SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 48446) paid at Washington, D.C., and at an additional entry. Now combined with The Scientific Monthly® Copyright © 1994 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $56. Domestic institutional subscription (51 issues): $93. Foreign postage extra: Canada $24, other (surface mail) $27, airmail via Amsterdam $56. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail). Back issues $3 ($5.50 by mail). Biotechnology issue, $5 ($5.50 by mail). Classroom rates on request. Change of address: Allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/94 $1 + 10. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
BOOK REVIEWS

Chemistry and Modern Society, reviewed by P. T. Carroll; The Infancy of Atomic Physics, P. Galison; The Pleistocene, A. L. Bloom; Books Received 306

REPORTS

Marine Lava Cave Fauna: Composition, Biogeography, and Origins: T. M. Iliffe et al. 309

Raman Spectroscopy of a Coal Liquid Shows That Fluorescence Interference Is Minimized with Ultraviolet Excitation: S. A. Asher and C. R. Johnson 311

A Novel Photosynthetic Purple Bacterium Isolated from a Yellowstone Hot Spring: M. T. Madigan 313

Observed Ozone Response to Variations in Solar Ultraviolet Radiation: J. C. Gille, C. M. Smythe, D. F. Heath 315

Species Formation Through Punctuated Gradualism in Planktonic Foraminifera: B. A. Malmgren, W. A. Berggren, G. P. Lohmann 317

An Endogenous Peptide Stimulates Secretory Activity in the Elasmobranch Rectal Gland: T. J. Shuttleworth and M. C. Thorndyke 319

Antibodies to the Core Protein of Lymphadenopathy-Associated Virus (LAV) in Patients with AIDS: V. S. Kalyanaraman et al. 321

The Structure of Rat Preproatrial Natriuretic Factor as Defined by a Complementary DNA Clone: C. E. Seidman et al. 324

Growth Hormone-Releasing Factor Stimulates Pancreatic Enzyme Secretion: S. J. Pandol et al. 326

Mechanical Wounding Induces the Formation of Extensive Coated Membranes in Giant Algal Cells: R. M. O’Neil and J. W. La Claire II 331

Adsorption to Fish Sperm of Vertically Transmitted Fish Viruses: D. Mulcahy and R. J. Pascho 333

Energy Scaling in Marsupials and Eutherians: D. S. Hinds and R. E. MacMillen 335

The Ultraviolet Receptor of Bird Retinas: D.-M. Chen, J. S. Collins, T. H. Goldsmith 337

Ganglioside Treatment Facilitates Behavioral Recovery from Bilateral Brain Damage: B. A. Sabel, M. D. Slavin, D. G. Stein 340

Monoclonal Antibody to a Human Germ Cell Membrane Glycoprotein That Inhibits Fertilization: R. K. Naz et al. 342

COVER

Cluster of Boergesenia forbesii cells. The giant, balloon-like cells of this marine green alga produce hundreds of viable protoplasts within 90 minutes when they are wounded (protoplasts visible in two cells). This phenomenon is accompanied by the appearance of numerous coated pits and vesicles near the plasma membrane (about ×9). See page 331. [John W. La Claire II, Department of Botany, University of Texas, Austin 78712, with cooperation of the Cell Research Institute and Dennis T. Brown]
