## Articles

### AIDS

573 AIDS: An International Perspective: P. PIOT, F. A. PLUMMER, F. S. MHALU, J.-L. LAMBORAY, J. CHIN, J. M. MANN  
580 Legal Rights and Duties in the AIDS Epidemic: B. M. DICKENS  
586 The Brain in AIDS: Central Nervous System HIV-1 Infection and AIDS Dementia Complex: R. W. PRICE, B. BREW, J. SIDTIS, M. ROSENBLUM, A. C. SCHECK, P. CLEARY  
592 Education to Prevent AIDS: Prospects and Obstacles: H. V. FINEBERG  
597 Ethical Issues in the Prevention and Treatment of HIV Infection and AIDS: L. WALTERS  
604 The Economic Impact of AIDS in the United States: D. E. BLOOM AND G. CARLINER  
610 Epidemiology of HIV Infection and AIDS in the United States: J. W. CURRAN, H. W. JAFFE, A. M. HARDY, W. M. MORGAN, R. M. SELIK, T. J. DONDERO  
617 The Human Immunodeficiency Virus: Infectivity and Mechanisms of Pathogenesis: A. S. FAUCI

- SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with *The Scientific Monthly* © Copyright © 1988 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): \$65. Domestic institutional subscription (51 issues): \$98. Foreign postage extra: Canada \$32, other (surface mail) \$27, air-surface via Amsterdam \$65. First class, airmail, school-year, and student rates on request. Single copies \$3.00 (\$3.50 by mail); back issues \$4.50 (\$5.00 by mail); Biotechnology issue, \$5.50 (\$6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments \$16 (\$17 by mail). **Change of address:** allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1 per copy plus \$0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for *Science* is 0036-8075/83 \$1 + .10. **Postmaster:** Send Form 3579 to *Science*, 1333 H Street, NW, Washington, DC 20005. *Science* is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.
- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

**COVER** Manifestations of concern with AIDS, the acquired immunodeficiency syndrome, in the United States: children receiving instruction on AIDS prevention in the classroom and the burned-out house of a family with AIDS-infected children. This issue of *Science* includes articles on the epidemiological, legal, economic, and ethical issues of AIDS. See page 573. [Cover design by Sharon Wolfgang, Washington, DC; classroom scene, Mauro Calingo, Silver Spring, MD; and house, Marc Beaudin, *News-Press*, Fort Myers, FL]

## Reports

- 623 Growth of Thin Chemically Bonded Diamondlike Films by Ion Beam Deposition: J. W. RABALAIS AND S. KASI
- 625 IRAS 14348-1447, an Ultraluminous Pair of Colliding, Gas-Rich Galaxies: The Birth of a Quasar?: D. B. SANDERS, N. Z. SCOVILLE, B. T. SOIFER
- 628 Signal Transduction Through the EGF Receptor Transfected in IL-3-Dependent Hematopoietic Cells: J. H. PIERCE, M. RUGGIERO, T. P. FLEMING, P. P. DI FIORE, J. S. GREENBERGER, L. VARTICOVSKI, J. SCHLESSINGER *et al.*
- 631 Replacements of Pro<sup>86</sup> in Phage T4 Lysozyme Extend an  $\alpha$ -Helix But Do Not Alter Protein Stability: T. ALBER, J. A. BELL, S. DAO-PIN, H. NICHOLSON, J. A. WOZNAK, S. COOK, B. W. MATTHEWS
- 635 Labeling of Neural Cells by Gold-Filled Sendai Virus Envelopes Before Intracerebral Transplantation: S. C. ARDIZZONI, A. MICHAELS, G. W. ARENDASH
- 637 Cells Process Exogenous Proteins for Recognition by Cytotoxic T Lymphocytes: J. W. YEWDELL, J. R. BENNINK, Y. HOSAKA
- 640 Mitogenesis in Response to PDGF and Bombesin Abolished by Microinjection of Antibody to PIP<sub>2</sub>: K. MATUOKA, K. FUKAMI, O. NAKANISHI, S. KAWAI, T. TAKENAWA
- 643 Cell-Cell Interactions in the Guidance of Late-Developing Neurons in *Caenorhabditis elegans*: W. W. WALTHALL AND MARTIN CHALFIE
- 645 The *ras* Oncogenes Increase the Intrinsic Resistance of NIH 3T3 Cells to Ionizing Radiation: M. D. SKLAR

## Technical Comments

- 648 Is Ethanol Antagonist Ro15-4513 Selective for Ethanol?: K. T. BRITTON, C. L. EHLERS, G. F. KOOB; P. D. SUZDAK, J. R. GLOWA, J. N. CRAWLEY, P. SKOLNICK, S. M. PAUL

## AAAS News

- 651 Annual Meeting Returns to Boston: J. WRATHER ■ More Museum Benefits Announced: M. ZENDELL ■ Entries Asked for Behavioral Science Research Prize ■ Amendment to AAAS Constitution Adopted ■ Nomination of AAAS Fellows Invited ■ Pacific Division to Meet in Corvallis in June ■ Participation of Women and Minorities in Science on Decline: B. M. VETTER ■ Soviet Scientists to Speak at Annual Meeting ■ AAAS Radio Program on Mutual

## Book Reviews

- 656 Academics in Court, *reviewed by* M. G. YUDOF ■ From Mineralogy to Geology, J. A. SECORD ■ Observational Cosmology, S. WHITE ■ Global Bio-Events, K. W. FLESSA ■ Some Other Books of Interest ■ Books Received

## Products & Materials

- 663 Peptide Synthesis Software ■ Peptide Separation Without Chromatography ■ Ready-to-Use Electrophoresis Gel Solution ■ Immunostaining System ■ Scientific Calculator ■ Instant Photos from Video Images ■ Liquid Scintillation Counter ■ Sound-Analysis Workstation ■ Data Acquisition Peripheral ■ Literature

**American Association for the Advancement of Science**

*Science* serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

**Publisher:** Alvin W. Trivelpiece

**Editor:** Daniel E. Koshland, Jr.

**Deputy Editors:** Philip H. Abelson (*Engineering and Applied Sciences*); John I. Brauman (*Physical Sciences*)

---

**EDITORIAL STAFF**

**Managing Editor:** Patricia A. Morgan

**Assistant Managing Editor:** Nancy J. Hartnagel

**Senior Editors:** Eleanore Butz, Ruth Kulstad

**Associate Editors:** Martha Collins, R. Brooks Hanson, Barbara Jasny, Katrina L. Kerner, Edith Meyers, Phillip D. Szurumi, David F. Voss

**Letters Editor:** Christine Gilbert

**Book Reviews:** Katherine Livingston, *editor*; Deborah F. Washburn

**This Week in Science:** Ruth Levy Guyer

**Contributing Editor:** Lawrence I. Grossman

**Chief Production Editor:** Ellen E. Murphy

**Editing Department:** Lois Schmitt, *head*; Mary McDaniel, Barbara E. Patterson

**Copy Desk:** Joi S. Granger, Beverly Shields, Anna Victoreen, Barbara Wittig

**Production Manager:** Karen Schools

**Assistant Production Manager:** James Landry

**Graphics and Production:** Holly Bishop, James J. Olivari, Eleanor Warner

**Covers Editor:** Grayce Finger

**Manuscript Systems Analyst:** William Carter

Michigan Ave. (312-337-4973); San Jose, CA 95112: Bob Brindley, 310 S. 16 St. (408-998-4690); Dorset, VT 05251: Fred W. Dieffenbach, Kent Hill Rd. (802-867-5581); Damascus, MD 20872: Rick Sommer, 24808 Shrubbery Hill Ct. (301-972-9270); U.K., Europe: Nick Jones, +44(0647)52918; Telex 42513; FAX (0392) 31645.

**Information for contributors** appears on page XI of the 18 December 1987 issue. Editorial correspondence, including requests for permission to reprint and reprint orders, should be sent to 1333 H Street, NW, Washington, DC 20005. Telephone: 202-326-6500.

Advertising correspondence should be sent to Tenth Floor, 1515 Broadway, NY 10036. Telephone 212-730-1050 or WU Telex 968082 SCHERAGO.

## The AIDS Issue

Plagues are identified with impoverished nations and past centuries, not with modern civilization. "It can't happen here, and it can't happen now" is the reaction of industrialized societies as a 20th-century epidemic of a fatal disease attacks their countries. The unthinkable is happening. In this issue of *Science*, put together with the help of many but especially senior editor Ruth Kulstad, a series of articles defines the enormity of the problem, making clear that any solution will demand scientific know-how, stark realism, and compassionate judgment.

The articles by Fauci, Price *et al.*, and Curran *et al.* establish some immediate boundaries. First, a long period of virus incubation before visible signs of the disease appear severely complicates efforts to contain the epidemic. The serious mental disturbances that arise in many cases add to the difficulties of coping with the disease. While the search for a cure goes on, the spread of the epidemic may be controlled to some extent by legal and educational approaches. The difficulty of educational persuasion is highlighted by Fineberg. Although education may already have convinced many of the groups at greatest risk of the facts, the drastic changes in behavior needed to modify statistics significantly have not occurred. Changing from 50 sexual partners to monogamy affects the probability of infection dramatically, but switching to five partners produces only marginal changes in risk. Drug users learn about the dangers of sharing needles but continue to share them. Knowledge does not guarantee motivation to change in the face of powerful biological urges.

The international aspects of the disease, reviewed by Piot *et al.*, deserve attention, because they throw light on the relation between different patterns of behavior and infection in different countries. For example, in Africa, heterosexual activity is the dominant mode of transmission whereas homosexual and drug-related activities continue to be important in transmission of the disease in the United States.

Legal and ethical problems that must be confronted are discussed by Dickens and by Walters. For instance, should testing be mandatory? Some emphatically say "No." But what is a hospital to do if a surgical patient refuses testing? There are obligations to employees as well as to patients. Should confidentiality be preserved at any cost? What is the responsibility of a physician in informing spouses and children, to say nothing of others who might become infected?

The incredible expense of existing AIDS cases and those predicted for the near future (estimated at \$22 billion for the United States by Bloom and Carliner in a conservative analysis) will certainly exacerbate the emotions of the debate. Is it the responsibility of society to pay the medical costs of those who are warned yet continue dangerous practices? Who is responsible for children who have contracted AIDS? For those who contract it from contaminated blood, who should be held responsible financially—hospitals, insurance companies, the government? Can they sue?

The legal difficulties outlined by Dickens clearly show that an internally consistent plan has yet to be achieved in any country. Some Iron Curtain countries make it a crime for an infected individual to have intercourse without informing the partner. Other societies are reluctant to put any limits on groups which they feel are already suffering opprobrium for unconventional behavior.

An impressive feature of this collection of articles is how much one compartmentalized subject requires information from another. Thus, the promise of an educational campaign is shown to be inevitably intertwined with the scientific and legal aspects of the disease. The legal aspects are certainly intertwined with the expense of treating the disease and the political clout of the parties affected. Ethical solutions appropriate for one group may be totally inappropriate for another. The staggering expense of AIDS is sure to conflict with monetary demands for other social programs.

In a recent issue of *Science* (22 January, p. 375) the history of the syphilis epidemic was recounted. Many decisions made then, no doubt expedient at the time, do not appear justified today. Decisions today have to be made on the shifting sand of public emotion, if not hysteria, and changing scientific facts. Perhaps the question, "How will we look to future generations?" may be the best test for evaluating our current attitudes and decisions.

—DANIEL E. KOSHLAND, JR.
