AAAS NEWS
Science 85 Celebrates Sixth Anniversary; AAAS Special Events at Chicago
AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Museum of Science and Industry; To Members in Chemistry and Physics; Portrait of First President to Hang at Association Headquarters; Volume Addresses Scientific Communication and National Security; Obituaries; Reminders for Members ................................................................. 532

BOOK REVIEWS

The Great Inertia, reviewed by J. B. Henderson; Coastal Geomorphology in Australia, P. D. Komar; Social Stigma, T. F. Pettigrew; Some Other Books of Interest; Books Received ................................................................. 534

REPORTS

Time-Transgressive Late Cenozoic Radiolarian Events of the Equatorial Indo-Pacific: D. A. Johnson and C. A. Nigrini ................................................................. 538
Transposon Tagging to Detect a Latent Virus in Myxococcus xanthus: T. Starich, P. Cordes, J. Zissler ................................................................. 541
Vision Guides the Adjustment of Auditory Localization in Young Barn Owls: E. I. Knudsen and P. F. Knudsen ................................................................. 545
A Plasmodium falciparum Antigen That Binds to Host Erythrocytes and Merozoites: D. Camus and T. J. Hadley ................................................................. 553
Coronary Vasocostriction Effects of Atriopeptin II: R. D. Wangler et al. ................................................................. 558
Selective Sparing of a Class of Striatal Neurons in Huntington’s Disease: R. J. Ferrante et al. ................................................................. 561
The 36-Kilodalton Substrate of pp60v-src Is Myristylated in a Transformation-Sensitive Manner: J. Soric and J. A. Gordon ................................................................. 563
Ambient Levels of Ozone Reduce Net Photosynthesis in Tree and Crop Species: P. B. Reich and R. G. Amundson ................................................................. 566
Functional Relation Between HTLV-II x and Adenovirus E1A Proteins in Transcriptional Activation: I. S. Y. Chen, A. J. Cann, N. P. Shah, R. B. Gaynor ................................................................. 570

COVER

Barn owl (Tyto alba) moments before it strikes a mouse located beside the lens of the camera. This nocturnal hunter depends on its keen sense of hearing to locate prey in the dark. Young barn owls use vision to adjust their auditory localization accuracy. See page 545. [Eric I. Knudsen, Stanford University School of Medicine, Stanford, California 94305]
