This Week in Science ................................................................. 371

LETTERS

Biotechnology Issues: J. P. Jordan; Crystals in Space: R. Leberman;
R. J. Naumann, R. S. Snyder, C. E. Bugg, L. J. DeLucas, F. L. Suddath;
The Granting System and Healthy Research: J. R. Ison ..................... 375

EDITORIAL

Scientific Literacy............................................................... 391

ARTICLES

Rates of Elementary Reactions: Measurement and Applications: F. Kaufman .... 393

Multiple Mechanisms of Protein Insertion Into and Across Membranes:
W. T. Wickner and H. F. Lodish........................................ 400

U.S. Farm Dilemma: The Global Bad News Is Wrong: D. Avery ............... 408

X-ray Structure of the Major Adduct of the Anticancer Drug Cisplatin with DNA:
cis-[Pt(NH$_3$)$_2$(d(pGpG))]: S. E. Sherman, D. Gibson, A. H.-J. Wang,
S. J. Lippard ................................................................. 412

NEWS AND COMMENT

Congress Readsies AIDS Funding Transfusion .................................. 418

The Academy Kills a Nutrition Report ....................................... 420

Deficit Reduction Plan Threatens Research ................................ 421

Briefing: Stanford President Calls for New Authorship Policy; Episcopal Church
Backs Genetic Engineering; USDA Fines Pennsylvania Animal Laboratory;
Comings and Goings .......................................................... 422

Space Junk Grows with Weapons Test ...................................... 424

RESEARCH NEWS

Pinning Down the Next Big California Quake ................................. 426

Chemists Seek a Higher Profile ............................................. 427
On the Origin of Insect Wings .................................................. 428

BOOK REVIEWS

The Great Devonian Controversy, reviewed by D. R. Oldroyd; Unstable Current Systems and Plasma Instabilities in Astrophysics, A. F. Cheng; The Ecology of Natural Disturbance and Patch Dynamics, H. S. Horn; Penicillin, J. Liebenau; Books Received .............................................................. 432

REPORTS

A Decline in Lead Transport by the Mississippi River: J. H. Trefry, S. Metz, R. P. Trobine, T. A. Nelsen .......................................................... 439
Identification of the Protein Encoded by the E6 Transforming Gene of Bovine Papillomavirus: E. J. Androphy, J. T. Schiller, D. R. Lowy ................. 442
A Pea Mutant for the Study of Hydrotropism in Roots: M. J. Jaffe, H. Takahashi, R. L. Biro .............................................................. 445
Synthesis of Chlorophyllide b from Protochlorophyllide in Chlamydomonas reinhardii y-l: D. P. Bednarik and J. K. Hooper ........................................ 450
Inhibition of Lymphocyte Proliferation by a Synthetic Peptide Homologous to Retroviral Envelope Proteins: G. J. Cianciolo, T. D. Copeland, S. Oroszlan, R. Snyderman .............................................................. 453
Encoding of Spatial Location by Posterior Parietal Neurons: R. A. Andersen, G. K. Essick, R. M. Siegel .......................................................... 456
Molecular Defects in a Human Immunoglobulin κ Chain Deficiency: J. Stavnezer-Nordgren, O. Kekish, B. J. M. Zegers ........................................ 458
Patterns of Growth Hormone-Releasing Factor and Somatostatin Secretion into the Hypophysial-Portal Circulation of the Rat: P. M. Plotsky and W. Vale .................. 461

PRODUCTS AND MATERIALS

Stills; Chromatography Vials; Fluid Dynamics; Microscope; Software for Molecular Biology; Microcarrier Beads; Vibration-Free Table; Literature ....... 464

COVER

Sediment plume of the Mississippi River as it disperses into the Gulf of Mexico, seaward of Southwest Pass. The lower river carries about 5 tons of suspended sediment per second, providing abundant sites for uptake and transport of contaminants. Recent data support a decrease in the lead burden of the river. See page 439. [Nenad Iricanin, Department of Oceanography and Ocean Engineering, Florida Institute of Technology, Melbourne 32901]
