This Week in Science .......................................................... 1333

LETTERS

The Granting System: A. Nisonoff; J. S. Wicken; Biotechnology and the Biosphere: E. P. Odum .................................................. 1336

EDITORIAL

Use of and Research on Pheromones ......................................... 1343

ARTICLES

Multiphoton Ionization of Atoms: C. K. Rhodes ......................... 1345

The Epidemiology of AIDS: Current Status and Future Prospects: J. W. Curran et al. .......................................................... 1352

Three-Dimensional Structure of Poliovirus at 2.9 Å Resolution: J. M. Hogle, M. Chow, D. J. Filman ........................................ 1356

Perspective: Picornaviruses Are No Longer Black Boxes: D. Baltimore ............................................................. 1366

NEWS AND COMMENT

Americans and French Find the Titanic .................................... 1368

The Rise and Decline of Temik ................................................ 1369

Briefing: Avoiding Nuclear War; Congress Urged to Approve China Nuclear Agreement; Universities Urged to Enter the Information Age; Ignition Error Blamed for Ariane Failure ........................................... 1372

RESEARCH NEWS

Fermilab Tests Its Antiproton Factory ........................................ 1374

Making Better Planetary Rings ............................................... 1376

Breast Cancer Consensus ...................................................... 1378

BOOK REVIEWS

Sociology and Anthropology in the People’s Republic of China, reviewed by R. P. Madsen; Hawks, Doves, and Owls and Preventing Nuclear War,
Transformation of a Tundra River from Heterotrophy to Autotrophy by Addition of Phosphorus: B. J. Peterson et al. .......................... 1383
Increase of Atmospheric Methane Recorded in Antarctic Ice Core: B. Stauffer, G. Fischer, A. Nefel, H. Oeschger .......................... 1386
Transcription of Novel Open Reading Frames of AIDS Retrovirus During Infection of Lymphocytes: A. B. Rabson et al. .................. 1388
The t(14;18) Chromosome Translocations Involved in B-Cell Neoplasms Result from Mistakes in VDJ Joining: Y. Tsujimoto, J. Gorham, J. Cosman, E. Jaffe, C. M. Croce ......................... 1390
Site-Specific Increased Phosphorylation of pp60^src After Treatment of RSV-Transformed Cells with a Tumor Promoter: A. F. Purchio, M. Shoyab, L. E. Gentry ........................................ 1393
Abnormal Visual Pathways in Normally Pigmented Cats That Are Heterozygous for Albinism: A. G. Leventhal, D. J. Vitek, D. J. Creel .......... 1395
Glucocorticoids Potentiate Ischemic Injury to Neurons: Therapeutic Implications: R. M. Sapolsky and W. A. Pulsinelli .................. 1397
Characterization of gp41 as the Transmembrane Protein Coded by the HTLV-III/LAV Envelope Gene: F. diM. Veronese et al. .......... 1400

PRODUCTS AND MATERIALS

Automated Sample Processing; Artificial Intelligence Systems: Labeled DNA; Pump; Pulse Generator for Monoclonal Antibody Production; Chart Recorders; Incubator Accessory; Coagulation Analyzer .................. 1412

COVER

Extremely rare tyrosinase-negative albino cat (cc) which completely lacks melanin pigmentation. Homozygous albinos (cc) and normally pigmented cats which carry the recessive allele for tyrosinase-negative albinism (Cc) exhibit congenital visual system defects. One to 2 percent of the human population carries a recessive allele for albinism. See page 1395. [Donnell J. Creel, Veterans Administration Medical Center, Salt Lake City, Utah 84148]
