From our local star to the ends of the universe

ASTRONOMY & ASTROPHYSICS

The volume contains 24 articles published in Science between 1982–84, ranging from the solar system to the pulsars at the very edge of the observable universe. Research techniques and instruments described cover such diverse topics as proton decay, the Very Large Array, and the planned Space Station as a platform for future experiments.

Each article is self-contained, yet as a whole, the volume reveals a broad, coherent, and contemporary picture of our astronomical universe. Selected for their depth of coverage and breadth of topics by Morton S. Roberts, past Director of the National Radio Astronomy Observatory, these articles are of interest to the entire scientific community.

Guaranteed performance in continuously adjustable and fixed-volume models.

The Eppendorf Ultra Micro Digital Pipette is the only continuously adjustable air displacement pipette with guaranteed performance from 0.5 to 10 μL. Just twist the control button at the top of the pipette to select the desired volume, and a "click-set" ratchet mechanism will lock the volume in place—making accidental changes practically impossible. Four Eppendorf Ultra Micro Fixed-Volume Models, with built-in tip ejector, handle volumes of 1, 2, 5, and 10 μL.

For your other pipetting needs... up to 1000 μL.

For volumes from 2.0 to 1000 μL, three additional Eppendorf Digital Pipettes give you direct digital display of the set volume to assure precise, reproducible results every time. And all Eppendorf Digital Pipettes feature a "click-set" ratchet mechanism, maintenance-free seals, and a tip ejector.

Imagine harnessing the power of lithium to create a high-performance, long-life battery. We did. And then developed the technology to make it practical. Like an innovative, self-sealing capability. And unique W-fold construction, topped by gold-plated connectors. The result is the first 9-volt lithium power cell for general consumer use. So durable, it lasts up to twice as long as most 9-volt alkaline batteries. So different, patents have been applied for. This is a new enterprise for Kodak. But not a new attitude. We've been expanding our horizons for over a century. And our vision is focused on more opportunities than ever. If this kind of stimulating environment stirs your interest, drop us a line to find out more. Or, send a resume to Personnel Resources, Dept. DC56, Eastman Kodak Company, Rochester, NY 14650.
