1311 This Week in Science

Editorial

1313 The Biotechnology Issue

Letters

1319 Behavioral Sciences: Benign Neglect?: I. L. HOROWITZ • Methylene: Experiment and Theory: E. WASSERMAN; H. F. SCHAERER III • Royal Greenwich Observatory: M. PEnston

News & Comment

1331 Hazy Picture of Chernobyl Emerging • Soviets Buy Robots
1333 AAAS Meeting Briefings: Researchers Found Reluctant to Test Theories • MIT President Attacks Federal Research Priorities • U.S. Official Defends SALT II Decision
1334 IOM Elects New Members
1335 After Challenger: Painful Choices
1338 Soviet, U.S. Scientists Reach Seismic Agreement
1339 Briefing: Litigation Causes Huge Price Increases in Childhood Vaccines • Space Commission Sets Goals for 21st Century • Field Test of Altered Microbe Still in Limbo . . . • • • While First Outdoor Test of Engineered Plant Begins • Ariane Failure Hits Europe's Space Efforts

Research News

1341 Nerve Growth Factor Acts in the Brain
1343 The New Look of Halley Is Black and Lumpy
1344 Steroids May Influence Changes in Mood
1345 Briefing: The Ocean's Deserts Are Blooming

Articles

Biotechnology Issue

1361 University-Industry Research Relationships in Biotechnology: Implications for the University: D. BLUMENTHAL, M. GLUCK, K. S. LOUIS, M. A. SOTO, D. WISE
1367 Biotechnology in Europe: M. D. DINNER
1373 The Application of Bone Marrow Transplantation to the Treatment of Genetic Diseases: R. PARKMAN
1379 Lesser-Known Plants of Potential Use in Agriculture and Forestry: N. D. VIETMEYER
1385 Rapid-Cycling Populations of Brassica: P. H. WILLIAMS and C. B. HILL
1390 Large-Scale Cell Culture in Biotechnology: W. R. ARATHOON and J. R. BIRCH

SCIENCE is published weekly on Friday, except the last week in December, and with a plus issue in May by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484465) paid at Washington, DC, and at an additional entry. New combined with The Scientific Monthly® Copyright © 1986 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $65; Domestic institutional subscription (51 issues): $88; Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $4 ($5.50 by mail); Biotechnology issue, $5.50 ($6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments $16 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Two sides of biotechnology. (Background) Large-scale cell culture has become a multimillion dollar industry, vital to the manufacture of vaccines, monoclonal antibodies, and other pharmaceutical products [1000-liter fermenter, courtesy of Celltech Ltd., Slough SL1 4DX, United Kingdom]. (Foreground) By selective breeding in the laboratory, rapid-cycling B. campestris plants have been developed that will be useful in basic research, in improving crop production, and as educational tools. See page 1385. [Paul H. Williams, University of Wisconsin, Madison, WI 53706]  

1396 Scaling Up an Immobilized Enzyme System: H. H. WEETALL and W. H. PITCHER, JR.

1404 High-Pressure Ruby and Diamond Fluorescence: Observations at 0.21 to 0.55 Terapascal: J. A. Xu, H. K. MAO, P. M. BELL

1408 Methylcyclopentanoid Monoterpenoids Mediate Interactions Among Insect Herbivores: M. J. RAUPP, F. R. MILAN, F. BARBOSA, B. A. LEONHARDT

1410 Binding of the Sp1 Transcription Factor by the Human Harvey ras Proto-oncogene Promoter: S. ISHII, T. KADONAGA, R. TJIAN, J. N. BRADY, G. T. MERLINO, I. PASTAN

1415 Identification of a Missense Mutation in the Factor VIII Gene of a Mild Hemophilia: J. GITSCHIER, W. I. WOOD, M. A. SHUMAN, R. M. LAWN

1417 Oxytocin Secretion in Response to Cholecystokinin and Food: Differentiation of Nausea from Satiety: J. G. VERBALIS, M. J. MCCANN, C. M. MCHALE, E. M. STRICKER

1419 Synthetic Diamond as a Pressure Generator: A. ONODERA, K. FURUNO, S. YAZU

1421 Laser-Induced Alteration of Collagen Substructure Allows Microsurgical Tissue Welding: R. SCHOBER, F. ULRICH, T. SANDER, H. DURSELEN, S. HESSEL

1423 Production of Immunoglobulin Isotypes by Ly-1+ B Cells in Viable Motheaten and Normal Mice: C. L. SIDMAN, L. D. SHULTZ, R. R. HARDY, K. HAYAKAWA, L. A. HERZENBERG

1449 Research Microscope ■ Optical Accessory ■ Automated DNA Synthesizer ■ Scientific Digitizing and Measurement ■ Information for Chemists ■ Literature
