## Articles

### *Science in Japan*

291 Technological Diversification of Japanese Industry: F. KODAMA

296 Japanese Research and Technology Policy: L. LYNN

301 Japanese Competitiveness and Japanese Management: S. MINABE

305 Studies and Perspectives of Protein Kinase C: Y. NISHIZUKA

312 Studies on Environmental Chemical Carcinogenesis in Japan: T. SUGIMURA

318 Organic Synthesis in Japan: From Natural Products to Synthetic Control: T. MUKAIYAMA

324 Recent Earthquake Prediction Research in Japan: K. MOGI

330 Brownian Motion and Nonequilibrium Statistical Mechanics: R. KUBO

334 Evolution of Meson Science in Japan: T. YAMAZAKI

■ **SCIENCE** is published weekly on Friday, except the last week in December, and with a plus issue in May by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with **The Scientific Monthly**® Copyright © 1986 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): \$65. Domestic institutional subscription (51 issues): \$98. Foreign postage extra: Canada \$24, other (surface mail) \$27, air-surface via Amsterdam \$65. First class, airmail, school-year, and student rates on request. Single copies \$2.50 (\$3 by mail); back issues \$4 (\$4.50 by mail); Biotechnology issue, \$5.50 (\$6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments \$16 (\$17 by mail). **Change of address:** allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1 per copy plus \$0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for *Science* is 0036-8075/83 \$1 + .10. **Postmaster:** Send Form 3579 to *Science*, 1333 H Street, NW, Washington, DC 20005. *Science* is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.

■ The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

**COVER** Traditional Japan, symbolized by this view of Nara's Muroji Temple, provides the cultural and social backdrop to the modern vigorous practice of science, technology, and economics that is emphasized in this special issue on Science in Japan. ## Reports

- 339 Iridium Abundances Across the Ordovician-Silurian Stratotype: P. WILDE, W. B. N. BERRY, M. S. QUINBY-HUNT, C. J. ORTH, L. R. QUINTANA, J. S. GILMORE
- 341 Melittin-Like Peptides from the Shark-Repelling Defense Secretion of the Sole *Pardachirus pavoninus*: S. A. THOMPSON, K. TACHIBANA, K. NAKANISHI, I. KUBOTA
- 343 Isolation of a New Human Retrovirus from West African Patients with AIDS: F. CLAVEL, D. GUÉTARD, F. BRUN-VÉZINET, S. CHAMARET, M.-A. REY, M. O. SANTOS-FERREIRA, A. G. LAURENT, C. DAUGUET, C. KATLAMA *et al.*
- 347 Studies of the Human *c-myb* Gene and Its Product in Human Acute Leukemias: D. J. SLAMON, T. C. BOONE, D. C. MURDOCK, D. E. KEITH, M. F. PRESS, R. A. LARSON, L. M. SOUZA
- 351 Structure, Antigenic Determinants of Some Clinically Important Insect Allergens: Chironomid Hemoglobins: X. BAUR, H. ASCHAUER, G. MAZUR, M. DEWAIR, H. PRELICZ, W. STEIGEMANN
- 354 Differential Reflex Activity Determines Claw and Closer Muscle Asymmetry in Developing Lobsters: C. K. GOVIND and J. PEARCE
- 356 Interferon Inhibits the Establishment of Competence in  $G_0/S$ -Phase Transition: S. L. LIN, T. KIKUCHI, W. J. PLEDGER, I. TAMM
- 359 Temperature Regulation of Bacterial Activity During the Spring Bloom in Newfoundland Coastal Waters: L. R. POMEROY and D. DEIBEL
- 361 Functional Differences Between Two Classes of Sodium Channels in Developing Rat Skeletal Muscle: R. E. WEISS and R. HORN
- 364 Human Prion Protein cDNA: Molecular Cloning, Chromosomal Mapping, and Biological Implications: Y.-C. J. LIAO, R. V. LEBE, G. A. CLAWSON, E. A. SMUCKLER

## Book Reviews

- 371 A Century of Controversy, *reviewed by* M. EBIHARA ■ Quaternary Evolution of the Great Lakes, J. A. ELSON ■ Birth and Evolution of Massive Stars and Stellar Groups, W. M. BRUNISH ■ History of British Space Science, D. H. DEVORKIN ■ Books Received

## Products & Materials

- 374 Mass Monitor ■ Submicron Particle Analyzer ■ Computer Interface for Physiological and Behavioral Instruments ■ Nonradioactive Nucleic Acid Detection ■ Scanning Electron Microscope ■ Literature

## American Association for the Advancement of Science

*Science* serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

**Publisher:** William D. Carey

**Editor:** Daniel E. Koshland, Jr.

**Deputy Editors:** Philip H. Abelson (*Engineering and Applied Sciences*); John I. Brauman (*Physical Sciences*); Gardner Lindzey (*Social Sciences*)

## EDITORIAL STAFF

**Managing Editor:** Patricia A. Morgan

**Assistant Managing Editors:** Nancy J. Hartnagel, John E. Ringle

**Senior Editors:** Eleanore Butz, Lawrence I. Grossman, Ruth Kulstad

**Associate Editors:** Martha Collins, Barbara Jasny, Katrina L. Kelner, Edith Meyers

**Letters Editor:** Christine Gilbert

**Book Reviews:** Katherine Livingston, *editor*

**This Week in Science:** Ruth Levy Guyer

**Chief Production Editor:** Ellen E. Murphy

**Editing Department:** Lois Schmitt, *head*; Caitilin Gordon, Mary McDaniel, Barbara E. Patterson

**Copy Desk:** Isabella Bouldin, *chief*; Lyle L. Green, Sharon Ryan, Beverly Shields, Anna Victoreen

**Production Manager:** Karen Schools

**Graphics and Production:** John Baker, *assistant manager*; Holly Bishop, Kathleen Cosimano, Eleanor Warner

**Covers Editor:** Grayce Finger

**Manuscript Systems Analyst:** William Carter

## NEWS STAFF

**News Editor:** Barbara J. Culliton

**News and Comment:** Colin Norman, *deputy editor*; Mark H. Crawford, Constance Holden, Eliot Marshall, R. Jeffrey Smith, Marjorie Sun, John Walsh

**Research News:** Roger Lewin, *deputy editor*; Deborah M. Barnes, Richard A. Kerr, Gina Kolata, Jean L. Marx, Arthur L. Robinson, M. Mitchell Waldrop

**European Correspondent:** David Dickson

## BUSINESS STAFF

**Associate Publisher:** William M. Miller, III

**Business Staff Supervisor:** Deborah Rivera-Wienhold

**Associate Business Supervisor:** Leo Lewis

**Membership Recruitment:** Gwendolyn Huddle

**Member and Subscription Records:** Ann Ragland

**Guide to Biotechnology Products and Instruments Editor:** Richard G. Sommer

## ADVERTISING REPRESENTATIVES

**Director:** Earl J. Scherago

**Production Manager:** Donna Rivera

**Advertising Sales Manager:** Richard L. Charles

**Marketing Manager:** Herbert L. Burkland

**Sales:** New York, NY 10036: J. Kevin Henebry, 1515 Broadway (212-730-1050); Scotch Plains, NJ 07076: C. Richard Callis, 12 Unami Lane (201-889-4873); Chicago, IL 60611: Jack Ryan, Room 2107, 919 N. Michigan Ave. (312-337-4973); Beverly Hills, CA 90211: Winn Nance, 111 N. La Cienega Blvd. (213-657-2772); San Jose, CA 95112: Bob Brindley, 310 S. 16 St. (408-998-4690); Dorset, VT 05251: Fred W. Dieffenbach, Kent Hill Rd. (802-867-5581).

Instructions for contributors appears on page xi of the 27 June 1986 issue. Editorial correspondence, including requests for permission to reprint and reprint orders, should be sent to 1333 H Street, NW, Washington, DC 20005. Telephone: 202-326-6500.

Advertising correspondence should be sent to Tenth Floor, 1515 Broadway, NY 10036. Telephone 212-730-1050.

## Science in Japan: A Status Report

The nations of the world are saying, "We have seen the future, and it is Japan." A combination of awe, fear, and respect has been earned by a country whose history is as amazing as its present achievements. A nation with half the population of the United States occupies an area about the size of the state of Montana, but more than 80 percent is inhospitably mountainous. Japan imports most of its raw materials, almost all of its iron ore and petroleum, and all of its rubber, wool, and cotton. Yet it has one of the highest literacy rates and school attendance rates and one of the lowest crime rates among the developed countries.

How has this success story been achieved? The envious hypothesize that it is a combination of low-wage rates, willingness to emphasize application at the expense of innovation, and centuries of tradition that have taught docility and loyalty to the population. Admirers say that it is a combination of realistic appraisals, exemplary discipline, and imaginative policies. The readers of this issue of *Science* will find that Japan today has mixed these qualities in a way that is perhaps even more amazing than the simplistic paradigm of either extreme. Those who would like to believe the low-wage-docile-worker explanation had better read the story by Constance Holden on the Toyota-General Motors automobile plant. There, American workers on American soil are responding to Japanese management techniques in ways that are bound to revolutionize that industry. Those who would like to believe the all-they-do-is-imitate myth should read the lead articles by the world-renowned Japanese investigators Fumio Kodama, Ryogo Kubo, Shigeo Minabe, Kiyoo Mogi, Teruaki Mukaiyama, Yasutomi Nishizuka, Takashi Sugimura, and Toshimitsu Yamazaki. They represent the many Japanese scholars now doing pioneering work and making fundamental contributions to basic research across the spectrum of science from mathematics to the social sciences.

Perhaps even more impressive than the successes already achieved is that this nation, which learned early in its history that it would have to live by its wits, is even now reexamining the operation of its most venerable institutions, as Eliot Marshall reports. The school system, which on the basis of statistics might be assumed to be sacrosanct, is being reappraised by Japanese authorities because some believe more freedom and creativity are needed if it is to serve as the base for the increased innovation in the future. While recognizing the important historical value of imitation and applied science, Japan's current leaders are examining the need for a heavier emphasis on basic research. Articles by Mark Crawford and Leonard Lynn describe the economic and industrial changes that will be required to adjust to a global economy and a saturated Japanese market.

As a modern phenomenon this story is astonishing. As an extension of history it is perhaps less so, for Japan has had a legacy of adaptability. Its closed society in the 1800's responded to its clash with Western aggression by determining to learn from it. The Meiji emperor, with the help of a far-sighted group of native leaders, sent emissaries to the United States and to Europe to follow the principles of *Wakon-yosai*, the adaptation of Western concepts to fit into a Japanese cultural framework. Even earlier in its history this same nation had profited by the philosophy of *Wakon-Kansai*, the conversion of Chinese learning into Japanese values. In more recent years Japan embarked on a militaristic phase but recovered from that ill-fated period to develop a society with no significant armed forces at all. Its present leaders are already planning to modify possibly the world's most successful industrial society to prepare for the changes predicted for the 21st century.

It is a noteworthy and rare human being who is highly disciplined and yet readily adaptable to change. It is astonishing when a nation is capable of being introspective, rational, and decisive. If Japan were perfect for this instant in time, we would admire it as a rare, artistic creation of beautiful glass sculpture whose fragility would be vulnerable to future shock. That it is less than perfect, yet constantly willing to examine its imperfections and act on them, means that it is made of a metal that will last for ages. No one magazine issue—in fact, no book—can analyze comprehensively the phenomenon of modern Japan, but readers of this issue will be able to infer on reasons for its past accomplishments and will be able to recognize some of the seeds of future greatness.—DANIEL E. KOSHLAND, JR.
