SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. Combined with The Scientific Monthly. Copyright © 1985 by the American Association for the Advancement of Science. Domestic individual membership and subscription ($1 issues): $56. Domestic institutional subscription (61 issues): $20. Foreign postage extra: Canada $24, other surface mail $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $3.50 by mail; Biotechnology issue, $5 ($5.50 by mail); classroom rates on request. Change of address: allow 8 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and others registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1.00. Postmaster: Send Form 4844 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
BOOK REVIEWS
High Altitude and Man, reviewed by E. A. Phillipson; T. H. Huxley's Place in Natural Science, P. F. Rehbock; A Permanencia de Rodolfo von Ihering, M. J. Weitzman and S. H. Weitzman; Nest Building and Bird Behavior, H. B. Tordoff; Books Received ........................................ 171

REPORTS
Computerized Pattern Recognition: A New Technique for the Analysis of Chemical Communication: A. B. Smith, III et al. ................................. 175
Flight of Winter Moths Near 0°C: B. Heinrich and T. P. Mommsen .......................... 177

Digestive Adaptations for Fueling the Cost of Endothermy: W. H. Karasov and J. M. Diamond ................................................................. 202
Herbicide Resistance and Cross-Resistance: Changes at Three Distinct Sites in the Herbicide-Binding Protein: J. M. Erickson et al. ................................................................. 204

PRODUCTS AND MATERIALS
Ion Meter; Mass Spectrometer; Gas Chromatograph; Image Analyzer; Amino Acid Analyzer; Literature................................................................. 208

COVER
"Fur" (technically pile) on thorax of moth, Orthosia rubescens. Such fur allows noctuid winter moths to maintain thoracic temperatures above 30°C during flight at near freezing temperatures in late winter. It consists of modified scales (that color Lepidoptera wings), elongated to near 2 millimeters to serve as insulation. See page 177. [Bernd Heinrich, University of Vermont, Burlington 05405]
