Articles

1521 Low-Input Cropping for Acid Soils of the Humid Tropics: P. A. SANCHEZ AND J. R. BENITES
1528 Very High Energy Gamma-Ray Binary Stars: R. C. LAMB AND T. C. WEEKES
1534 Wind-Driven Ocean Currents and Ekman Transport: J. F. PRICE, R. A. WELLER, R. R. SCHUDLICH
1539 The Approaching Era of the Tumor Suppressor Genes: G. KLEIN

Research Articles

1545 Reading Frame Selection and Transfer RNA Anticodon Loop Stacking: J. F. CURRAN AND M. YARUS
1550 Star Formation in W49A: Gravitational Collapse of the Molecular Cloud Core Toward a Ring of Massive Stars: W. J. WELCH, J. W. DRBHER, J. M. JACKSON, S. TEREBEY, S. N. VOGEL

Reports

1556 Rapid Change in the Symbolic Functioning of Very Young Children: J. S. DELOACHE

- SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with *The Scientific Monthly* © Copyright © 1987 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): \$65. Domestic institutional subscription (51 issues): \$98. Foreign postage extra: Canada \$32, other (surface mail) \$27, air-surface via Amsterdam \$65. First class, airmail, school-year, and student rates on request. Single copies \$2.50 (\$3 by mail); back issues \$4 (\$4.50 by mail); Biotechnology issue, \$5.50 (\$6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments \$16 (\$17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1 per copy plus \$0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 \$1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.
- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER The 10-meter optical reflector at the Smithsonian Institution's Whipple Observatory in the Santa Rita mountains in southern Arizona. Built in 1968, it is still the largest instrument designed exclusively for use in very high energy gamma-ray astronomy. See page 1528. [Gary Ladd, Whipple Observatory, Amado, AZ 85645]

- 1558 Oxygen Isotope Effect in High-Temperature Oxide Superconductors: H.-C. ZUR LOYE, K. J. LEARY, S. W. KELLER, W. K. HAM, T. A. FALTENS, J. N. MICHAELS, A. M. STACY
- 1560 Spectrophotometry of Pluto-Charon Mutual Events: Individual Spectra of Pluto and Charon: S. R. SAWYER, E. S. BARKER, A. L. COCHRAN, W. D. COCHRAN
- 1563 Genetic Ablation: Targeted Expression of a Toxin Gene Causes Microphthalmia in Transgenic Mice: M. L. BREITMAN, S. CLAPOFF, J. ROSSANT, L.-C. TSUI, M. GLODE, I. H. MAXWELL, A. BERNSTEIN
- 1566 Similarity of Synthetic Peptide from Human Tumor to Parathyroid Hormone in Vivo and in Vitro: N. HORIUCHI, M. P. CAULFIELD, J. E. FISHER, M. E. GOLDMAN, R. L. MCKEE, J. E. REAGAN, J. J. LEVY, R. F. NUTT *et al.*
- 1568 Parathyroid Hormone-Related Protein of Malignancy: Active Synthetic Fragments: B. E. KEMP, J. M. MOSELEY, C. P. RODDA, P. R. EBELING, R. E. H. WETTENHALL, D. STAPLETON, H. DIEFENBACH-JAGGER, F. URE *et al.*
- 1570 Identification of the Iron-Responsive Element for the Translational Regulation of Human Ferritin mRNA: M. W. HENTZE, S. W. CAUGHMAN, T. A. ROUAULT, J. G. BARRIOCANAL, A. DANCIS, J. B. HARFORD, R. D. KLAUSNER
- 1573 Phagocytosis of *Candida albicans* Enhances Malignant Behavior of Murine Tumor Cells: I. GINSBURG, S. E. G. FLIGIEL, R. G. KUNKEL, B. L. RISER, J. VARANI
- 1575 Activation of the HIV-1 LTR by T Cell Mitogens and the Trans-Activator Protein of HTLV-I: M. SIEKEVITZ, S. F. JOSEPHS, M. DUKOVICH, N. PEFFER, F. WONG-STAAAL, W. C. GREENE
- 1578 Identification of Nuclear Receptors for VIP on a Human Colonic Adenocarcinoma Cell Line: M. B. OMARY AND M. F. KAGNOFF
- 1581 HTLV-V: A New Human Retrovirus Isolated in a Tac-Negative T Cell Lymphoma/Leukemia: V. MANZARI, A. GISMONDI, G. BARILLARI, S. MORRONE, A. MODESTI, L. ALBONICI, LAURA DE MARCHIS, V. FAZIO, A. GRADILONE *et al.*

Technical Comments

- 1584 Antigenicity of Myohemerythrin: J. NOVOTNY, R. E. BRUCCOLERI, W. D. CARLSON, M. HANDSCHUMACHER, E. HABER; H. M. GEYSEN, S. J. RODDA, T. J. MASON; J. A. TAINER, H. ALEXANDER, E. D. GETZOFF, R. A. LERNER ■ Do 15 Million Cat Neurons Mediate the Memory of a Circle and a Star?: F. NOTTEBOHM AND H. WILLIAMS; D. L. MCEACHRON, C. R. GALLISTEL, P. J. HAND; E. R. JOHN, Y. TANG, A. B. BRILL, R. YOUNG, K. ONO

Book Reviews

- 1589 The Dread Disease, *reviewed by* C. G. LASBY ■ Space and National Security, G. L. EPSTEIN ■ Population Ecology of the Cooperatively Breeding Acorn Woodpecker, C. R. BROWN ■ The Biology of the Honey Bee, J. B. FREE ■ Kin Recognition in Animals, G. J. GAMBOA ■ Books Received

Products & Materials

- 1597 Antibody to Fluorescein ■ Magnetic Drive ■ DNA Scanner ■ Entry-Level Minicomputer ■ Water-Bath Insulating Balls ■ Calibration Kit for Electrophoresis ■ Function-Graphing Software ■ Statistical Expert System ■ Literature

American Association for the Advancement of Science *Science* serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

Publisher: Alvin W. Trivelpiece

Editor: Daniel E. Koshland, Jr.

Deputy Editors: Philip H. Abelson (*Engineering and Applied Sciences*); John I. Brauman (*Physical Sciences*)

EDITORIAL STAFF

Managing Editor: Patricia A. Morgan

Assistant Managing Editor: Nancy J. Hartnagel

Senior Editors: Eleanore Butz, Ruth Kulstad

Associate Editors: Martha Collins, Barbara Jasny, Katrina L. Keiner, Edith Meyers, Phillip D. Szuroni, Kim D. Vandegriff, David F. Voss

Letters Editor: Christine Gilbert

Book Reviews: Katherine Livingston, *editor*; Deborah F. Washburn

This Week in Science: Ruth Levy Guyer

Contributing Editor: Lawrence I. Grossman

Chief Production Editor: Ellen E. Murphy

Advertising correspondence should be sent to Tenth Floor, 1515 Broadway, NY 10036. Telephone 212-730-1050 or WU Telex 968082 SCHERAGO.

University-Based Public Service

As the public universities have grown and matured, the triumvirate of their mission—teaching, research, and public service—has become generally accepted, at least in rhetoric. In this process, two clearly identifiable tendencies have occurred. First, teaching has become narrowly defined, referring only to that which occurs in a classroom or laboratory setting. Second, the research mission of the university has become omnipotent. In the academic life of public institutions today, research represents the ultimate exercise, with teaching, especially at the undergraduate level, seen as a mandated duty, and public service an obligation accepted with reluctance. Public universities, however, do perform several large categories of activities that are actually public service even though, up to now, few people may have thought of them under that rubric. Here are five examples of what I mean.

The first is the preservation of knowledge. This public service can stand alone as a prime function. To an encouraging degree, museums and libraries are coming to be seen as valuable teaching institutions in themselves. To whatever extent finances permit, universities can do the same thing. To accept this function as being coequal with research and teaching is to hark back to the ancient formulation that the three purposes of a university are to seek, to convey, and to preserve knowledge.

The second is the provision of aesthetic experience. On most campuses, appreciation of the various expressions of art and high culture are reinforced by the desire to learn or to teach. Beyond that, concert bureaus, radio, and television carry campus-based arts to statewide, even national, audiences.

A third cluster of university activities worth examining relates to the provision of direct consumer services to the community. This is exemplified by maintenance of hospitals, clinics, testing laboratories, publishing companies, hotels, restaurants, bookstores, and the like. These are usually created to fulfill needs related to teaching and research.

A fourth contribution of universities is the custodianship of young people of collegiate age. Although we no longer believe in completely open admission to college, we are prepared to admit most young people who want to enroll, so that they will have a chance to “find themselves” and so that their continued maturation will occur under relatively safe circumstances. The task would be reduced if students had more experience of life before they enrolled. However, short of war or some other vast campaign of national service (which we ought to seriously consider as part of the socialization process for future generations), we will probably continue to have students of about the same age as at present. If so, we must take the initiative to see that as many of them as possible are interested in learning and not simply spending critically formative years in our custodial care.

The fifth kind of activity is the university's role as entertainer for the masses, particularly the masses who watch intercollegiate athletic events. The most troubling consequence of big-time athleticism has to do not with its role as a public service but with its impact on campus instruction. The training of the body does not seem central to modern discussions of either athletics or the college curriculum. Today anybody who advocates education for the perfection of the body tends to be scorned as just another apologist for high-pressure athleticism. I hope that health and physical education departments will someday live up more fully to the literal promise of their name and that their professors will be central figures in discussions of liberal education.

When we examine these five clusters of activities, we discover that we are most comfortable with those that relate most closely to teaching or research. In fact, the level of quality of each of these five forms of public service is directly proportional to the extent to which each incorporates teaching or research.

After 75 years of full-scale experience, the major lesson we have learned about university-based public service is that it is best conceived as dynamic and creative teaching and research carried out in the full dimensions of the human life-span and the broad range of human association both on and off campus.*—RUSSELL G. MAWBY, *Chairman and Chief Executive Officer, W. K. Kellogg Foundation, Battle Creek, Michigan 49017*

*Adapted from a talk, “Public Service,” presented as a plenary lecture on the occasion of the centennial celebration of the National Association of State Universities and Land-Grant Colleges on 10 November 1987.
