**Notes:**
- SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with The Scientific Monthly. Copyright © 1987 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $65. Domestic institutional subscription (51 issues): $98. Foreign postage extra: Canada $32, other (surface mail) $27, air-surface via Amsterdam $66. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $4 ($4.50 by mail); Biotechnology issue, $5.50 ($5 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments $16 ($17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $1 per copy plus $0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/87 $1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
In Greek mythology, the chimera was a creature with characteristics of several animals. The construction of chimeric molecules from diverse pieces of DNA is now a cornerstone of recombinant DNA technology. See pages 1223 to 1263.

1290 Expression of Functional Cell-Cell Channels from Cloned Rat Liver Gap Junction Complementary DNA: G. Dahl, T. Miller, D. Paul, R. Voellmy, R. Werner
1293 Selective Inactivation of Influenza C Esterase: A Probe for Detecting 9-O-Acetylated Sialic Acids: E. A. Muchmore and A. Varki
1295 Regulation of bcl-2 Proto-Oncogene Expression During Normal Human Lymphocyte Proliferation: J. C. Reed, Y. Tsujimoto, J. D. Alpers, C. M. Croce, P. C. Nowell
1299 Duplication of CaMV 35S Promoter Sequences Creates a Strong Enhancer for Plant Genes: R. Kay, A. Chan, M. Daly, J. McPherson
1302 Propagation in Cell Culture of the Dinoflagellate Amyloiodinium, an Ectoparasite of Marine Fishes: E. J. Noga
1305 Derivation of Clones Close to met by Preparative Field Inversion Gel Electrophoresis: F. Michiels, M. Burmeister, H. Lehrach
1311 The Dynamics of Free Calcium in Dendritic Spines in Response to Repetitive Synaptic Input: E. Gamble and C. Koch
