1583 This Week in Science

Editorial
1585 Dealing in Hot Property

Letters

News & Comment
1589 Grim Projections for AIDS Epidemic
1590 Mobile Missile Design Generates Controversy • A Scheme to Attract Missiles and Deter an Attack
1593 Oil Industry R&D Takes a Fall
1594 Federal VDT Study Finally Wins Approval
1595 Briefing: High Court Says No to Administration's Baby Doe Rules • Feynman Issues His Own Shuttle Report, Attacking NASA's Risk Estimates • Cancer Deaths Probed at Pasteur Institute • Chilean, U.S. Scientists Given AAAS Awards • U.S.–China Exchanges Accentuate Sciences

Research News
1598 Proposal to Sequence the Human Genome Stirs Debate • DNA Databases Are Swamped
1601 Snarls from the Cosmic String in Leo
1602 Geophysical Briefings: Antarctic Ozone Hole Is Still Deepening • Nevado del Ruiz Repeats Itself • Thin-Skin Tectonics Is Getting Thinner • The Most Complex Magnetic Field
1604 Briefing: Predicted El Niño Failing to Show • Plant Biochemistry Requires Unique tRNA

Articles
1607 Tenuous Structures from Disorderly Growth Processes: T. A. Witten and M. E. Cates
1612 Mechanisms of Memory: L. R. Squire

Reports
1620 Internal Mixture of Sea Salt, Silicates, and Excess Sulfate in Marine Aerosols: M. O. Andreae, R. J. Charlson, F. Bruyneels, H. Storms, R. Van Grieken, W. Maenhaut
1623 Atmospheric Trace Gases: Trends and Distributions Over the Last Decade: R. A. Rasmussen and M. A. K. Khalil
27 JUNE 1986

Cover: Natural populations of wild radish (*Raphanus raphanistrum*) frequently contain a genetic polymorphism for flower color. The recessive yellow morphs are more attractive to pollinators than are the white morphs. The increased attractiveness results in more pollen from yellow-flowered individuals being spread among other plants in the population. Consequently, the fitness of the yellow plants is enhanced. See page 1625. [Allison A. Snow, Department of Botany, University of California, Davis, CA 95616]

1625 Floral Evolution: Attractiveness to Pollinators Increases Male Fitness: M. L. Stanton, A. A. Snow, S. N. Handel

1627 Acetylcholine Receptor Synthesis in Retina and Transport to Optic Tectum in Goldfish: J. M. Henley, J. M. Lindstrom, R. E. Oswald

1629 Aminoguanidine Prevents Diabetes-Induced Arterial Wall Protein Cross-Linking: M. Brownlee, H. Vlassara, A. Kooney, P. Ulrich, A. Cerami

1632 High Resolution of Mouse Chromosomes: Banding Conservation Between Man and Mouse: J. R. Sawyer and J. C. Hozier

1635 Viral Shedding and Transmission Between Hosts Determined by Reovirus L2 Gene: M. Keroack and B. N. Fields

1638 Suppression of Neurite Elongation and Growth Cone Motility by Electrical Activity: C. S. Cohen and S. B. Kater

1641 Expression and Cell Type—Specific Processing of Human Preproenkephalin with a Vaccinia Recombinant: G. Thomas, E. Herbert, D. E. Hruby

1646 Different Mutations in Ashkenazi Jewish and Non-Jewish French Canadians with Tay-Sachs Disease: R. Myerowitz and N. D. Hogikyan

1648 An Apical-Membrane Chloride Channel in Human Tracheal Epithelium: M. J. Welsh

Book Reviews

1651 Willis R. Whitney, General Electric, and the Origins of U.S. Industrial Research and The Making of American Industrial Research, reviewed by J. E. Brittain • Geology and Radwaste, W. S. Frye • The Ecology of Rocky Coasts, R. S. Steneck • Some Other Books of Interest • Books Received

Products & Materials

1655 Software for Chemists • Superminicomputers • Isolated Physiological Stimulator • Vibration Isolation for NMR Spectrometers • Ultraviolet-Visible Spectrophotometer • Parallel Multicomputers

Author Index for Volume 232 is found on pages I–X

Information for Contributors is found on pages XI–XII
