*The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.*
COVER  The combined red and blue beams from the two-color laser geodimeter travel across the south most of the Long Valley caldera (California) during measurements of geodetic baselines established to monitor crustal deformation. The city of Mammoth Lakes lies in the foreground with the Ritter Range of the Sierra Nevada forming the skyline. See page 213. [Peter Bozek, U.S. Geological Survey, Menlo Park, CA 94025]
