Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes. The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the public understanding of and appreciation of the importance and promise of the methods of science in human progress.
“El Blanco” Glassauer died of dilated cardiomyopathy associated with taurine deficiency. His owner’s desire to prevent others from losing their pets stimulated work elucidating the cause and “cure” for feline dilated cardiomyopathy. A greenish-yellow glow emanates from normal reflective tapetum (left eye); congenital ocular albinism and tapetal absence, unrelated to taurine deficiency, result in reddish glow (right eye). Background: pre- and post-taurine supplementation M-mode echocardiogram from the first case treated. See page 764. [Photograph of “El Blanco” by Cindy Glassauer]
