BOOK REVIEWS
Occult and Scientific Mentalities in the Renaissance, reviewed by B. J. T. Dobbs; Modern and Ancient Fluvial Systems, W. E. Galloway; CRC Handbook of Coastal Processes and Erosion, C. Galvin; Adaptations for Foraging in Nonhuman Primates, R. W. Sussman; Books Received .......................... 1185

REPORTS
The East Coast Magnetic Anomaly: L. E. Alsop and M. Talwani ...................... 1189
The Variability of Holocene Climate Change: Evidence from Varved Lake Sediments: W. E. Dean et al. ..................................................... 1191
A trans-Acting Product Needed for P Factor Transposition in Drosophila: W. R. Engels ................................................................. 1194
Requirement for a Signal Sequence in Biological Expression of the v-sis Oncogene: M. Hannink and D. J. Donoghue ........................................... 1197
Constitutive Fragile Sites and Cancer: J. J. Yunis and A. L. Soreng ................. 1199
The Long Terminal Repeat Sequences of a Novel Human Endogenous Retrovirus: C. D. O'Connell and M. Cohen .......................................... 1204
Nucleotide Sequences of the Human and Mouse Atrial Natriuretic Factor Genes: C. E. Seidman et al. ....................................................... 1206
Synapsin I in Nerve Terminals: Selective Association with Small Synaptic Vesicles: F. Navone, P. Greengard, P. De Camilli ................................. 1209
Homologous Recombination Catalyzed by Mammalian Cell Extracts in vitro: V. Darby and F. Blattner ......................................................... 1213
Morphine Analgesia Potentiated but Tolerance Not Affected by Active Immunization Against Cholecystokinin: P. L. Faris et al. ......................... 1215
Incidence of Low Birth Weight Among Love Canal Residents: N. J. Vianna and A. K. Polan ................................................................. 1217

COVER
A molecular marker of mesenchyme cell differentiation in the sea urchin embryo: in situ hybridization with a gastrula embryo section of a cloned single-stranded RNA probe specific for the CyIla cytoskeletal actin gene. Transcripts from this gene are indicated by the light autoradiographic grains seen only in the secondary mesenchyme cells. See page 1153. [R. Angerer and E. H. Davidson, California Institute of Technology, Pasadena 91125; photo by K. Cox]
