This Week in Science

1311 The Biotechnology Issue

1313 Behavioral Sciences: Benign Neglect? I. L. Horowitz • Methylene: Experiment and Theory: E. Wasserman; H. F. Schaefer III • Royal Greenwich Observatory: M. Pennson

News & Comment

1331 Hazy Picture of Chernobyl Emerging • Soviets Buy Robots

1333 AAAS Meeting Briefings: Researchers Found Reluctant to Test Theories • MIT President Attacks Federal Research Priorities • U.S. Official Defends SALT II Decision

1334 IOM Elects New Members

1335 After Challenger: Painful Choices

1338 Soviet, U.S. Scientists Reach Seismic Agreement

1339 Briefing: Litigation Causes Huge Price Increases in Childhood Vaccines • Space Commission Sets Goals for 21st Century • Field Test of Altered Microbe Still in Limbo • • • While First Outdoor Test of Engineered Plant Begins • Ariane Failure Hits Europe's Space Efforts

Research News

1341 Nerve Growth Factor Acts in the Brain

1343 The New Look of Halley Is Black and Lumpy

1344 Steroids May Influence Changes in Mood

1345 Briefing: The Ocean's Deserts Are Blooming

Articles

1361 Biotechnology Issue

1361 University-Industry Research Relationships in Biotechnology: Implications for the University: D. Blumenthal, M. Gluck, K. S. Louis, M. A. Stoto, D. Wise

1367 Biotechnology in Europe: M. D. Dibner

1373 The Application of Bone Marrow Transplantation to the Treatment of Genetic Diseases: R. Parkman

1379 Lesser-Known Plants of Potential Use in Agriculture and Forestry: N. D. Vietmeier

1385 Rapid-Cycling Populations of Brassica: P. H. Williams and C. B. Hill

1390 Large-Scale Cell Culture in Biotechnology: W. R. Arathoon and J. R. Birch

SCIENCE is published weekly on Friday, except the last week in December, and with a plus issue in May by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with The Scientific Monthly® Copyright © 1986 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $65. Domestic institutional subscription (51 issues): $88. Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $4 ($4.50 by mail); Biotechnology issue, $5.50 ($6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments $16 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $.10 per page is paid directly to CCC; 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Two sides of biotechnology. (Background) Large-scale cell culture has become a multimillion dollar industry, vital to the manufacture of vaccines, monoclonal antibodies, and other pharmaceutical products [1000-liter fermenter, courtesy of Coll-tec Ltd., Slough SL1 4DX, United Kingdom]. (Foreground) By selective breeding in the laboratory, rapid-cycling Brasica campestris plants have been developed that will be useful in basic research, in improving crop production, and as educational tools. See page 1385. [Paul H. Williams, University of Wisconsin, Madison, WI 53706]
