This Week in Science .............................. 875

LETTERS

The Temik Story: R. C. Back; K. S. Porter; E. Marshall; Breast Cancer: Adjuvant Chemotherapy: J. Russo; The Space Test Program: H. Gursky ............................. 885

EDITORIAL

Computers and Interdisciplinary Research .................................................. 893

ARTICLES

Resource Availability and Plant Antiherbivore Defense: P. D. Coley, J. P. Bryant, F. S. Chapin, III .......................................................... 895

Stochastic Cooling and the Accumulation of Antiprotons: S. van der Meer ........ 900

Control of Directionality in Lambda Site Specific Recombination: W. Bushman, J. F. Thompson, L. Vargas, A. Landy ........................................ 906

Cell-Specific Expression of the Rat Insulin Gene: Evidence for Role of Two Distinct 5' Flanking Elements: T. Edlund, M. D. Walker, P. J. Barr, W. J. Rutter ........................................ 912

NEWS AND COMMENT

Fallout from the Trade War in Chips .......................................................... 917

San Joaquin Flooded with Water Researchers .............................................. 920

Archeology Congress Threatened ............................................................. 921

Lab Officials Squabble Over X-ray Laser ................................................ 923

Briefing: More Pork Barrel in DOD Research Initiative; European Nations Agree on Eureka Charter; Outside Review Urged for Waste Site Study; Academy Receives Gift for West Coast Center; Administration Drafts Biotech Plan for OECD ............................................. 924

New Momentum for Drug Export Bill ...................................................... 926

RESEARCH NEWS

Bell Labs Generates Squeezed Light .......................................................... 927
Finding Biological Clocks in Fetuses .................................................. 929

BOOK REVIEWS

Culture and the Evolutionary Process, reviewed by H. Harpending; Early Ceremonial Architecture in the Andes, J. Quilter; Habitat Selection in Birds, R. J. O’Connor; Some Other Books of Interest; Books Received ........................................ 931

REPORTS

A Striking Nitrogen Isotope Anomaly in the Bencubbin and Weatherford Meteorites: C. A. Prombo and R. N. Clayton .................................................. 935

Crystal Axes in Recent and Fossil Adult Echinoids Indicate Trophic Mode in Larval Development: R. B. Emlet .................................................. 937

Recombinant Human Tumor Necrosis Factor-α: Effects on Proliferation of Normal and Transformed Cells in Vitro: B. J. Sugarman et al. ............................ 943

Projective Imaging of Pulsatile Flow with Magnetic Resonance: V. J. Wedeen et al. .................................................................................. 946

Genomic Heterogeneity of AIDS Retroviral Isolates from North America and Zaire: S. Benn et al. .......................................................... 949

Association of Crossover Points with Topoisomerase I Cleavage Sites: A Model for Nonhomologous Recombination: P. Bullock, J. J. Champoux, M. Botchan .......................................................... 954

Secretion of a Bacterial Cellulase by Yeast: N. Skipper et al. ............... 958

Technical Comments: Neuroendocrine Response to Estrogen and Sexual Orientation: M. J. Baum, R. S. Carroll, M. S. Erskine, S. A. Tobet; B. A. Gladue .......................................................... 960

PRODUCTS AND MATERIALS

Vector Facility; Optical Fiber; Gamma Counter; Chromatography Data System; Spectrophotometry Software; Complementary DNA Synthesis; Incubator-Shaker; Literature .......................................................... 962

African Green monkey (Cercopithecus aethiops), small primate found throughout most of sub-Saharan Africa. This animal is now known to be naturally infected with a virus related to the AIDS virus of humans (HTLV-III/LAV), designated simian T-lymphotropic virus type III (STLV-IIIAGM). It is postulated that the human AIDS virus in Africa may have arisen from this group of simian retroviruses. See page 951. [Stessen Casteel/FPG]
