PRODUCTS AND MATERIALS

Exonuclease; Microbiology Computer System; Automated Sample Processing; Laboratory Ovens; Benchtop Fermentor; Replaceable Junction pH Electrodes; Liquid Scintillation Analyzer; Heatable Plastic Beakers; Fluorescence Microscope; Peptide Synthesizer; Cloning and Expression System; Centrifuges; DNA Synthesizer; Gas Chromatograph; Literature ........................................... 1336

COVER

Shadowgraph of a dragonfly, Aeschna palmaria. The slender body and intricate wing venation of the dragonfly reflect millions of years of evolutionary pressures. Such structures support remarkable aerodynamic agility. Unsteady, separated fluid mechanisms appear to produce the high lift needed for this agility. See page 1326. [Wolfgang Bank, University of Colorado, Boulder 80309]
