Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

**COVER** "El Blanco" Glassauer died of dilated cardiomyopathy associated with taurine deficiency. His owner's desire to prevent others from losing their pets stimulated work elucidating the cause and "cure" for feline dilated cardiomyopathy. A greenish-yellow glow emanates from normal reflective tapetum (left eye); congenital ocular albinism and tapetal absence, unrelated to taurine deficiency, result in reddish glow (right eye). Background: pre- and post-aurine supplementation M-mode echocardiogram from the first case treated. See page 764. [Photograph of "El Blanco" by Cindy Glassauer]
