COVER

Landsat false-color image of southern Sierra Nevada Batholith, California. The San Andreas Fault strikes across the frame from left to right; the Garlock Fault joins the San Andreas in the left-center of the image. The deflected "tail" of the Sierra Nevada is bounded to the right by the Garlock Fault. The large tan triangular area in the right-center is the Mojave Desert. The blue-green areas to the south denote the San Fernando Valley and metropolitan Los Angeles. See page 172. [EROS Data Center, Sioux Falls, South Dakota]
