**SCIENCE** is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1535 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484480) paid at Washington, DC, and at an additional entry. Now combined with The Scientific Monthly® Copyright © 1986 by the American Association for the Advancement of Science. Domestic individual membership and subscription ($1 issues): $90. Domestic institutional subscription ($1 issues): $96. Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via air mail $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $4 ($4.50 by mail); Biotechnology issue, $5.50 ($6 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/86 $1 + .10. Postmaster: Send Form 3579 to: Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Cover  Computer display of two introductory physics simulations—an orbiting satellite around two fixed planets and equipotential field lines surrounding charged conductors—used by students at Carnegie-Mellon University. Such displays are made possible by "Andrew," experimental software being developed at Carnegie-Mellon's integrated personal computing environment for educational computing. See page 935. [Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213]

Reports
979 Evolution of the Ratio of Strontium-87 to Strontium-86 in Seawater from Cretaceous to Present: J. Hess, M. L. Bender, J.-G. Schilling
995 Parvalbumin in Most γ-Aminobutyric Acid–Containing Neurons of the Rat Cerebral Cortex: M. R. Celio
999 Hyperacuity in Cat Retinal Ganglion Cells: R. Shapley and J. Victor

AAAS Meetings
1014 R&D Colloquium: R&D and the Budget Crisis • Annual Meeting: Preliminary Program, II; Advance Registration Form

Book Reviews
1021 The Great American Biotic Interchange, reviewed by M. J. Novacek • Physical Meteorology, M. Neiburger • Cerebral Lateralization in Nonhuman Species, M. C. Corballis • Books Received

Products & Materials
1024 HPLC Gradient Module • Large-Scale HPLC • Laboratory Robotics • Characterization of Catalysts • Multichannel Analyzer for Nuclear Spectroscopy • Evaporometer • Microwave Digestion System • Computer-Simulated HPLC • Infrared Spectrometer

Board of Directors
David A. Hamburg
Retiring President, Chairman
Gerard Piel
President
Lawrence Bogorad
