Behind every great biotech lab is a great biotech supplier.

VWR.

It all begins with VWR’s comprehensive product line. Over 40,000 items that you depend on every day, representing 1,000 brands from respected names such as J.T. Baker, Beckman, Corning, E.M. Science and Nalge.

To get you the products you need, when you need them, VWR combines advanced computer technology and a sophisticated inventory and delivery system. You can interact with our computer to order and check product availability and pricing—instantly. With our 27 offices throughout the U.S., you’re never far from VWR. And with our vast inventory at local warehouses, we can usually ship your order directly from stock. There’s no need to tie up valuable research dollars and shelf space—we’ll carry your inventory.

VWR’s carefully trained representatives, many of whom come from labs like yours, keep you informed about new products and new procedures. Their expertise in biotechnology helps you in everything from setting up in-plant storerooms to designing, furnishing and equipping your new lab.

Let us show you how we’ve been supporting great labs like yours. Contact VWR today.

VWR. Today’s Biotechnology Supplier.

Don't Be Left Holding The Bag.

"What do you mean it doesn't grow your cells? I made it with the same powdered media as the last time."

If you are using powdered media, chances are you're introducing many variables to your work. Don't be surprised. Just because you prepare your medium the same way every time doesn't mean that it is always the same. Unforeseen problems could be introduced in your water system in the form of endotoxin, microbial and chemical contaminants. Additional problems could result from airborne particulates in your hood, particulates and bioburden in your caps, bioburden and residue in your bottles, and variability introduced by the powdered media.

So, the next time you run an experiment, the medium you take for granted could be letting you down.

The solution to this problem is our quality liquid media. At Whittaker M.A. Bioproducts we routinely monitor all aspects of production. The quality of air in our aseptic filling core is precisely controlled. The defined oven load configurations used in production have been validated for sterilization effectiveness. Our water system is tested daily and its endotoxin levels are lower than water for injection standards. Hundreds of Standard Operating Procedures are in place to assure you consistent, quality products. And none of our media are prepared from reconstituted powder.

The next time you consider using powdered media choose quality liquid media from Whittaker M.A. Bioproducts. We won't leave you holding the bag.

Telephone toll free, 800-638-8174.

Ho hum, your word processor enables you to process words. But today, when you're creating long, complex documents, you often have to process much more. Graphics, equations, columns, tables, etc.

Lotus Manuscript™ is a complete document creation system that can handle documents from 1 to 800 pages. Manuscript can mix text and graphics on the same page, graphics from Lotus® 1-2-3®, Symphony® and Freelance® Plus. It can also import spreadsheets and charts, plus diagrams and scanned images.

With our Integrated Outliner you can collapse a document to navigate the outline, or move any size section with just a few keystrokes.

You can globally format an entire Manuscript document, or format by sections. Manuscript's Document Compare feature highlights changes between revisions for foolproof proof-reading.

With our Document Preview feature you can see how any page will look before it's printed. Zoom capability lets you take a closer look at graphics and equations.

Also, Manuscript automatically sizes and generates math equations as well as Greek symbols, diacritical marks and brackets.

Our powerful Print Formatter gives you control over the look of your document, from position and size of graphics, to fonts, point sizes and more. Manuscript also takes full advantage of today's printing technology, from dot-matrix to laser, including PostScript® printers.

Manuscript is designed to work on most IBM® PCs and compatibles. Its familiar 1-2-3® interface makes it easy to use. And our Manuscript evaluation kit makes it easy to try. For $10.00, you'll get a presentation disk, working software, and a tutorial manual. To get your evaluation kit, call 1-800-345-1043, ask for lot #EE 1450.

Or, for more information, see your authorized Lotus Dealer, or write Lotus Development Corp., 90 Annex, Atlanta, GA 30390-0370.

Only one package of biotech software does more work than PC/GENE...

IntelliGenetics software on the SUN Workstation™ and the VAX™ is still the most powerful battery of programs available.

Now PC/GENE offers the most versatile software for your IBM™ XT, AT, or compatible.

PC/GENE helps you investigate protein and nucleic acid sequences in over fifty different ways. Half of the analyses focus on proteins.

PC/GENE predicts secondary structure, looks for specific regions, finds restriction sites, and performs many other tasks.

PC/GENE produces graphic output for more than twenty programs. Its high resolution plots reveal patterns often hidden in numerical displays.

PC/GENE combines a microcomputer's convenience with a mainframe's power. Its communications software links it to IntelliGenetics software on minicomputers, the timesharing system, or the NIH-funded BIONET Resource.

For more information about PC/GENE or other IntelliGenetics software call: 415-961-4666 or write: 700 East El Camino Real, Mountain View, CA 94040.

PC/GENE is a registered trademark of IntelliGenetics, Inc. SUN Workstation of SUN Microsystems, Inc., VAX of Digital Equipment Corporation, and IBM XT, AT of International Business Machines, Inc.

Don't let your work go up in smoke.

Baker High Velocity Return Air Slots maximize product protection.

The smoke test proves it: without proper precautions, particulates can enter your work area and contaminate sensitive biological materials. The best way to reduce the risk? Baker Biological Safety Cabinets. With the best materials. The best workmanship. The best performance.

Outside contaminants don't have a chance with Baker's exclusive airflow designs: High Velocity Return Air Slots at the crucial cabinet sidewall areas; Zoned Airflow for a more impenetrable barrier at the front of the cabinet; and negative pressure surrounding the entire work area.

At The Baker Company, we never compromise on product or personnel protection. Should you?

Call toll free for complete data. Or write to The Baker Company, P.O. Drawer E, Sanford, ME 04073.

Circle No. 132 on Readers' Service Card
High-resolution electrophoresis, a powerful technique, is rarely used to its full potential due to time-consuming and often tedious methodology.

PhastSystem™, a technological breakthrough, transforms this powerful technique into a streamlined scientific tool.

To give you fast, reproducible, high-resolution results, PhastSystem integrates precision instrumentation, PhastGel™ media (see below) and microprocessor control of all separation and development conditions.

Try PhastSystem. You'll find IEF, SDS and native PAGE equally easy and reliable to perform in just 30 to 50 minutes. And with automated development at elevated temperatures, you'll find silver staining (60 min) as convenient to perform as coomassie staining (30 min).
Become a Schleich customer. No purchase needed.

You never know when you'll need advice.

Talk to Schleicher & Schuell. Even if you've never used an S&S product.

You see, you don't have to be an S&S "customer" to benefit from our expertise in the life sciences. Anyone with a question or comment is welcome to call us. With absolutely no strings attached. And talk to us about what interests us most - your work.

Because our goal isn't just to sell products.

It's to provide you with the tools you need to make your research produce better, more consistent results.

**Technical help, as close as your phone.**

S&S technical service reps are on the job, every working day, to provide one-to-one, toll-free assistance with products and protocols.

And they have a number of resources at their disposal. Including a database containing 25 years of protocols and research literature references - research using S&S products.

And lab facilities in which protocols can be tested.

**Information and literature on the latest techniques and breakthroughs.**

With all of the literature we print, you'd think S&S was a publishing company.

Everything we offer is designed to keep you informed about what's happening in the industry, and at S&S.

That includes the S&S "Sequences" newsletter. Newly revised protocols for "Southern" and "northern" transfers (a "western" transfer protocol is forthcoming). And data sheets on all major S&S products.

And everything we publish is available - free. Simply by calling our customer service department, toll-free at 1-800-245-4024.

The S&S "Sequences" newsletter is read by over 20,000 people worldwide. And the S&S methods chart for "Southern" and "northern" transfers has been completely revised and updated by a panel of recognized experts in molecular biology. Call to receive your free copy.

A full line of transfer and immobilization products.

In 1963, S&S BA85 NC™ nitrocellulose paper was used for the first immobilization of DNA.*

---

er & Schuell
lase necessary.

Since then, BA85 has become the media-of-choice for transfer and immobilization of DNA, RNA, and proteins.

This experience goes into our other transfer and immobilization membranes.

Nytran® positively charged nylon membrane, S&S uncharged nylon membrane, S&S glass fiber filters, plus Transa-bind® covalent binding and ion-exchange membranes.

Look to S&S for all of your general separation science needs.

Because research does not live by transfer and immobilization alone, we make a whole range of filtration and life science research products.

S&S papers and membranes have a range of applications – from tissue typing to radiation monitoring to pH measurement.

Plus S&S surface-activated and derivatized media are used widely for clinical body fluid specimen collection and immobilization. And are a critical component in many clinical test kits and devices.

Research and development to make your life easier.

Like you, we’re always in the lab. Improving protocols. Developing new membranes and devices.

Some of our latest developments may change the way you work.

Like the new S&S cell harvester which can process 20 96-well plates in the time that it once took to do one. Other S&S developments have changed the way the world lives.

S&S #903 specimen collection paper has been used to screen every child born in the U.S. during the last 20 years for inborn metabolic disorders.

Another example, a joint research project with a major pharma-

tical company resulted in a new way of testing for antibodies. Our contribution: a customized membrane that made affinity to specific antigens possible.

Working with companies to develop new and innovative customized products is a continuing goal at S&S.

Talk to us.

We want to hear from you. We welcome your comments and questions. Write to Schleicher & Schuell, Inc., Keene, NH 03431. Or call us at 1-800-245-4024.

You won’t have to buy a single S&S product to tap our 60 years of experience. Or to receive a product sample and a piece of literature. Or talk to us about your current project.

Of course, we’d like you to buy our products.

And after talking to us, you just might feel the same way.

Schleicher & Schuell
Keene, NH 03431 • 800-245-4024 • 603-352-3810

Imagine what you could do if your computer could see.

Eikonix® high performance digital imaging cameras give your computer the ability to see. Which in turn gives you the ability to improve the quality of your research, and open new markets.

Easy-to-use Eikonix cameras are compatible with IEEE 488, DEC Q-Bus, Unibus and Multibus based systems as well as IBM® PCs. They’re the most flexible, cost-effective, reliable, and accurate means available for getting high resolution image data into a computer for analysis, manipulation, display and storage. And they’re backed by a team of specialists that provides all the technical support you need for whatever applications you have — worldwide.

If you’d like us to focus on your particular application, please call us at (617) 275-5070. If you’d like some literature, simply write to us at Eikonix Corporation, 23 Crosby Drive, Bedford, MA 01730, Telex: 951231.

Leading Scientists Rely On The UVIKON® 860 UV/VIS Spectrophotometer

Higher Sensitivity
The symmetrical double beam optical system uses only six reflecting surfaces, for maximum energy throughput, providing ultimate performance with real samples. Your benefit is a higher signal to noise ratio and therefore correspondingly higher sensitivity.

Best Reproducibility
The optical base is machined within a tolerance of 0.001%, we add a microprocessor controlled wavelength drive to obtain a wave-length reproducibility of 0.02 nm. Your benefit: best reproducibility, being especially important to obtain the same results if a measurement is made on the slope of a peak or on top of a very sharp peak.

Signal Resolution 0.000001 ABS
The fully digitized signal processing calculates the absorbance with an unmatched resolution. Your benefit: small changes in ABS are accurately determined.

Absorbance versus Concentration
Calibration curves are computed either by linear regression, quadratic fit or linear interpolation using up to 12 standards. Recalculation of the calibration curve can be done at any time without the need to measure the standards again. The calibration data can be stored in the large memory for later use.

Curve Memory Software
All spectral and time drive curve data are put automatically into large battery-buffered memory. You make the decision how to handle the data after the measurement.

Enzyme Kinetics
The Uvikon 860 lets you control all the parameters, such as the incubation time, the number of data points and time interval. The slope is calculated and displayed along with the activity and the statistical data. Post assay recalculation is possible narrowing the range of measured points.

Now-in the New Zeiss Age—New Insights into Biomedicine

The Zeiss Axiophot* and Axioplan* are new microscopes featuring ICS Optics and SI Design. They offer unprecedented convenience for all techniques, including the examination of tissue sections, smears, cultures, fluorescence-labeled proteins and birefringent structures.

**Superb ICS Optics**

- Newly computed objectives with infinite image distance.
- Wide (25 mm) flat field of view for all microscope techniques.
- Brilliant, flawless image quality in both transmitted-light and incident-light fluorescence. Just one set of objectives for numerous contrasting methods.

**Systems-Integrated Design**

Sturdy stand with ergonomic arrangement of all controls. Ample space in specimen area for easy access. System-integrated components allow simple, fast restructuring for all techniques with consistent, optimized performance.

**Fast, accurate documentation**

Axiophot photomicroscope: the system with two 35 mm cameras and 4" x 5" large-format camera. Ideal for instant photography. Precise exposure control, reliable for all microscope techniques.

Axioplan universal microscope: photomicrography with the MC 63 S microscope camera. Both microscopes also with TV camera port.

For complete details on these exciting new microscopes, contact your Zeiss Dealer or call (914) 681-7754 for the name of the dealer nearest you.

The Pyramids of Zeiss: The New Geometry for Microscopes
Performance that doesn’t quit

FTS lyophilizers deliver the high-quality, repeatable performance you need for your most demanding laboratory applications.

Our titanium condensers — standard on floor models and optional on bench-top models — provide superior corrosion resistance even if water is the main vapor you’re trapping. For better trapping of low freezing-point vapors, we offer a bench-top system with condenser temperature to -90°C or lower.

Technology that’s constantly evolving to meet your needs

FTS leads the industry in laboratory freeze-dryer technology because we work closely with customers and understand your changing requirements. We continually improve and upgrade our freeze-dryer line to bring you the most advanced systems available.

Mix-and-match components maximize efficiency

To maximize efficiency, all FTS freeze-dryer systems are available as separate components. You can mix and match refrigeration, vacuum and product addition components. And, you can count on our trained, experienced representatives to help you put together a system just right for your application needs.

A full line of accessories and instrumentation add to the efficiency of your freeze-dryer system.

Designed to make your job easier

Every feature of our freeze-dryers is designed to make your job easier. Manifold bench-top models feature easily accessible ports for addition of flaskware without restrictive adapters. To facilitate stoppering and reduce contamination, our stoppering units use efficient electro-mechanical stoppering rather than leak-prone air-bladders.

Taper-lock trays with wedge-shaped side rails, forced fluid shelf design and optional removable bottom trays combine to maximize heat transfer on tray units.

FTS freeze-dryers are also easy to operate and maintain. Digital control and indication are standard on tray dryers.

FTS freeze-dryers are available on GSA contract.

To learn more about how FTS freeze-drying systems can help further your research, CALL TOLL-FREE 1-800-251-1531 (Except New York State).
2-D Gel Electrophoresis -
Automated Analysis Turns the Problem of Data Overload into the Opportunity for Better Research

BioImage® has created VISAGE®, an instrument for analysis of 2-D separations that delivers the results your laboratory demands. We have been able to do this because...

WE LISTEN!

YOU SAID: I want to use the power of 2DE in my own lab but analyzing and managing so much data is a problem. I might be able to have my samples processed at an outside service company, but I would lose control of my research and it is not cost effective. Isn't there an analytical instrument that allows me to do it all in my own laboratory?

YOU SAID: I am not a computer expert. How could I operate a computerized instrument as powerful as VISAGE?

YOU SAID: Can a machine vision instrument analyze complex 2DE patterns automatically and consistently?

YOU SAID: Can I rely on VISAGE to give me accurate quantification with so little operator input?

YOU SAID: Some of my gels are dried, some are blotted, some wet in zip-lock bags; I also need to quantify lots of autoradiographs and fluorographs. Can an automated instrument handle all these formats?

YOU SAID: I want to include a set of standards in my 2DE gel patterns. Can your instrument read the standards and compute charge and size for every spot?

YOU SAID: How can I be sure that your company will be able to support me in the years to come?

WE RESPOND! That's why BioImage is the leader.

Ask any of our customers. They are in some of the leading research and applications laboratories in the world.

BioImage®
A Kodak Company

For more information about VISAGE or our other intelligent lab instruments, see your BioImage representative or call (800) 624-5394 (in Michigan 313 971-7500).

Circle No. 142 on Readers' Service Card
The repeater.

Eppendorf Repeater™ Pipette

Reliable, repetitive pipetting. With the Eppendorf Repeater® Pipette, dispensing up to 48 samples without a refill is a snap. Just set the selection dial for the volume you need and your choice is locked in place to prevent errors. That means the last sample will be as accurate and precise as the first. And the unique Combitip™ polypropylene/polyethylene reservoir eliminates cleaning, contamination, and carryover because it's disposable.

1-second delivery. The Repeater makes serial pipetting procedures faster than ever before. Simply press the lever to deliver your samples at 1-second intervals. The volume range is wide enough to accommodate almost any procedure. With six Combitip sizes and five dial settings, you choose from 22 different volumes between 10 µL and 5 mL.

A wide variety of applications. The Repeater can handle any liquid easily. Even difficult or hazardous liquids aren't a problem, since the liquid contacts only the Combitip—not the instrument itself. The Combitip is available in nonsterile or sterile packaging for microbiologic and tissue culture techniques. And it can be refilled and reused as long as the same liquid is being pipetted.

BRK-5452 Shaping the future. Brinkmann INSTRUMENTS, INC.
Research

Get the results you want instantly with Polaroid instant films and imaging systems.

Research and development may be the place to experiment. But you shouldn't have to experiment with your means of documentation.

For that, you want the most effective and fastest method available right from the start. You want, in short, Polaroid instant imaging.

With our full line of over 40 different instant professional films, from 35 mm to 8 x 10", you can be sure of capturing the results you want, when you want them. Which means you can document, review, or present your findings without delays. With detailed accuracy.

Polaroid also lets you choose from a complete range of color or black and white emulsions that meet the imaging requirements of virtually any research condition. In the formats and film types you really need.

What's more, we offer you a comprehensive range of instant imaging systems. Cameras for photography of laboratory set-ups. Copy stands for recording flat art or small objects. Plus electronic imaging.
systems for recording from most types of computers – PC's to mainframes – and from VCR's as well.

Better still, you can do it all yourself. In house, in complete confidentiality. Without the delays that outside services create.

In fact, no matter where your research takes you, you can look to Polaroid imaging systems for the means to handle any development.

Instantly.

For the Polaroid Professional Film Center nearest you, call toll-free 800-343-5000, 8:00 a.m. to 8:00 p.m. Eastern Time.

The IsoPure LC System from Perkin-Elmer. No matter what solvents you use.

You're entitled to superior HPLC/FPLC performance. Ordinary liquid chromatographs cannot withstand exposure to solvents used to separate and purify DNA, monoclonal antibodies and other proteins. The repeated use of corrosive solvents and solvents with high salt concentrations can lead to the deterioration of seals and pistons, and cause chronic leak problems. Perkin-Elmer has the answer.

Quality and durability. The IsoPure LC System's unique piston wash capability eliminates the possibility of piston and seal damage due to crystal formation. Extensive quality assurance testing of the entire system ensures that it performs consistently and reliably.

Corrosion resistance equals biocompatibility. The totally inert fluidics of the IsoPure LC System, including 99.9% titanium, ensure the biological integrity of your sample and eliminate metal ion contamination due to corrosion. For literature in the U.S., please call 1-800-762-4000.

NEN® Research Products offered you 80 new products in 1986. This year looks even better.

The research laboratories of NEN® have a reputation for "firsts" that have consistently helped you meet new challenges in cellular-to-molecular research.

Last year, if you worked in AIDS-related research, you found that our new p24 kit was up to 200 times more sensitive in detecting the HIV virus than the older reverse transcriptase method. Another development, NENSURE™ packaging, assured safer and easier handling and access of radioactive materials.

When we introduced 35S nucleotides we helped you achieve significantly better autoradiographic resolution than previously possible. Our GeneScreen™, the first strong nylon membrane, was able to support far smaller quantities of DNA easily—something you would expect from the inventors of nylon.

In addition to NEN® Research Products, we can help in all phases of your work with SORVALL® centrifuges, CODER® and COUPLER® DNA and Peptide synthesizers, ZORBAX® chromatography columns and process packings and Cell Culture Products.

Call us...we speak your language. You can talk directly with the scientists who developed the products of interest to you or with technical specialists who can help you with your special applications. That's what we call ACCESS: 1-800-551-2121. In Canada, call 416-498-9380.

**King Faisal International Prize**

**AN INVITATION TO SUBMIT NOMINATIONS FOR 1988 KING FAISAL INTERNATIONAL PRIZE IN SCIENCE**

**THE 10TH ANNIVERSARY OF THE AWARD**

The General Secretariat of the King Faisal International Prize, located in Riyadh, Saudi Arabia, has the pleasure to invite higher educational institutions and research centers from around the world to nominate qualified candidates for:

The 1988 King Faisal International Prize in Science,

**TOPIC: “BIOLOGY”**

I. Scholars nominated should have made significant contribution with original research to the scientific understanding of the Prize topic.

II. The nominees will be carefully evaluated by a Selection Committee consisting of internationally recognized specialists in the field.

III. More than one person may share the Prize.

IV. The winners’ names will be announced in January 1988, and the Prize will be awarded in an official ceremony at the headquarters of the King Faisal Foundation in Riyadh, Saudi Arabia.

V. The award consists of:

1. A certificate in the name of the winner, containing an abstract of the work that qualified him/her for the Prize;
2. A gold commemorative medal;
3. And a sum of three hundred and fifty thousand Saudi Riyals (approximately US$93,333)

VI. The following nomination procedures must be followed:

1. A nominee must have accomplished outstanding academic work or research on the subject of the Prize topic, benefiting mankind and enriching human progress.
2. The Prize will be awarded for specific original research, but the nominee’s complete works will be considered.
3. The works submitted with the nominations must have been published before the nomination deadline.
4. The specific works submitted must not have been previously awarded a prize by any international organization.
5. Nominations must be submitted officially on behalf of institutions of higher education and research centers. Nominations from individuals or political parties will not be accepted.
6. Nominations must give full particulars of the nominee’s academic background, experience and publications, as well as copies of his/her educational certificates. Three colored photos (10x15cm), the full address and the telephone number of the nominees are also requested.
7. Nominations and selected publications (ten copies) are to be sent by registered airmail to the address stated below.
8. The latest date for receipt of complete nomination packets is July 25, 1987.
9. No nomination papers or works will be returned to the senders.
10. All correspondence should be forwarded to:

   **The General Secretariat of the King Faisal International Prize**

NEW AAAS PUBLICATION

Scientists and Human Rights
Present and Future Directions
Proceedings from a 1984 AAAS Annual Meeting Workshop

The second workshop report of the AAAS Clearinghouse on Science and Human Rights, a project of the AAAS Committee on Scientific Freedom and Responsibility, examines the activities of scientific societies in the human rights field. Workshop speakers also review mechanisms available within international intergovernmental organizations to address human rights violations of scientific and medical professionals.

Prepared by Kathie McCleskey, Senior Program Associate, AAAS Clearinghouse on Science and Human Rights.

$3.00, paperbound, 70 pp.
Order from AAAS Sales Department, 1333 H St., NW, Washington, DC 20005. Please add $1.50 postage and handling per order. Make checks payable to AAAS.
ON THE ROAD IN 72 HOURS OR YOU SAVE $100

Your Performance Demands Precision®
New Precision® Incubators. Stocked To Deliver.

We guarantee your new Precision® incubator will be shipped within 72 hours of the time your distributor gets the order. If your distributor is temporarily out of stock, call Precision and we'll ship within 72 hours. If we fail, you'll save $100 on your next purchase of Precision products.

We can make this most timely guarantee because we've just built a huge volume of newly updated Precision incubators, and our distributors are stocking up so they can serve you quickly. You won't have to wait long to enjoy the quality performance new Precision incubators deliver. Take our new digital model 4L, for example. New microprocessor control continuously monitors setpoint against actual temperature to minimize chance of overshoot. Controller cycles heat in split second bursts near setpoint to minimize fluctuation. And, our new microprocessor controller carries a full five year warranty. You get ±0.4°C uniformity at 37°C, measured at 9 places throughout the chamber.

Just touch the pad to enter your temperature to 0.1°C. No knobs, no guesswork. Bright LED constantly displays °C in real time, never an average.

Platinum sensor rests high in the ceiling for a most accurate chamber reading. Our tempered inner glass doors let you check your samples without disturbing uniformity. Down below, our low watt density heater brings you a broad surface area for steadier heat that's easier to control.

You Get It From Precision Scientific

We've built more quality constant temperature equipment for the lab than anybody else in the business.

Made in America, for nearly 70 years.
Fast responsive service is just a phone call away.
Talk to your distributor rep or send coupon for more. Call us direct at 800-621-8820.

ABOUT ANALYZING YOUR DATA. You might be spreading your spreadsheet a little too thin. Or maybe you're starting from scratch. But if you're serious about data analysis, you're ready for SPSS/PC+—a full software family that brings you six high-powered ways to complete any data analysis task.

Enter it. SPSS/PC+ Data Entry takes the effort out of entering and correcting data.

Analyze it. The SPSS/PC+ Base Package provides a powerful array of statistical and reporting procedures.

Examine it. SPSS/PC+ Advanced Statistics lets you get more serious with your data.

Table it. SPSS/PC+ Tables produces presentation-ready tables instantly.

Chart it. SPSS/PC+ Graphics featuring Microsoft Chart creates show-stopping graphs and charts.

Map it. SPSS/PC+ Mapping featuring MAP-MASTER*—our latest option—creates maps where vast amounts of data can be summarized and presented in one, simple picture.

SPSS/PC+ products are being put to productive use by serious fact finders in businesses, government and education. For countless purposes such as market research, wage and salary studies, survey analysis, and quality control. Plus each product is superbly documented and supported by SPSS Inc., a leader in statistical software for nearly 20 years. While specially tailored customer support is available through the VALUE PLUS plan.

So if you're serious about data analysis, step up to SPSS/PC+. For details, contact our Marketing Department.
