BOOK REVIEWS
Muscles, Reflexes, and Locomotion, reviewed by I. A. Johnston; Comparative Neurology of the Optic Tectum, W. Wilczynski; The Geochronology and
Evolution of Africa, M. P. A. Jackson; Ice Sheets and Climate, G. E. Birchfield; Magnetic Reconnection in Space and Laboratory Plasmas, T. G. Forbes; Books Received ........................................ 1308

REPORTS
Deposit from a Giant Wave on the Island of Lanai, Hawaii: J. G. Moore and G. W. Moore .......................................................... 1311
Specific Sequence Homology and Three-Dimensional Structure of an Aminoacyl Transfer RNA Synthetase: T. Webster et al. ........................................ 1315
Inability of Mouse Blastomere Nuclei Transferred to Enucleated Zygotes to Support Development in Vitro: J. McGrath and D. Solter ........................................ 1317
RNA Required for Import of Precursor Proteins into Mitochondria: F. A. Figueira et al. .............................................................. 1319
Persistence of the Entire Epstein-Barr Virus Genome Integrated into Human Lymphocyte DNA: T. Matsumoto et al. ........................................ 1322
Monoclonal Idiotope Vaccine Against *Streptococcus pneumoniae* Infection: M. K. McNamara, R. E. Ward, H. Kohler .................................................. 1325
Essential Role of Insulin in Transcription of the Rat 25,000 Molecular Weight Casein Gene: P. Chomczynski, P. Qasba, Y. J. Topper ........................................ 1326
Carbohydrate Dramatically Influences Immune Reactivity of Antisera to Viral Glycoprotein Antigens: S. Alexander and J. H. Elder ........................................ 1328
Pollen Feeding in an Orb-Weaving Spider: R. B. Smith and T. P. Mommsen ................................................................. 1330
Auditory Illusions Demonstrating That Tones Are Assimilated to an Internalized Musical Scale: R. N. Shepard and D. S. Jordan ........................................ 1333
Activated Expression of the N-myc Gene in Human Neuroblastomas and Related Tumors: N. E. Kohl, C. E. Gee, F. W. Alt ........................................ 1335
JC Virus Enhancer-Promoter Active in Human Brain Cells: S. Kenney et al. ................................................................. 1337
Purified Human Granulocyte-Macrophage Colony-Stimulating Factor: Direct Action on Neutrophils: J. C. Gasson et al. ........................................ 1339
Elevated Concentrations of CSF Corticotropin-Releasing Factor-Like Immunoreactivity in Depressed Patients: C. B. Nemeroff et al. ........................................ 1342
Amino-Terminal Amino Acid Sequence of the Silkworm Prothoracicotropic Hormone: Homology with Insulin: H. Nagasawa et al. ........................................ 1344
Voltage-Dependent Calcium Channels in Glial Cells: B. A. MacVicar ................................................................. 1345

COVER
Basic oxygen furnace beneath ladle tilted to the charging position to receive the liquid hot metal portion of the charge before refining iron into steel. Energy-intensive industrial processes are in a state of transition, both technologically and in the demand for their products. This has implications for future energy demand and the changing composition of U.S. industrial production. See page 1277. [U.S. Department of Energy, Washington, D.C. 20585]
