This Week in Science .................................................. 1333

LETTERS

The Granting System: A. Nisonoff; J. S. Wicken; Biotechnology and the Biosphere: E. P. Odum .................................................. 1336

EDITORIAL

Use of and Research on Pheromones .................................. 1343

ARTICLES

Multiphoton Ionization of Atoms: C. K. Rhodes .................. 1345

The Epidemiology of AIDS: Current Status and Future Prospects: J. W. Curran et al. .................................................. 1352

Three-Dimensional Structure of Poliovirus at 2.9 Å Resolution: J. M. Hogle, M. Chow, D. J. Filman .................. 1356

Perspective: Picornaviruses Are No Longer Black Boxes: D. Baltimore .................................................. 1366

NEWS AND COMMENT

Americans and French Find the Titanic .................. 1368

The Rise and Decline of Temik ........................................ 1369

Briefing: Avoiding Nuclear War; Congress Urged to Approve China Nuclear Agreement; Universities Urged to Enter the Information Age; Ignition Error Blamed for Ariane Failure .................................................. 1372

RESEARCH NEWS

Fermilab Tests Its Antiproton Factory .................. 1374

Making Better Planetary Rings ........................................ 1376

Breast Cancer Consensus .................................................. 1378

BOOK REVIEWS

Sociology and Anthropology in the People's Republic of China, reviewed by R. P. Madsen; Hawks, Doves, and Owls and Preventing Nuclear War, 18

SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. Now combined with The Scientific Monthly. Copyright © 1985 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $60. Domestic institutional subscription (51 issues): $98. Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $3 ($3.50 by mail); Biotechnology issue, $5 ($5.50 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/85 $1 + 10.

REPORTS

G. H. Quester; Plant Membranes, R. S. Alberte; The Geometry of Fractal Sets, S. J. Taylor; Books Received .......................... 1379

Transformation of a Tundra River from Heterotrophy to Autotrophy by Addition of Phosphorus: B. J. Peterson et al. .......... 1383

Increase of Atmospheric Methane Recorded in Antarctic Ice Core: B. Stauffer, G. Fischer, A. Nefel, H. Oeschger ...................... 1386

Transcription of Novel Open Reading Frames of AIDS Retrovirus During Infection of Lymphocytes: A. B. Rabson et al. .......... 1388

The t(14;18) Chromosome Translocations Involved in B-Cell Neoplasms Result from Mistakes in VDJ Joining: Y. Tsujimoto, J. Gorham, J. Cosman, E. Jaffe, C. M. Croce .............................. 1390

Site-Specific Increased Phosphorylation of pp60<sup> src </sup> After Treatment of RSV-Transformed Cells with a Tumor Promoter: A. F. Purchio, M. Shoyab, L. E. Gentry .............. 1393

Abnormal Visual Pathways in Normally Pigmented Cats That Are Heterozygous for Albinism: A. G. Leventhal, D. J. Vitek, D. J. Creel ...... 1395

Glucocorticoids Potentiate Ischemic Injury to Neurons: Therapeutic Implications: R. M. Sapolsky and W. A. Pulsinelli .................. 1397

PRODUCTS AND MATERIALS

Automated Sample Processing; Artificial Intelligence Systems: Labeled DNA; Pump; Pulse Generator for Monoclonal Antibody Production; Chart Recorders; Incubator Accessory; Coagulation Analyzer ..................... 1412

COVER

Extremely rare tyrosinase-negative albino cat (cc) which completely lacks melanin pigmentation. Homozygous albinos (cc) and normally pigmented cats which carry the recessive allele for tyrosinase-negative albinism (Cc) exhibit congenital visual system defects. One to 2 percent of the human population carries a recessive allele for albinism. See page 1395. [Donnell J. Creel, Veterans Administration Medical Center, Salt Lake City, Utah 84148]
