SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 494/461) paid at Washington, D.C., and at an additional entry. Authorized as a newspaper for the Advancement of Science. Domestic individual membership and subscription ($1 issues): $56. Domestic institutional subscription ($1 issues): $93. Foreign postage extra; Canada $24, other (surface mail) $27, air service via Amsterdam $65. First class, airmail, school-year subscription rates on request. Single copies $2.50 ($6 by mail); back issues $3 ($3.50 by mail); Biotechnology issue, $5 ($5.50 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/63 $1.15. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
BOOK REVIEWS

Isolated Singular Points on Complete Intersections, reviewed by H. C. Pinkham; The Solar Granulation, S. L. Kell; European Mires, A. W. H. Damman; Cellular Ageing, G. Martin; Reprints of Books Previously Reviewed; Books Received

REPORTS

Lunar Sample 14425: Characterization and Resemblance to High-Magnesium Microtekites: J. A. O’Keefe and B. P. Glass

Magnetic Resonance Imaging of Biological Specimens by Electron Paramagnetic Resonance of Nitroxide Spin Labels: L. J. Berliner and H. Fujii

Two-Million-Year Record of Deuterium Depletion in Great Basin Ground Waters: I. J. Winograd et al.

Histological Demonstration of Mosaicism in a Series of Chimeric Rats Produced Between Congenic Strains: W. C. Weinberg, J. C. Howard, P. M. Iannaccone

Microorganism Mediated Reproductive Isolation in Flour Beetles (Genus Tribolium): M. J. Wade and L. Stevens

Experimental Leprosy in Three Species of Monkeys: R. H. Wolf et al.

The Role of Hemoglobin Denaturation and Band 3 Clustering in Red Blood Cell Aging: P. S. Low et al.

Insulin Mediators from Rat Skeletal Muscle Have Differential Effects on Insulin-Sensitive Pathways of Intact Adipocytes: L. Jarett et al.

Vaccination Against Schistosoma mansoni with Purified Surface Antigens: M. A. Smith and J. A. Clegg

Characterization of Long Terminal Repeat Sequences of HTLV-III: B. Starich et al.

The Pollination of Zygogynum (Winteraceae) by a Moth, Sabatinca (Micropterigidae): An Ancient Association?: L. B. Thien et al.

Hypothalamic Reward Mechanism: Two First-Stage Fiber Populations with a Cholinergic Component: A. Gratton and R. A. Wise

Multiple Organ Carcinogenicity of 1,3-Butadiene in B6C3F1 Mice After 60 Weeks of Inhalation Exposure: J. E. Huff et al.

Covers

Variegated Glacier (Alaska) in full surge, 4 July 1983. View is upstream from a point 5 kilometers from the terminus. It shows the extreme fracturing (crevassing) and bulging, or arching up, of the ice caused by the surge. Ice in the middle ground is moving toward the camera at a speed of about 30 meters per day. In the foreground is a lake (with icebergs) formed by welling up of highly turbid (brown) water in the large crevasse (left foreground), from which the water flows out to the glacier margin. This water comes from the glacier bed and its upwellings is an indication of high pressure in the basal system. See page 469. [Elise Mezger, California Institute of Technology, Pasadena 91125]
