213 Decrease in Deformation Rate Observed by Two-Color Laser Ranging in Long Valley Caldera: M. F. Linker, J. O. Langbein, A. McGarr
The combined red and blue beams from the two-color laser geodimeter travel across the southmost of the Long Valley caldera (California) during measurements of geodetic baselines established to monitor crustal deformation. The city of Mammoth Lakes lies in the foreground with the Ritter Range of the Sierra Nevada forming the skyline. See page 213. [Peter Bozek, U.S. Geological Survey, Menlo Park, CA 94025]
