LETTERS
Values, Research Questions, and the News Media: G. M. Herk; B. A. Gladue, R. Green, R. E. Hellman; Academic Freedom: J. Lamperti; J. B. Harris; H. T. Shapiro .......................................................... 1142

EDITORIAL
Science in Perspective: A. Thackray .......................................................... 1149

ARTICLES
The 1984 Nobel Prize in Chemistry: E. T. Kaiser .......................................................... 1151
Molecular Indices of Cell Lineage Specification in Sea Urchin Embryos: R. C. Angerer and E. H. Davidson .......................................................... 1153
Characterization and Molecular Cloning of a Human Parvovirus Genome: S. F. Cotmore and P. Tattersall .......................................................... 1161
Molecular Characterization of Human T-Cell Leukemia (Lymphotropic) Virus Type III in the Acquired Immune Deficiency Syndrome: G. M. Shaw et al. .......................................................... 1165

NEWS AND COMMENT
Turbulent Times for NOAA ................................................................................. 1172
Briefing: NRC Urges Destruction of Chemical Weapons; Biogen Cuts 13 Percent Including Scientists; France Proposes Shuttle Competition; Comings and Goings ................................................................................. 1174
New Army Biowarfare Lab Raises Concerns .......................................................... 1176

RESEARCH NEWS
DNA Reveals Surprises in Human Family Tree ..................................................... 1179
Some Avian Puzzles Solved ................................................................................. 1180
The Dethroned Ape ......................................................................................... 1182
Tracking Exposure to Toxic Substances ............................................................... 1183

SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 48446) paid at Washington, D.C., and at an additional entry. Copyright © 1984 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $56. Domestic institutional subscription (51 issues): $99. Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3.50 by mail); back issues $3 ($3.50 by mail); biotechnology issue, $5 ($5.50 by mail). All changes of address must include both old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/84 $1.00. 

BOOK REVIEWS
Occult and Scientific Mentalities in the Renaissance, reviewed by B. J. T. Dobbs; Modern and Ancient Fluvial Systems, W. E. Galloway; CRC Handbook of Coastal Processes and Erosion, C. Galvin; Adaptations for Foraging in Nonhuman Primates, R. W. Sussman; Books Received ........................................ 1185

REPORTS
The East Coast Magnetic Anomaly: L. E. Alsop and M. Talwani ...................... 1189
The Variability of Holocene Climate Change: Evidence from Varved Lake Sediments: W. E. Dean et al. ................................................................. 1191
A trans-Acting Product Needed for P Factor Transposition in Drosophila: W. R. Engels ................................................................. 1194
Requirement for a Signal Sequence in Biological Expression of the v-sis Oncogene: M. Hannink and D. J. Donoghue ................................. 1197
Constitutive Fragile Sites and Cancer: J. J. Yunis and A. L. Soreng .................. 1199
The Long Terminal Repeat Sequences of a Novel Human Endogenous Retrovirus: C. D. O'Connell and M. Cohen ...................................................... 1204
Nucleotide Sequences of the Human and Mouse Atrial Natriuretic Factor Genes: C. E. Seidman et al. ................................................................. 1206
Synapsin I in Nerve Terminals: Selective Association with Small Synaptic Vesicles: F. Navone, P. Greengard, P. De Camilli .............................. 1209
Homologous Recombination Catalyzed by Mammalian Cell Extracts in vitro: V. Darby and F. Blattner ...................................................... 1213
Morphine Analgesia Potentiated but Tolerance Not Affected by Active Immunization Against Cholecystokinin: P. L. Faris et al. ......................... 1215
Incidence of Low Birth Weight Among Love Canal Residents: N. J. Vianna and A. K. Polan ...................................................... 1217

A molecular marker of mesenchyme cell differentiation in the sea urchin embryo: in situ hybridization with a gastrula embryo section of a cloned single-stranded RNA probe specific for the CyIla cytoskeletal actin gene. Transcripts from this gene are indicated by the light autoradiographic grains seen only in the secondary mesenchyme cells. See page 1153. [R. Angerer and E. H. Davidson, California Institute of Technology, Pasadena 91125; photo by K. Cox]
