BOOK REVIEWS
Taste, Olfaction, and the Central Nervous System, reviewed by R. C. Rogers; The
Smith Conjecture, W. Jaco; The Colorado River, V. R. Baker; Ocean Wave
Modeling, J. Miles; Books Received .............................................................. 374

REPORTS
Paleoseismic Evidence for Recurrence of Earthquakes Near Charleston, South
Carolina: P. Talwani and J. Cox ............................................................... 379
Periodicity in Tree Rings from the Corn Belt: D. M. Meko, C. W. Stockton,
T. J. Blasing ................................................................................................. 381
Competition for Phosphorus: Differential Uptake from Dual-Isotope–Labeled Soil
Interspaces Between Shrub and Grass: M. M. Caldwell, D. M. Eissenstat,
J. H. Richards, M. F. Allen ....................................................................... 384
The Crystallization of Ultralong Normal Paraffins: The Onset of Chain Folding:
G. Ungar, J. Stejny, A. Keller, I. Bidd, M. C. Whiting .................................. 386
Amino Acid Replacements That Compensate for a Large Polypeptide Deletion in
an Enzyme: C. Ho, M. Jasins, P. Schimmel ............................................. 389
Molecular Cloning of a Gene Sequence Regulated by Nerve Growth Factor:
A. Levi, J. D. Eldridge, B. M. Paterson ..................................................... 393
Vasopressin-Stimulated Release of Atriopeptin: Endocrine Antagonists in Fluid
Homeostasis: P. T. Manning, D. Schwartz, N. C. Katsube, S. W. Holmberg,
P. Needleman ............................................................................................... 397
Ser-Leu-Arg-Arg–Atriopeptin III: The Major Circulating Form of Atrial Peptide:
D. Schwartz et al. ......................................................................................... 399
Conservation Genetics of Endangered Fish Populations in Arizona:
R. C. Vrijenhoek, M. E. Douglas, G. K. Meffe ........................................... 402
Reciprocal Inhibition and Postinhibitory Rebound Produce Reverberation in a
Locomotor Pattern Generator: R. A. Satterlie ........................................... 404

PRODUCTS AND
MATERIALS
Spectrophotometer; Enzyme for Glycoprotein Research; HPLC System; Cell
Separation Tubes; Detector for Monoclonal Antibodies; Multichannel
Recorder; Literature ...................................................................................... 405

COVER
Dorsal surface of gymnosome pteropod (Clione limacina) photographed during
slow forward locomotion. Forward locomotion results from flapping move-
ments of the wing-like parapodia. See page 402. [M. LaBarbera, Department
of Anatomy, University of Chicago]
