News & Comment

271 Nuclear Winter Debate Heats Up
273 Berkeley Changes Tack on Reactor
274 U.S.-Japan Study Aim Is Education Reform
275 NASA Announces a Plan to Reform Management Practices
276 NIH Finds Argentine Experiment Did Not Break U.S. Biotechnology Rules
277 Debate Over SDI Enters New Phase ■ The Conventional Look of Near-Term SDI
280 Briefing: House of Lords Wants U.K. Research Assessed ■ New French Minister

Research News

281 Fire! New Ways to Prevent It
283 The Texas Symposium on Relativistic Astrophysics: Keeping Current with Cosmic Strings ■ Exploring the Lyman-alpha Forest ■ New Variables for Quantum Gravity
285 A New Wave of Enzymes for Cleaving Prohormones

Articles

295 Development of a More Market-Oriented Economy in China: G. C. Chow
299 Geologic Evolution of Northern Tibet: Results of an Expedition to Ulugh Muztagh: P. Molnar, B. C. Burckfie1, Z. Ziyun, L. Kuangyi, W. Shuij, H. Minmin
305 The Molecular Genetics of Cancer: J. M. Bishop

Research Articles

312 Many Random Sequences Functionally Replace the Secretion Signal Sequence of Yeast Invertase: C. A. Kaiser, D. Preuss, F. Grisafi, D. Botstein

Reports

318 Multiple Conformational States of Proteins: A Molecular Dynamics Analysis of Myoglobin: R. Elber and M. Karplus
321 Construction of a Novel Oncogene Based on Synthetic Sequences Encoding Epidermal Growth Factor: D. F. Stern, D. L. Hare, M. A. Cecchini, R. A. Weinberg
325 Cellular and Subcellular Heterogeneity of [Ca2+]i in Single Heart Cells Revealed by Fura-2: W. G. Wier, M. B. Canneli, J. R. Berlin, E. Marban, W. J. Lederer

SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with The Scientific Monthly's Copyright © 1987 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $65. Domestic institutional subscription (51 issues): $196. Foreign postage extra: Canada $32, other (surface mail) $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($1 by mail); back issues $4 ($4.50 by mail); Biotechnology issues, $5.50 ($6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments $16 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/87 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Triassic sandstone and shale in valley northeast of Ulugh Muztagh, the peak on the horizon and behind the glacier in the middle ground. Note rounded topography near the glacier where Triassic sandstone, siltstone, and shale crop out and the steep topography of the mountain where metamorphic equivalents of these Triassic rocks are more resistant to erosion. See page 299. [Peter Molnar, Massachusetts Institute of Technology, Cambridge, MA 02139]
