bassy noted, "which has struggled through difficult times during the past 15 years, responded to the American delegation's visit with a new sense of direction and confidence."

The panel will meet in Washington, D.C., in July and a session on science in Chile will be presented at the AAAS Annual Meeting in Boston.

Update on AAAS Cooperative Efforts with Soviet Scientific and Engineering Community

A number of events have taken place recently involving U.S. and Soviet experts. In September 1986 a "spacebridge" teleconference was held on "Chernobyl and Three Mile Island: Implications for International Cooperation in an Interdependent World." With AAAS and the U.S.S.R. Academy of Sciences as scientific sponsors, the teleconference featured U.S. and Soviet panels focused on lessons to be learned from the two accidents, future energy technologies, and prospects of international collaboration in energy matters.

During the "spacebridge" several suggestions were put forth for cooperative projects including joint seminars with the Soviet Academy on energy-related issues. Copies of an edited videotape of the "spacebridge," narrated by Hedrick Smith, can be purchased for $40 or rented for $20 from Search for Common Ground, 2005 Massachusetts Avenue, NW, Washington, D.C. 20036. Both 1/2- and 3/4-inch formats are available.

At the February 1987 AAAS Annual Meeting in Chicago several Soviet experts participated in a number of symposia organized by the AAAS Committee on Science, Arms Control, and National Security. Roald Sagdeev and Albert Galeev, Institute for Space Research; Alexsey Arbatov, Institute of World Economy and International Relations; and Yuri Shiyam, Committee on International Security and Arms Control, spoke at sessions on Alternative Approaches to Arms Control; Soviet and American Perspectives on the Geneva Arms Control Negotiations; Soviet Perspectives on the Strategic and INF Negotiations; Arms Control and Verification Technology; and Prospects for the Space Program: One Year After Challenger. Audiotapes of these symposia are available from Mobil Tapes Company (818-244-8122).

AAAS is cosponsoring with the Soviet Academy, the Global Foundation, and the University of Miami's Center for Theoretical Studies an International Scientific Forum on Fueling the 21st Century: Solving Tomorrow's Problems, to be held in Moscow September 29 to October 1987.

Experts from around the world will address energy prospects for the next century, discussing chemical fuels, nuclear sources, including fusion and fission, and other alternatives, as well as social and economic aspects of energy for the future. This will be the 11th in the Forum series which is intended to consider within an independent, international, and interdisciplinary framework energy issues facing academia, industry, and government in both developed and developing countries. Two hundred scientists and engineers are expected to take part, including participants from the "spacebridge." For further information on any of these activities, please contact the Office of International Science at the AAAS address.

Resource Directory Available

The AAAS Office of Opportunities in Science announces the publication of the second edition of the Resource Directory of Scientists and Engineers with Disabilities. The Directory lists names and other data about scientists and engineers with disabilities.

It is a valuable resource for educators and students seeking information on better access to educational programs, as well as agencies in the federal government, nonprofit sector members of advisory committees, and peer-review panels. The Directory is especially useful to scientists and engineers who become disabled in midcareer and wish to learn coping strategies that others have developed.

Funding for the Directory was made possible by a grant from the National Science Foundation.

Order copies from the Office of Opportunities in Science at the AAAS address; $10 plus $3 postage and handling, prepaid. Inquire about discounts for orders of ten or more copies. A braille edition is available.

"The Hole in the Sky" Transcripts Available

The fourth annual Benjamin Franklin Lecture featured Susan Solomon, a National Oceanic and Atmospheric Administration chemist and leader of the National Science Foundation, in Canberra, Australia. Copies of the transcript of Solomon's lecture entitled, "The Hole in the Sky," are available upon request from Patricia S. Culin, Committee on Public Understanding of Science and Technology, at the AAAS address.

The Benjamin Franklin Lecture series is a featured activity of National Science and Technology Week. Each year, the National Academy of Sciences, the National Science Foundation, and the AAAS copublish this event, intended for a general audience.

Chairmen and Secretaries of AAAS Sections

MATHEMATICS (A)
M. Wood 
Lynn Arthur Steen
PHYSICS (B)
Herman Feshbach
Ron M. Slomin
CHEMISTRY (C)
Norman Hackerman
Jeanne M. Shreeve
ASTRONOMY (D)
Jay M. Pasachoff
John T. Gaudet
GEOLOGY AND GEOGRAPHY (E)
George Rapp, Jr.
Helen M. McCammon

BIOLOGICAL SCIENCES (G)
Judy H. Willis
Judith P. Gaskie
ANTHROPOLOGY (H)
John E. Yellen
Priscilla Riehl
PSYCHOLOGY (J)
Michael J. Posner
William N. Dember
SOCIAL, ECONOMIC, AND POLITICAL SCIENCES (K)
Peter H. Rossi
William M. Freudenburg
HISTORY AND PHILOSOPHY OF SCIENCE (L)
Joseph W. Dauben
Arthur L. Norberg
ENGINEERING (M)
Robert F. Cotler
E. W. Edward Lear

MEDICAL SCIENCES (N)
Helen M. Ramey
Henry Blackburn
AGRICULTURE (O)
CHARLES C. Gardner
INDUSTRIAL SCIENCE (P)
Daniel Berg
EDUCATION (Q)
Rita W. Peterson
Joseph D. Novak
DENTISTRY (R)
Clifford O. Dommert
Marie U. Nylen
PHARMACEUTICAL SCIENCES (S)
Klaus G. Florey
Bettie-an Hoenen

INFORMATION, COMPUTING, AND COMMUNICATION (T)
Jocelyne Friedman
Eliot R. Siegel
STATISTICS (U)
Ramani Thanadanideskan
Joan R. Rosenberg
ATIC AND HYDROSCIENTISTS (W)
Robert A. Duke
William H. Beasley
SOCIAL IMPACTS OF SCIENCE AND ENGINEERING (X)
Janice G. Hamrin
Rosemary A. Chalk
GENERAL INTEREST IN SCIENCE AND ENGINEERING (Y)
Dale Wolfe
James M. McCullough
