This Week in Science

257 Surfaces

261 Cleanup of the Savannah River Plant: E. J. Hennelly; E. Marshall
Treatment of Depression: R. L. Anderson; Mazel Tov!: S. A. Ockner
Cretaceous Extinctions and Wildfires: E. Argyle; S. M. Cisowski and
M. Fuller; C. B. Officer and A. A. Ekdale; E. Anders, W. S. Wolbach,
R. S. Lewis

275 Regulatory Tangle Snarls Agricultural Research in the Biotechnology Arena

277 California to Vote on AIDS Proposition

279 NASA Announces a New Schedule for the Shuttle

280 Briefing: Mosher Sues Stanford; AAU Praises New Version of A-21 Rules
OECD Urges Case-by-Case Review for Releasing Engineered Organisms
Dispute Over Earthquake Engineering Center Grant Aired on Capitol Hill
Counting the Homeless; Comings and Goings; Orlov Hopes to Continue
Scientific, Human Rights Work in His Life Here

283 Mapping Orbital Effects on Climate

284 Briefing: OTA Touts Advanced Structural Materials

285 Egg Laying Is for the Birds

286 How Cells Respond to Signals: Expanding Roles for G Proteins; Ion Channels:
Multiple Forms of Regulation; Inositol Phospholipid Metabolism and Calcium
Regulation; Novel Role Proposed for Insulin Action

252

Instrumentation and Surface Science

304 Quantum States and Atomic Structure of Silicon Surfaces: R. M. Tromp,
R. J. Hamers, J. E. Demuth

310 Atomic Arrangements at Metal Surfaces: J. R. Noonan and H. L. Davis

316 Electron- and Photon-Stimulated Desorption: Probes of Structure and Bonding
at Surfaces: T. E. Madey

327 Low-Energy Atom Scattering from Surfaces: T. Engel

333 Polarized Electron Probes of Magnetic Surfaces: R. J. Celotta
and D. T. Pierce

340 Corrosion of Electronic Materials and Devices: R. B. Comizzoli,
R. F. Frankenthal, P. C. Milner, J. D. Sinclair

SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in May by
the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-
class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with The Sci-
etific Monthly. Copyright 1996 by the American Association for the Advancement of Science. The title SCIENCE is
a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $65. Domestic insti-
tutional subscription (51 issues): $98. Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via
Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back is-
sues $4 ($4.50 by mail); Biotechnology issue, $5.50 ($6 by mail); classroom rates on request; Guide to Biotechnology
Products and Instruments $16 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and
seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not
falling within the fair use provisions of the Copyright Act is granted to AAAS to libraries and other users registered with
the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus
$0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for
Science is 0036-8075/86 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC
20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are
to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility,
to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and ap-
preciation of the importance and promise of the methods of science in human progress.
The magnetic domains on the surface of an Fe–3% Si crystal as observed using the technique of scanning electron microscopy with polarization analysis. The four colors indicate four possible domain orientations corresponding to the four in-plane, easy axes of magnetization of the cubic lattice. See page 333.
