Science is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. Now combined with The Scientific Monthly. Copyright © 1984 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $36. Domestic institutional subscription (51 issues): $95. Foreign postage extra: Canada $24, other surface mail $27, aerial-service via Amsterdam $65. First-class, airmail, school-year, and student rates on request. Single copies $2.50 (31 by mail); back issues $3 ($3,50 by mail); Biotechnology issue, $5 ($5,50 by mail); classroom rates on request. Change of address: allow 8 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
Underdevelopment: Test of a Theory: *L. G. Thomas*; other reviews by
P. H. Calkins, J. R. Bartholomew .......................... 711

Designs and Ideas: *T. Bender*; other reviews by L. S. Swenson, Jr.,

Technical Comments: Is α1-Protease Inhibitor Inactivated by Smoking: A. Janoff

COVER

Color disks and machine to rotate them. James Clerk Maxwell’s 1849 theory of color was studied with the use of such disks. Appropriate combinations of red, blue, and green gave the various colors as the wheels were spun. The apparatus shown here, from the University of Pavia, was made around 1865, probably in Italy. [From G. L’E. Turner, *Nineteenth-Century Scientific Instruments*, reviewed on page 731]
