**SCIENCE** is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with *The Scientific Monthly*, Copyright © 1987 by the American Association for the Advancement of Science. The title **SCIENCE** is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $66. Domestic institutional subscription (51 issues): $98. Foreign postage extra: Canada $32, other (surface mail) $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $4 ($4.50 by mail); Biotechnology issue, $5.50 ($6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments $16 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC; 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Triassic sandstone and shale in valley northeast of Ulugh Muztagh, the peak on the horizon and behind the glacier in the middle ground. Note rounded topography near the glacier where Triassic sandstone, siltstone, and shale crop out and the steep topography of the mountain where metamorphic equivalents of these Triassic rocks are more resistant to erosion. See page 299 [Peter Molnar, Massachusetts Institute of Technology, Cambridge, MA 02139]

328 A Subset of Yeast snRNA's Contains Functional Binding Sites for the Highly Conserved Sm Antigen: N. Riedel, S. Wolin, C. Guthrie

331 Lunar-Molulated Geomagnetic Orientation by a Marine Mollusk: K. J. Lohmann and A. O. D. Willows

334 Myosin Rod Phosphorylation and the Catch State of Molluscan Muscles: L. Castellani and C. Cohen

337 Slow Transport of Tubulin in the Neurites of Differentiated PC12 Cells: C. H. Keith

340 Cytosolic Acidification as an Early Transductory Signal of Human Neutrophil Chemotaxis: I. Yuli and A. Oplatka

342 Chaotic Bursts in Nonlinear Dynamical Systems: R. L. Devaney

345 Forskolin and Phorbol Esters Reduce the Same Potassium Conductance of Mouse Neurons in Culture: D. S. Grega, M. A. Werz, R. L. Macdonald

354 Wind Speed and Mortality Rate of a Marine Fish, the Northern Anchovy (Engraulis mordax): R. M. Peterman and M. J. Bradford

Technical Comments

Book Reviews

371 No Ivory Tower, reviewed by C. S. Gruber • Inner Space/Outer Space, P. J. E. Peebles • Mind and Brain, B. Bridgeman • Yeast Cell Biology, R. C. Dickson • Books Received

Products & Materials

375 Data Acquisition Computer System • Micropipette Injector • Thermostable Inert Column • Multichannel Pipetting Instrument • Bioreactor • Laser Power Stabilizers • Literature
