NEW UV/VIS:

Spectrophotometry hasn't been this simple since we invented it

1941 Dr. Beckman introduces the first practical UV spectrophotometer; the DU. Thousands of these dependable instruments are still in use.

1949 The Beckman Model B offers a low-cost, easy-to-use solution for routine, repetitive testing. This instrument was sold for 25 years.

1960 The DB Series introduces the first simple double-beam optical system utilizing programmed slits for scanning.

1973 The 20 Series with digital readout, scanning and modular accessories continues the tradition of affordable, easy-to-use instruments.

1984 Remember the first Beckman Spectrophotometer you used? The simplicity and dependability?

The tradition continues.

Behind the simple operation of the new DU-50 Series Spectrophotometers are technological advances that give these instruments incredible capability.

They feature full programmability so you have control of all operations. Once you've established your test parameters, you simply store them on a simple plug-in Memory-Pac™ module for instant reuse.

And that's that. You save time. You eliminate errors.

There are four models available offering you the choice of scanning or programmability or both.

All of them deliver the day in, day out dependability we built an industry on.

A utilitarian, functional instrument so simple anyone can run it; so dependable you'll never give it a second thought.

Now is the perfect time to find out about it. For more information, contact your Beckman representative or Beckman Instruments, Inc., Spectroscopy Instruments Operations, Campus Drive at Jamboree Blvd., P.O. Box C-19600, Irvine, CA 92713; (714) 833-0751.

Let the NEN advantage in molecular biology work for you.

The NEN advantage is the superior performance you get from products at the forefront of biotechnology. In molecular biology especially we offer a variety of innovative products in response to your specific needs. Here are three examples.

**Pretested research systems**—
We offer three new systems: C-Tailing and Cloning, Southern Cross/Restriction Mapping, and Wheat Germ Translation. That makes 16 systems pioneered by NEN to bring convenience and reproducibility to molecular biology studies.

**Autoradiography Enhancers**—
We continue to lead the industry with EN$HANCE™ and ENLIGHTNING™, the enhancers that drastically reduce processing time.

**$35$-Nucleotides**
Perhaps the best example of our commitment to biotechnology is our $35S$-nucleotides, pioneered by NEN as a superior alternative to the conventional use of $32P$.

The technical and safety advantages of using $35S$ are widely recognized, and we are collaborating with the research community to develop further applications.

Let the NEN advantage work for you.
Ask your NEN Technical Representative to give you more information about these and our other problem-solving products for molecular biology.
For anyone who has ever wondered if a curve ball really drops just before it gets to the batter. Or stared at that little white ball on its tee and asked why it has dimples. Does it really make any difference which running shoe you buy? Will a couple of beers help your dart game? And why, for goodness sake, does the boomerang keep coming back?

Based on the popular "Sports" column of Science 84 magazine. 192 pages, hardbound, $14.95. Published by Scribners in cooperation with the American Association for the Advancement of Science.

Send me _______ copies of Newton at the Bat by return mail @ $16.70 each including $1.75 postage and handling. Please allow 4-6 weeks for delivery.

ANNOUNCING . . .

THE FIFTH ANNUAL CONGRESS FOR
RECOMBINANT DNA RESEARCH
Co-chairmen: John D. Baxter, University of California, San Francisco
Walter Miller, University of California, San Francisco
Thomas Shenk, Princeton University

THE FOURTH ANNUAL CONGRESS FOR
HYBRIDOMA RESEARCH
Co-chairman: Zenon Steplewski, The Wistar Institute
Hilary Koprowski, The Wistar Institute
Joseph Davie, Washington University

held concurrently
FEBRUARY 3-6, 1985
San Francisco, California

Organized by Scherago Associates, Inc.,
in association with Mary Ann Liebert, Inc.

For further information concerning abstract forms,
registration, and accommodations, contact:
Edward R. Ruffing
Scherago Associates, Inc.
1515 Broadway
New York, NY 10036
(212) 730-1050

BUYING A FERMENTER?

Two good reasons to choose airlift over stirred tank

1. No moving parts to damage delicate cells

2. More efficient mass transfer for higher yields

For ten more good reasons, as well as a comprehensive discussion of airlift technology, call us today at one of the numbers listed below. Ask for our “Guide to Airlift Fermentation.” It’s FREE—only from BRL.
ANNOUNCING . . .

THE SECOND ANNUAL CONGRESS ON

AUTOMATION, SCALE-UP,
AND THE ECONOMICS OF

BIOLOGICAL PROCESS ENGINEERING©*

Chairman: Dr. Gerald Hawk, Zymark Corp.

FEBRUARY 7 & 8, 1985
San Francisco, California

There will be invited talks in a number of areas including Synthesis, Sequencing, Automation, Cell & Tissue Culture, Fermentation, Separation & Purification, Economics, and other technologies associated with Scale-up and Biological Processing. In addition, there will be submitted poster talks.

DEADLINE FOR SUBMISSION OF COMPLETED ABSTRACTS: SEPTEMBER 15, 1984

Organized by Scherago Associates, Inc.

For further information concerning abstract forms, registration, and accommodations, contact:
Edward R. Ruffing
Scherago Associates, Inc.
1515 Broadway
New York, NY 10036

The Case of the Captive Investment

William and Judith Trembath needed some of the extra money they were saving for retirement. "No!" they were told, "You haven't met the conditions for its release." "Conditions?" they asked, "What conditions? We didn't realize that there were any conditions." If only, they thought, there were a way to save extra money for retirement without tying it up.

Finding a way to gain access to your extra savings in a tax-deferred retirement account—without a federal penalty tax—needn't be a mystery. There is a simple solution. Supplemental Retirement Annuities from TIAA-CREF. Or, very simply, SRAs. The flexible tax-deferred annuity plan that can increase your personal retirement savings and reduce your taxes while still giving you access to your money when needed.

Contributions to SRAs are made through your institution's payroll system on a before-tax basis. You don't pay any federal taxes on that money, or on the interest and dividends it earns, until you decide to withdraw your funds. And you can withdraw cash from your SRAs even before retirement—without paying a federal penalty tax.

Should you ever decide to change jobs, you can take your SRAs with you. You can continue contributions through any of the 2,700 institutions in the country that make SRAs available.

And you're not locked into receiving your income benefits at retirement. You can begin benefits before you retire without paying a federal penalty tax. And you can choose from a number of lifetime income options for you and your spouse.

You can enjoy all this freedom and still have the benefit of a low-risk, high-security approach to investing. Funds in TIAA grow at the current effective annual interest rate of 11.50%* and those in CREF share in the investment experience of the Fund's broadly diversified common stock portfolio. And TIAA-CREF have over $30 billion in assets and 65 years of experience in retirement plan investing for people in education.

So if you want to have access to your extra savings in a tax-deferred retirement account, investigate the advantages of Supplemental Retirement Annuities.

SRAs—Simple. Reliable. Accessible. Tax-deferred annuities. From TIAA-CREF.

*Effective March 1, 1984 through February 28, 1985 for funds credited January 1, 1982 or later. This interest rate is not guaranteed after February 28, 1985. A 1.5% expense charge is deducted from SRA premiums. If you would like to know more about SRAs, simply mail the coupon below or write TIAA-CREF, 730 Third Avenue, New York, NY 10017.

Yes! I'd like to increase my extra retirement savings and still have access to my money. Please send me your free brochure on solving this and other mysteries of my financial future.
