The Inside Story: Why the L8M Is the Best Ultracentrifuge Around

The Model L8M has proven to be the most reliable and efficient ultracentrifuge ever designed. The Beckman Ultra-Smooth Induction Drive makes the difference.

The drive system represents a major technological advance—it is completely enclosed inside a vacuum envelope, eliminating the need for a high-speed seal between the drive motor and rotor chamber. There is no bushing to wear, no friction, no messy oil drain or reservoir, no chance for a vacuum loss during a critical run. You get greatly reduced maintenance, less heat and noise in your lab, long-term reliability.

For high throughput, the L8M provides the fastest acceleration and deceleration of any ultracentrifuge for all rotors. For example, the Model L8-80M can get a Type 80 Ti Rotor to top speed in 7 min, 36 sec and decelerates from 80,000 rpm in 3 min, 50 sec. For delicate gradient separations, there are 10 special microprocessor-controlled profiles.

Another major L8M advantage is its self-contained, refrigerated drive system—the most efficient ever devised. As a result, the L8M's can operate at ambient temperatures up to 45°C. You get maximum instrument availability regardless of lab temperature conditions.

So if you want greater reliability, productivity and efficiency, you have only one decision to make: which L8M to choose—the 80,000-rpm, 70,000-rpm, or the new 60,000-rpm model!

For more information, write Beckman Instruments, Inc., Spinco Division, 1050 Page Mill Road, Palo Alto, CA 94304.
Custom Peptides and Antisera...

An expanded custom service for the rapid production of synthetic peptides and antipeptide antibodies is now available from the specialists in peptide research, Cambridge Research Biochemicals.

Developed to meet all your project needs, this confidential service includes hydropathic analysis to identify potential antigenic determinants and the efficient Fmoc-polyamide synthesis of selected peptides which are subsequently fully characterised.

Employing defined peptide-carrier conjugation and optimised immunisation protocols together with the assay of sera for antipeptide activity, the Cambridge Research Biochemicals custom service provides you with a unique product of the required pre-determined specificity.

Contact Dr Paul Sheppard, Contract Research Director, now for further details of this exciting new service or simply send for a free copy of the new 'Synthetic Peptides For Molecular Biology' brochure and discover how we produce the best at Cambridge.

USA. Cambridge Research Biochemicals Inc., PO Box 58, 2005 Park Street, Atlantic Beach, New York 11509, USA. Toll free Tel: (800) 327 0125. Telex: 971398. Fax: 516 239 2782

Circle No. 90 on Readers' Service Card
The new Eppendorf Micro Centrifuge.

With 50% higher capacity, variable speed, quieter operation, and quick-release rotor.

Brand new and turning 18.

**Higher capacity...plus.**
The new 18-place Model 5415 Micro Centrifuge gives you important operating advantages— with unique Eppendorf quality.

**Versatile in use.**
Model 5415 has a variable-speed motor that reaches a maximum of 14,000 rpm with an RCF of 16,000 x g; a 30-minute timer; and a momentary button for short spins. It accepts 1.5 mL, 500 µL, 400 µL, and 250 µL Eppendorf Microcentrifuge Tubes and blood collection microtubes, such as B-D Microrainer™ Tubes.

**New rotor design.**
The enclosed rotor design reduces air turbulence for quieter operation. And the new quick-release feature lets you transport the rotor with tubes—especially convenient when the centrifuge is run in a cold room.

**Safe and rugged.**
The Eppendorf 5415 Micro Centrifuge is UL listed for safety. It's so rugged that an accidentally unbalanced load won't cause excessive vibration or motor damage.

**Specifications**

For literature circle reader service number 228
For a demonstration circle reader service number 229
Preferred By Thousands Of Mechanical High Frequency Homogenizer Users.

**Tekmar now offers a choice.**

**Model SDT Features:**
- Rapid sample disintegration
- Hand held or stand mounted
- Generator probes easily disassembled for cleaning and maintenance
- Probes easily interchanged into same motor

*Introducing the Tissumizer Mark II with more power and a wider working volume range.*

**Model SDT<sub>25</sub> Features:**
- More powerful motor
- Higher speed 28,800 rpm
- Built-in, precision speed control
- Hand held or stand mounted
- Accepts standard SDT Tissumizer generator probes
- Larger diameter probe for 2000 ml

**Applications:** Homogenization of cell tissues such as lung, muscle, liver, aorta, spleen, heart, brain, and organelles • Isolation of intact organelles • Polyacrylamide gel and cellulose acetate dispersing • Water analysis – complete dispersion before introduction to analyzer • Soils analysis – few minute dispersion replaces 8 hour soxhlet extraction • Air pollution filter extraction

**Reliable performance is still available at an affordable price**
Pharmacia Mono Q®, Mono S® and Mono P® high performance ion exchange and Chromatofocusing™ columns for FPLC are at the forefront of separation science, meeting the demand for high resolution and capacity in both analytical and preparative biomolecule separations.

MonoBeads® are monodisperse, hydrophilic, beaded polymers, stable from pH 2–12 and inert to the most commonly used chromatography solvents. With capacity for at least 25 mg protein/ml gel, there is no comparable ion exchange material. With a choice of column sizes from 1 to 300 ml, you can achieve fine structure resolution and, at the same time, throughputs approaching grams per hour.

Mono Q and Mono S are ideal for fast method development. The identical bead size allows direct scale-up and similar selectivity. Larger bead size gels, Q Sepharose® Fast Flow and S Sepharose® Fast Flow allow easy, cost-efficient scale-up to process chromatography.

Capacity combined with selectivity—two key factors for successful high performance liquid chromatography of biomolecules. Two reasons why so many have already chosen FPLC.

The brochure, “FPLC: Media and Column Guide for High Performance Separation of Biomolecules” shows you all you need to exceed your capacity with media for FPLC. Request your free copy today!

Capri Lectures in Biotechnology

REGULATION OF MAMMALIAN CELL GROWTH

Capri (Italy) – Europa Palace Hotel Anacapri
September 27 to October 2, 1987

Organized by:
CIBA GEIGY and T&B Tecnologie per la Bioingegneria

MAIN TOPICS:
- Gene Expression
- Oncogenes
- Hormones
- Viruses
- Lymphokines and Immune Response

SPEAKERS:
- D. Baltimore (Cambridge, USA)
- E. Borrelli (San Diego)
- P. Chambon (Strasbourg)
- W. W. Franke (Heidelberg)
- H. E. Varmus (San Francisco)
- R. J. Mulligan (Cambridge, USA)
- D. V. Goeddel (San Francisco)
- T. H. Rabbits (Cambridge, GB)
- G. Sorg (Münster)
- T. A. Waldmann (Bethesda)

APPLICATIONS
Applicants should submit a curriculum vitae and a one-page abstract of their research activities (with title, author(s), affiliation, and text; typed camera-ready within a frame of 16 x 23 cm). From these abstracts, 10-15 will be selected for a short oral presentation, and the remaining participants will be invited to present a poster.

Applications will be selected by the Scientific Committee which includes: E. Borrelli (San Diego), P. Chambon (Strasbourg), H. Hofstetter (Basel), P. Sassone-Corsi (San Diego) and W. Schaffner (Zürich). Applicants will be informed by June 15 whether they have been accepted.

The applications should be addressed to:
Dr. H. Hofstetter – Ciba-Geigy AG, Biotechnologie K-681, 4002 Basel – Switzerland.
Tel: 0622911 – Fax: +41-61-377444.

The deadline for receipt of applications is May 10, 1987.

INFORMATIONS
For general information please contact the Operating Secretariat:
T&B Tecnologie per la Bioingegneria – Attn: Maria Rosaria di Mauro Via Tasso 429/A – 80127 Napoli – Italy
Tel: +39-81-658633/659021 – Telex: 720573

TECHNOLOGICAL EXHIBITION
There will be also a technological exhibition of products, instrumentation and technologies related to the subjects covered by the conference. Interested companies should contact T&B Tecnologie per la Bioingegneria by April 30, 1987.

CONFERENCE REGISTRATION
Registration fee is US$200 + VAT 18%. It includes documentation, admission to the scientific program, coffee breaks, social activities. Participants will be accommodated in hotels of various price classes. The registration fee does NOT cover the cost of accommodation. The total number of participants will be limited to 200.
Cut the sequencing story short while relying on your current know-how

Genoscope helps you gain time in sequencing thanks to:

- **automatic reading** of the band pattern represented on the screen in real time. Your intervention is only required to remove ambiguities. The computer will assist you in data analysis.
- **well mastered techniques** used: Maxam and Gilbert as well as Sanger.
- **Genoscope's built-in detectors**. You no longer need long gels and gradients.

Moreover, GENOSCOPE offers you **increased safety** by reducing the handling and the quantity of labelled products used.

For further information please contact, **GENOFIT**

Precision Scientific

New Precision® Baths

You have a right to demand a water bath that delivers precision constant temperature and solid performance — day after day, year after year.
We're confident you'll get that performance with every Precision® general purpose water bath we make. That's why we warrant them for five full years, far longer than anyone else in the business.

You get Precision heat
Inside, you get ± 0.2°C uniformity at 37°C, measured in the center and all four corners for accuracy.
Down below, we bolt our new metal tubular heating element directly to the chamber for rapid, efficient transfer of heat. And we sheath it in copper for longer life. You won't burn out, even if the bath should accidentally run dry.
On top of it all, a stainless steel gable cover maintains uniformity, minimizes evaporation, and helps keep your bath clean—at no extra charge.

You get a body that just won't quit
We electropolish our stainless steel inner chamber to fight off corrosion and make cleaning a breeze. You get a deep, seamless chamber, with no welds to weaken or leak.
We form our outer body from all stainless steel to make it impervious to rust. Then we bake a polyurethane coating on top of that to withstand scratches and chemical attack.

You get it from Precision Scientific
We've built more quality constant temperature equipment for the lab than anybody else in the business. Made in America, for nearly 70 years. Fast, responsive service is just a phone call away. And Precision baths are available to you through all major distributors.
We invite you to take a closer look at Precision general purpose baths today. Talk to your distributor rep. Call us direct at 800-621-8820. Or write us at Precision Scientific, 3737 West Cortland Street, Chicago, Illinois 60647.
The Olympus CK2 Series. A new standard for routine and tissue culture microscopy.

The quality of any microscope system relies on the interrelationship of optical performance, mechanical capability and a component system that increases its versatility as your needs grow. That is the Olympus advantage.

At the heart of the CK2's mastery of its field are Olympus long barrel infinity-corrected, long-working distance optics of exquisite precision with high contrast images of superb acuity.

Whether for brightfield or phase contrast observation, the CK2 microscopes offer unexcelled ease of operation. For example, they feature a single condenser system that can handle a 4X to 40X magnification range without modifications, making phase contrast observation simple and rapid. And the Olympus-designed heat reduction system makes prolonged operation easy on tissue cultures.

CK2's low center of gravity facilitates a larger stage, firmly anchored to the body. The plain stage has a 160x240mm surface, with available extension plates each 70x180mm, capable of handling 24 or 96 hole micro test plates. The attachable mechanical stage has a large 78x120mm scanning area. And the optional Terasaki and Petri dish holders ease handling of all types of specimens.

Two models are available, the CK2-Bi with binocular tube, and the CK2-Tr with trinocular tube for photomicrography, magnification changer, drawing attachment, etc. Modular design offers an extensive array of components and accessories that make the CK2 Series a highly versatile laboratory tool. Such as its exclusive optional long-working distance darkfield condenser.

For a demonstration of the remarkable CK2 Series inverted microscopes, call toll-free to Olympus Corporation, Precision Instrument Division: 1(800)446-5967. Or write for full-color descriptive literature to 4 Nevada Drive, Lake Success, New York 11042-1179.

In Canada: W. Carsen Co., Ltd., Ontario.
In Mathematical and Statistical FORTRAN Programming

IMSL Gets You to the Solution Faster

There is a faster way to get from problem to solution. A way to reduce development time, simplify maintenance, improve accuracy. A way to measurably increase productivity by selecting from hundreds of complete, fully tested mathematical and statistical FORTRAN subprograms.

IMSL Subroutine Libraries
Calling a routine from an IMSL library is faster than writing it. It's a simple fact, but it can mean a big improvement in the productivity of both people and computers. It's why professional problem solvers in more than 60 countries have chosen IMSL libraries as their standard resource for FORTRAN programming.

Broad Scope.
IMSL libraries provide the most comprehensive selection of mathematical and statistical FORTRAN subprograms available. IMSL's high-quality subprograms will meet your current and future needs in almost any numerical programming application.

Wide Compatibility.
IMSL libraries are affordably priced and compatible with most computing environments, from supercomputers to personal computers. Uniform calling conventions and documentation make IMSL libraries easy to learn and easy to use. In a multiple-computer environment, IMSL libraries can expand development flexibility and enhance portability between computers.

Accuracy and Reliability.
IMSL subroutines are designed, and exhaustively tested, for accuracy and reliability—and continually verified through thousands of hours of computation by customers around the world. Using IMSL libraries not only increases productivity, but can also enhance the accuracy and robustness of your programs and applications.

Now Available
New versions of IMSL libraries offer even more.

- Over 150 new subprograms add important areas of mathematical and statistical capability.
- New and enhanced algorithms reflect the latest developments in numerical computing.
- Automatic workspace allocation simplifies usage and eliminates allocation errors.
- Enhanced documentation now includes convenient and economical quick-reference guides and softcover reference manuals.
- Advanced error handling automatically provides informative error messages as well as program control over error conditions.

New Titles Available from AAAS

Scientists and Journalists: Reporting Science as News
Edited by Sharon M. Friedman, Sharon Dunwoody, and Carol L. Rogers
The public is interested in science and depends largely on the mass media for the latest information. But how well do scientists and journalists connect to communicate to the public? This book examines the human aspect of the links between scientists and journalists through the eyes of both.
1985, 352 pp., hardcover; $24.95, AAAS members $19.95

Science as Intellectual Property: Who Controls Scientific Research?
Dorothy Nelkin
Who controls research? A growing number of legal and administrative disputes raise critical issues of professional sovereignty, scientific secrecy, and proprietary rights. Nelkin offers cases illustrating the dilemmas that arise as the interests of scientists, the rights of citizens, and the security needs of government and industry come into increasing conflict.
1984, 130 pp., softcover; $10.00, AAAS members $8.00

The Gene-Splicing Wars: Reflections on the Recombinant DNA Controversy
Edited by Raymond A. Zilinskas and Burke K. Zimmerman
Questions of safety and ethics about recombinant DNA techniques continue to surface. This book takes a look at historical, political, industrial, scientific, and international aspects of these issues. The authors show how lessons learned from the experience can be used to cope with similar issues in the future.
1986, 256 pp., hardcover; $24.95, AAAS members $19.95

All orders must be prepaid. VISA, MasterCard, and Choice accepted; include account number, expiration date, and signature.

Send orders to: AAAS Marketing, 1333 H Street, NW, Dept. M, Washington, DC 20005. Please add $1.50 postage and handling per order. Allow 4-6 weeks for delivery.

Don't let your work go up in smoke.

Baker High Velocity Return Air Slots maximize product protection.

The smoke test proves it: without proper precautions, particulates can enter your work area and contaminate sensitive biological materials.

Outside contaminants don't have a chance with Baker's exclusive airflow designs: High Velocity Return Air Slots at the crucial cabinet sidewall areas; Zoned Airflow for a more impenetrable barrier at the front of the cabinet; and negative pressure surrounding the entire work area.

At The Baker Company, we never compromise on product or personnel protection. Should you?

Call toll free for complete data. Or write to The Baker Company, P.O. Drawer E, Sanford, ME 04073.
