This Week in Science .................................................. 1333

LETTERS
The Granting System: A. Nisonoff; J. S. Wicken; Biotechnology and the Biosphere: E. P. Odum ...................... 1336

EDITORIAL
Use of and Research on Pheromones ................................ 1343

ARTICLES
Multiphoton Ionization of Atoms: C. K. Rhodes ..................... 1345
The Epidemiology of AIDS: Current Status and Future Prospects: J. W. Curran et al. ........................................ 1352
Three-Dimensional Structure of Poliovirus at 2.9 Å Resolution: J. M. Hogle, M. Chow, D. J. Filman ......................... 1356
Perspective: Picornaviruses Are No Longer Black Boxes: D. Baltimore ................................................................. 1366

NEWS AND COMMENT
Americans and French Find the Titanic .............................. 1368
The Rise and Decline of Temik ........................................ 1369
Briefing: Avoiding Nuclear War; Congress Urged to Approve China Nuclear Agreement; Universities Urged to Enter the Information Age; Ignition Error Blamed for Ariane Failure .................................................. 1372

RESEARCH NEWS
Fermilab Tests Its Antiproton Factory ................................ 1374
Making Better Planetary Rings ......................................... 1376
Breast Cancer Consensus ................................................ 1378

BOOK REVIEWS
Sociology and Anthropology in the People’s Republic of China, reviewed by R. P. Madsen; Hawks, Doves, and Owls and Preventing Nuclear War,
Transformation of a Tundra River from Heterotrophy to Autotrophy by Addition of Phosphorus: B. J. Peterson et al. ........................................ 1383
Increase of Atmospheric Methane Recorded in Antarctic Ice Core: B. Stauffer, G. Fischer, A. Nefel, H. Oeschger ................................. 1386
Transcription of Novel Open Reading Frames of AIDS Retrovirus During Infection of Lymphocytes: A. B. Rabson et al. .................. 1388
The t(14;18) Chromosome Translocations Involved in B-Cell Neoplasms Result from Mistakes in VDJ Joining: Y. Tsujimoto, J. Gorham, J. Cosman, E. Jaffe, C. M. Croce .......................... 1390
Site-Specific Increased Phosphorylation of pp60src After Treatment of RSV-Transformed Cells with a Tumor Promoter: A. F. Purchio, M. Shoyab, L. E. Gentry ........................................ 1393
Abnormal Visual Pathways in Normally Pigmented Cats That Are Heterozygous for Albinism: A. G. Leventhal, D. J. Vitek, D. J. Creel ........................ 1395
Glucocorticoids Potentiate Ischemic Injury to Neurons: Therapeutic Implications: R. M. Sapolsky and W. A. Pulsinelli .......................... 1397
Characterization of gp41 as the Transmembrane Protein Coded by the HTLV-III/LAV Envelope Gene: F. diM. Veronese et al. ................... 1402
Atrial Natriuretic Factor Ameliorates Chronic Metabolic Alkalosis by Increasing Glomerular Filtration: M. G. Cogan ............................ 1405

**AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE**

G. H. Quester, Plant Membranes, R. S. Alberte; The Geometry of Fractal Sets, S. J. Taylor; Books Received ................................. 1379

**REPORTS**

**PRODUCTS AND MATERIALS**

Automated Sample Processing; Artificial Intelligence Systems: Labeled DNA; Pump; Pulse Generator for Monoclonal Antibody Production; Chart Recorders; Incubator Accessory; Coagulation Analyzer .......................... 1412

**COVER**

Extremely rare tyrosinase-negative albinos (cc) which completely lacks melanin pigmentation. Homozygous albino cats (cc) and normally pigmented cats which carry the recessive allele for tyrosinase-negative albinism (Cc) exhibit congenital visual system defects. One to 2 percent of the human population carries a recessive allele for albinism. See page 1395. [Donnell J. Creel, Veterans Administration Medical Center, Salt Lake City, Utah 84148]
