REPORTS

The Spacelab Experience: A Synopsis: C. R. Chappell and K. Knott ........................................ 163
Payload Crew Members’ View of Spacelab Operations: O. K. Garriott et al. ..................................... 165

Atmospheric Physics and Earth Observations

Mapping from Space: The Metric Camera Experiment: G. Konecny, M. Reynolds, M. Schroeder ................. 167
Atmospheric Spectral Imaging: M. R. Torr and D. G. Torr .............................................................. 169
Sample Performance of the Grille Spectrometer: M.-P. Lemaître et al. ............................................... 171
Waves in the OH Emissive Layer: M. Hersé ................................................................. 172
Observations of Lyman-a Emissions of Hydrogen and Deuterium: J. L. Bertaux, F. Goutail, G. Kockarts .... 174

Astronomy and Solar Physics

X-ray Gas Scintillation Spectrometer Experiment: R. D. Andresen et al. ............................................. 177
Very-Wide-Field Ultraviolet Sky Survey: G. Courtès et al. .................................................................. 179
Solar Irradiance Observations: D. Crommelynck and V. Domingo ...................................................... 180
Measurement of the Solar Spectral Irradiance from 200 to 3000 Nanometers: G. Thuillier et al. .......... 182
Astronomical Observations with the FAUST Telescope: J. Bixler et al. ............................................ 184

Space Plasma Physics

Electron Flux Intensity Distributions Observed in Response to Particle Beam Emissions: K. Wilhelm, W. Stüdemann, W. Riedler ......................................................................................... 186
Phenomena Induced by Charged Particle Beams: C. Beghin et al. ...................................................... 188
Atmospheric Emissions Photometric Imaging Experiment: S. B. Mende, G. R. Swenson, K. S. Clifton .................................................. 191
Isotopic Stack: Measurement of Heavy Cosmic Rays: R. Beaugé et al. .................................................. 193
Space Experiments with Particle Accelerators: T. Obayashi et al. ...................................................... 195

Materials

Marangoni Convection in Space Microgravity Environments: L. G. Napolitano .................................. 197
Solidification and Ostwald Ripening of Near-Monotectic Zinc-Lead Alloys: A. Kneissl and H. Fischmeister ............................................................... 198
Protein Single Crystal Growth Under Microgravity: W. Litske and C. John ..................................... 203

Life Sciences

Spatial Orientation in Weightlessness and Readaptation to Earth’s Gravity: L. R. Young et al. .................. 205
Effects of Rectilinear Acceleration and Optokineti c and Caloric Stimulations in Space: R. von Baumgarten et al. ........................................................................................................ 208
Vestibulospinal Reflexes as a Function of Microgravity: M. F. Reschke, D. J. Anderson, J. L. Homick .................. 212
Prolonged Weightlessness and Humoral Immunity: E. W. Voss, Jr. ................................................. 214
Influence of Spaceflight on Erythrokinesitics in Man: C. S. Leach and P. C. Johnson ........................................ 216
Venous Pressure in Man During Weightlessness: K. A. Kirsch et al. .................................................... 218
Mass Discrimination During Prolonged Weightlessness: H. Ross, E. Brodie, A. Benson .......................... 219
Eye Movements During Sleep in Weightlessness: O. Quadens and H. Green ........................................ 221
Radiobiological Advanced Biostack Experiment: H. Bück er et al. ...................................................... 222
Radiation Measurements Aboard Spacelab 1: R. E. Benton et al. ......................................................... 224
Microorganisms in the Space Environment: G. Horneck et al. .............................................................. 226
Cell Sensitivity to Gravity: A. Cogoli, A. Tschopp, P. Fuchs-Bislin .................................................. 228
Neurospora Circadian Rhythms in Space: A Reexamination of the Endogenous-Exogenous Question: F. M. Saltman et al. .................................................. 232

Cover

Klyuchevskaya Spoka volcanic complex located on the Kamchatka Peninsula, Union of Soviet Socialist Republics (56° 05’ N – 160° 34’ E). This is the tallest (4750 meters) of the Kamchatka volcanoes, one of the world’s most active volcanic areas. The Kamchatka River meanders around the volcanic complex. Photo was taken from Columbia spacecraft during the 24th orbit of the earth, 30 November 1983. [NASA–Lyndon B. Johnson Space Center, Houston, Texas 77058]
