BOOK REVIEWS

The Transforming Principle, reviewed by R. Olby; Social Organization of Medical Work, P. Conrad; Oscillations and Traveling Waves in Chemical Systems, R. Kapral; Books Received ................................................................. 851

REPORTS

Climate Response Times: Dependence on Climate Sensitivity and Ocean Mixing: J. Hansen et al. ................................................................. 855
Acid Deposition, Smelter Emissions, and the Linearity Issue in the Western United States: M. Oppenheimer, C. B. Epstein, R. E. Yuhnke .......................... 859
Stereostructure of the Archaeobacterial C₄₀ Diol: C. H. Heathcock, B. L. Finkelstein, T. Aoki, C. D. Foultet ....................................................... 866
Passive Immunization Against Cachectin/Tumor Necrosis Factor Protects Mice from Lethal Effect of Endotoxin: B. Beutler, I. W. Millsark, A. C. Cremer ................................................................. 869
Morphological Novelty in the Limb Skeleton Accompanies Miniaturization in Salamanders: J. Hanken ....................................................... 871
Relation of Spectral Types to Oil Droplets in Cones of Turtle Retina: T. Ohtsuka ................................................................. 874
Infection of the Basal Ganglia by a Murine Coronavirus: P. S. Fishman et al. ................................................................. 877
Depolarization and Muscarinic Excitation Induced in a Sympathetic Ganglion by Vasoactive Intestinal Polypeptide: M. Kawatani, M. Ruitigliano, W. C. de Groat ................................................................. 879

COVER

Fluorescent micrograph of a red-sensitive single cone containing a red oil droplet in the retina of the red-eared turtle (Pseudemys scripta elegans). The spectral sensitivity of each photoreceptor was recorded in the eyecup preparation, and then Lucifer yellow was ionophoretically injected. The yellow fluorescent ring around the red oil droplet is seen as a corona. The color of the oil droplet could be correlated with the three chromatic types of cones. See page 874 [Teruya Ohtsuka, Department of Information Physiology, National Institute for Physiological Sciences, Okazaki, Japan]
