New System 7300 Amino Acid Analyzer Plots, Labels, Calculates, Prints, Remembers

The System 7300 from Beckman features a new dual-channel data system that offers you important new capabilities for amino acid analysis.

It automatically labels each peak on the chromatogram with the name of the amino acid, so there is no need for time-consuming correlations with elution times. It calculates and prints out both 440 and 570 nm colorimeter signals for greater quantitative accuracy at picomole levels. And its floppy disc memory not only stores up to 40 analyses, but permits reassignment of baselines and reformating of data.

Like the System 6300, the new System 7300 is a dedicated high-performance ion-exchange chromatograph featuring a single, prepacked stainless steel column operating at up to 3000 psi. It performs hydrolyzate analyses in a half hour, and physiological analyses in 2 hours. These results are guaranteed by Beckman, with detailed methods, applications back-up, and field service second to none.

No wonder the System 7300 has been received so enthusiastically by researchers the world over. For details, call your Beckman representative or write Beckman Instruments, Inc., Spinco Division, 1050 Page Mill Road, Palo Alto, CA 94304. Offices in principal cities worldwide.

When it comes to life science research or food analysis by HPLC, you'll find a refreshing difference at Bio-Rad. We offer HPLC systems that are especially tailored for biological and food applications. You'll never have to worry whether a general purpose chromatograph will suit your needs or not.

What we offer the chromatographer in HPLC goes far beyond the hardware that makes it work. In-depth technical service and applications assistance from our experienced staff of chromatographers are longtime Bio-Rad trademarks. We give our HPLC products the same support we provide for our classical lines—ion exchange, immunochemistry and electrophoresis. It's just what you'd expect from a full service separations company.

Innovation plays a large role in Bio-Rad's current HPLC efforts. Recent developments in the life science field include:

- A high speed, high resolution Protein Micro-Analyzer™ System that gives you complete separations in less than 3 minutes. Ideal if you're working with microgram or submicrogram amounts of protein.
- The new Preparative Monoclonal Antibody System (MAPS™) purifies all classes of monoclonal antibodies on a large scale. There's nothing like it!

Bio-Rad pioneered the use of HPLC for food analysis and continues to be the leader in this field. Two key applications are:

- Bio-Rad's Automated Carbohydrate HPLC System with Data Acquisition. Provides high resolution analysis of all classes of carbohydrates in 5-15 minutes.
- New Fermentation Monitoring Analyzer gives a complete analysis of fermentation broth right on your manufacturing floor in just 10 minutes.

To find out more about Bio-Rad's refreshing approach to HPLC, request our new brochure entitled "HPLC Applications Systems." Contact:

Bio-Rad

“a company is known by the people it keeps.”

We've taken the liberty of reversing a well-known axiom to make a point about our toxicology laboratory. People make it work. And we've got a greater percentage of the best of them than anyone else. Every single one of our toxicology study directors is board-certified and a member of the Society of Toxicology. That's why every test (acute, subchronic or chronic) is directed by a certified toxicologist experienced in interpreting data, the normal findings, as well as unusual treatment-related effects. In addition, our pathologists are all board-certified or board-eligible, each having over a decade of experience. The majority of our technicians are also AALAS-certified, hold college degrees and have passed a vigorous in-house training program.

Turning the saying back to its original form, “people are known by the company they keep,” there's another point to be made. That is, we not only encourage our people to gain certifications, but we keep them after they do.

People. A key ingredient to our success. And yours!

For information contact Dr. Gary Benke, (201) 873-2550, P.O. Box 43, Mettlers Road, East Millstone, New Jersey 08873.

Toxicology testing... we do it right the first time. On time.
When you say “why FPLC” you are half way there...

... because Superose™ from Pharmacia is the peak of evolution in high performance gel filtration for the separation of labile biomolecules.

Over the past 25 years, Pharmacia has developed a broad range of chromatography media, including Sephadex®, Sepharose®, Sephacryl®, MonoBeads™, ProRPC™, and PepRPC™, together with the FPLC System, to meet the ever-growing requirements of experienced, innovative and demanding groups of researchers throughout the world.

Now, the FPLC System and Superose from Pharmacia allow you to use high performance gel filtration without the limitations imposed by silica and stainless steel.

With the introduction of Superose, the Pharmacia range of high performance chromatography media, including MonoBeads, ProRPC and PepRPC, has been extended to provide you with gel filtration media for fast, high resolution separations of biomolecules, from small peptides to large proteins and DNA-fragments.

- High performance prepacked glass columns
- Reproducible results
- High recovery of biological activity
- pH stability (1–14)
- Extended column life
- Pharmacia know-how

... so go all the way

Superose pre-packed glass columns with high chemical and pH stability, up to pH 14, provide you with unequalled flexibility in your choice of eluents and greatly simplify your column cleaning routines.

Superose allows you to perform rapid separations (20–60 min) while obtaining high resolution and high recovery, facilitating and improving your work in research, quality control or process development.

Superose has been especially developed for bioscientists and is optimized for high performance separation of proteins, DNA-fragments, peptides and other biomolecules.

The natural selection... 
... for the separation of biomolecules.

The high speed and multi-component capability of Hewlett-Packard’s diode array spectrophotometers remain unchallenged. No other UV/VIS has the wavelength reproducibility, diode array detector, and maximum likelihood statistics to provide a comparable level of precision and accuracy. No other approach allows you the flexibility of real-time multicomponent analysis. And, only HP offers this sophisticated technology in two versions, one just right for your laboratory.

The HP 8450A is a powerful dual beam diode array spectrophotometer that will satisfy your most rigorous research requirements. The HP 8451A is an extremely cost-effective single beam system designed to meet the day-in, day-out demands on your laboratory facilities. Overlapping capabilities and equally rigorous performance parameters allow you to select your system today with an eye to budget constraints, possible multiple applications, and potential future uses.

For added cost-effectiveness both systems can be used as LC detectors. And, the HP 8451A can also be used as a stand-alone desk-top computer.

The HP 8451A provides a quality of results comparable with the HP 8450A but features a single beam mode and operating parameters that adapt it well to quality control, educational and other analysis situations in which many samples must be processed. Price: $14,200.*

Your HP Analytical representative can help you determine the system best fitted to your laboratory’s needs and can also tell you how to qualify for HP’s special 15% educational discount. For more information call your local HP sales office listed in the telephone directory white pages, and ask for an Analytical product representative. Or, write: Hewlett-Packard Analytical Group, 1820 Embarcadero Road, Palo Alto, CA 94303.

U.S. Domestic prices only.

PRESENTING TWO NEW GALAXY™ AUTO RANGE TOP LOADERS.
HIGH CAPACITY, FINE READABILITY, MORE VERSATILITY.

Having one of our new Galaxy™ G400D or G4000D AutoRange toploaders is like having two precision balances in one! There's no need to press a button to increase capacities. The balance does it for you.

Created with your needs in mind and designed for a variety of lab applications, our remarkable AutoRange balances offer both high capacity to weigh larger objects plus fine readability to accurately weigh smaller quantities. The G400D has a capacity of 400 grams and a fine readability of 0.001 grams. The G4000D has a capacity of 4000 grams and a fine readability of 0.01 grams. They make formula weighing simple. And, with results shown in bright digits more than 1/2" high, no balance offers better visibility!

OHAUS

THE NEW POWERHOUSE IN ELECTRONIC BALANCES.

Galaxy™ AutoRange toploaders are the most universal balances on the market because they include a host of other convenient features. Automatic calibration. Variable integration. Full range taring at a touch. Metric and non-metric weighing units. Parts counting capability. Programmable custom weighing unit. And RS-232 bi-directional interface is included.

For the greatest versatility, flexibility and affordability, these Galaxy™ toploaders can't be beat.

Call 800-672-7722 today for a demonstration. And discover what our new AutoRange balances can do for you!

**NEW**

**BioMag Magnetic Separations**

**Fast and easy for:**
- Particulate Separations
- Cell Sorting Applications
  - IgG Complexes
  - Double Antibody Assays
  - Monoclonal Screening
  - Serum Stripping
  - Affinity Chromatography

**Separations are:**
- Rapid
- Convenient
- Safe, No Containment Required
- No Centrifugation, No Aerosols
- No Filters, No Fouling

**BioMag available as particles covalently coupled to:**
- Protein A
- Anti-Rabbit IgG
- Anti-Mouse IgG
- Charcoal
- Anti-Fluorescein
- Anti-Human IgM

Magnetic Separator Racks for Microtiter Plates or Test Tubes Available

For further information call or write:

**Advanced Magnetics Inc.**

45 Spinelli Place • Cambridge, Massachusetts 02138
Telephone (617) 497-2070
Telex: 95-1417 TX Network BSN Ref: BIOC
The following posters of Science covers are available:

- 30 March 1979, Tropical flowering tree;
- 23 February 1983, Landsat photo of Detroit, Michigan;
- 29 July 1983, Cheetah;
- 2 December 1983, Snowshoe hare;
- 23 December 1983, Cathedral window/DNA molecule.

Combination of space covers in scroll format: 1 June 1979, 23 November 1979, 10 April 1981.

Price is $5 each (prepaid).

Write to AAAS, Department POST, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005.

**PRINT BIBLIOGRAPHIES IN THE STYLE OF ANY JOURNAL WITH YOUR MICROCOMPUTER AND Martz-BIBLIOFILE™**

Compatible with most text editors (Wordstar [*"Micropolis is fine].

Martz-BIBLIOFILE™ remembers which journals you have used, and lists them by name on a menu. Martz-BIBLIOFILE™ can sequentially

Renumber Citations in Your Manuscript,
then get the cited references from your master database, and put the bibliography for your manuscript in a standard ASCII file for printing. Also supports author/year citation.

**Alphabetize Any Bibliography or Your Entire Collection!**

**Search with And-Or-Not Logic**
on any fields (author, year, title, journal/book, volume-pages, or keywords).

**Include Personalized Keywords**
up to 500 characters (the limit per field; a reference can total up to 2000 characters). A DSDD 5¼" disk will hold 1200 references; a DSDD 8" disk, 4000. Large collections can be spread over several floppy disks.

Martz-BIBLIOFILE™ costs $250 and is available for the IBM-PC (or any MS-DOS computer), and for most 64K CP/M-80 Vs. 2.2 (*"Digital Research) microcomputers, including Apple II (with CP/M card only), DEC Rainbow, Epson QX-10, Heath/Zenith, Kaypro, Northstar, Osborne, Superbrain, Televideo, Xerox 820, Zorba, and many others. Manual only $30; with demonstration disk (IBM-PC/MS-DOS only) $50.

Martz Software Power Tools, Inc., 48 Hunter’s Hill Circle, Amherst, MA 01002.
