and mechanical components protect against tampering.

And yet the Alphaphot is surprisingly affordable. It's also backed by a five-year full warranty and a nationwide network of sales and service representatives. See your Nikon dealer today for a demonstration. Or contact Nikon Inc., Instrument Division, 623 Stewart Avenue, Garden City, N.Y. 11530 (516) 222-0200
