SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Copyright © 1986 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $50. Domestic institutional subscription (51 issues): $85. Foreign postage extra: Canada $24, other (surface mail) $27, air-survice via Amsterdam $65. First class, airmall, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $4 ($4.50 by mail); biotechnology issue, $5.50 ($6 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the Fair Use provisions of the Copyright Act is granted to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress St., Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
480 What Perturbs the γ and δ Rings of Uranus?: R. G. FRENCH, J. A. KANGAS, J. L. ELLIOT

483 Model for the Intrusion of Batholiths Associated with the Eruption of Large-Volume Ash-Flow Tuffs: J. A. WHITNEY and J. C. STORMER, JR.

488 Indirect Observation by 13C NMR Spectroscopy of a Novel CO2 Fixation Pathway in Methanogens: J. N. S. EVANS, C. J. TOLMAN, M. F. ROBERTS

491 Genetic Control of Melatonin Synthesis in the Pineal Gland of the Mouse: S. EBISHARA, T. MARKS, D. J. HUDSON, M. MENAKER

493 Bacterial Grazing by Planktonic Lake Algae: D. F. BIRD and J. KALFF

495 Diet-Induced Head Allometry Among Foliage-Chewing Insects and Its Importance for Graminivores: E. A. BERNAY

497 Presence of Nonoxidative Ethanol Metabolism in Human Organs Commonly Damaged by Ethanol Abuse: E. A. LAPOSATA and L. G. LANGE

499 Optical Image Quality and the Cone Mosaic: A. W. SNYDER, T. R. J. BOSMAJIAN, A. HUGHES

503 Philadelphia: Where It All Began

504 Counsels of War, reviewed by G. A. GREB Science versus Practice, C. MEINEL Black Scientists, White Society, and Colorless Science, C. B. MARRETT Prehistory of the Eastern Arctic, W. W. FITZHUGH Books Received

31 JANUARY 1986

Cover

East Amatuli Island, one of the Barren Islands in the northern part of the Gulf of Alaska, is home to several hundred thousand fork-tailed storm petrels that return to the island only at night. Regional water quality can be monitored by collecting storm-petrel regurgitate and analyzing it for the presence or absence of fossil fuel hydrocarbons. See page 373. [P. Deboersma, Institute for Environmental Studies, University of Washington, Seattle 98195]
