613 Fine Structure Genetic Analysis of a β-Globin Promoter: R. M. Myers, K. Tilly, T. Maniatis

Reports
626 Reduction in Summer Soil Wetness Induced by an Increase in Atmospheric Carbon Dioxide: S. Manabe and R. T. Wetherald
The open ocean is a potential source of cobalt, a strategic metal. Cobalt-rich ferromanganese crusts on the floor of the huge, new United States Exclusive Economic Zone are attracting interest as a potential mineral resource. See page 600.
