ANNUAL MEETING
Call for Contributed Papers
Discoverers of the Lost World, reviewed by S. D. Webb; Living Fossils, D. B. Wake; Biochemical Adaptation, D. Powers; Herbivory, M. D. Rausher; Books Received ................................................. 825

Acid Precipitation: Natural Versus Anthropogenic Components: J. N. Galloway, G. E. Likens, M. E. Hawley .................................................. 829
Holocene Sea Level Changes at the Coast of Dor, Southeast Mediterranean: Y. Sneh and M. Klein .................................................. 831
Transfection of the DNA Polymerase-α Gene: P. K. Liu and L. A. Loeb .................................................. 833
Ion Channels in Plasmalemma of Wheat Protoplasts: N. Moran et al. .................................................................................. 835
A Major Human Histone Gene Cluster on the Long Arm of Chromosome 1: L. Green et al. .................................................. 838
Reaction of the Antitumor Antibiotic CC-1065 with DNA: Structure of a DNA Adduct with DNA Sequence Specificity: L. H. Hurley et al. .................................................................................. 843
Phosphatidylinositol as a Component of the Ice Nucleating Site of Pseudomonas syringae and Erwinia herbicola: L. M. Kozloff, M. Lute, D. Westaway .................................................................................. 845
Amino Acid Sequence Similarity Between Rabies Virus Glycoprotein and Snake Venom Curaremetrical Neurotoxins: T. L. Lentz et al. .................................................................................. 847
Isolation and Structure of Bacterial Sex Pheromone, cPD1: A. Suzuki et al. .................................................................................. 849
Blockade of N-Methyl-D-Aspartate Receptors May Protect Against Ischemic Damage in the Brain: R. P. Simon et al. .................................................................................. 850
Transglutaminase-Mediated Modifications of the Rat Sperm Surface in Vitro: G. Paonessa et al. .................................................................................. 852
Fast and Slow Magnetic Phenomena in Focal Epileptic Seizures: D. S. Barth, W. Sutherland, J. Beauty .................................................................................. 855
Benzodiazepine Receptor Synthesis and Degradation by Neurons in Culture: L. A. Borden et al. .................................................................................. 857
Homologies Between Signal Transducing G Proteins and ras Gene Products: J. B. Hurley et al. .................................................................................. 860
Cigarette Craving, Smoking Withdrawal, and Clonidine: A. H. Glassman et al. .................................................................................. 864

Black bear. In winter, the black bear does not eat, drink, urinate, or defecate. Weeks before denning, while food and water are still readily available, the bear achieves this remarkable independence of the need for food and water. A ratio of blood urea to creatinine of 10 or less indicates that the bear is prepared for winter. See page 841. [Tom Beck, Colorado Division of Wildlife, Crawford 81415]
