■ The American Association for the Advancement of Science was founded in 1948 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

**COVER** Image of comet P/Giacobini-Zinner taken 22 August 1985, 0934 U.T., using the Catalina 154-cm telescope of the University of Arizona Observatories. It is taken with a Charge Coupled Device (CCD) electronic camera using a visual (V) filter (center wavelength 5500 angstroms). The exposure time was 1 minute and the field of view of the picture is roughly 8 minutes of arc. See page 353.
