Innovative new rotors: the VC-53, a vertical tube rotor made of carbon fiber that weighs only 12 pounds; the Type 50.4 Ti titanium fixed angle rotor for spinning up to 44 6.8-mL lipoprotein samples; and the economical VAC-50, a 10-place vertical tube rotor with aluminum core surrounded by a composite ring for extra strength.

Instruments—with the advanced L8M Series (80,000 rpm/602,000 g); the hard-working L7 Series (65,000 rpm/485,000 g); the revolutionary TL-100 Tabletop (100,000 rpm/541,000 g). All with vacuum-encased induction drives for outstanding efficiency and reliability. Also available: the Airfuge® air-driven ultracentrifuge (110,000 rpm/199,000 g) for rapid pelleting.

Rotors—more than 50 choices. Rotors fine-tuned to Beckman drive systems and enhanced by computer-aided design and an ongoing materials development program. Some recent Beckman

firsts: vertical tube rotors with 1.7 g/mL density ratings so plasmid preps can be run without speed reductions; TL-100 rotors with short pathlengths for isopycnic separations in one-fifth the usual time.

Tubes and Bottles—more than 120 versions in six materials. Another Beckman innovation: capless Quick-Seal® tubes that eliminate time-consuming preparation steps. And now our new g-Max™ System extends their use to biocontainment in swinging bucket rotors and to short-pathlength runs in standard size rotors.

Accessories—take your choice. From something as simple as a new hand-held tube sealer to something as sophisticated as the SpinPro™ Expert System that helps you optimize runs and more.

All from one source. Beckman service, too!

Imagine what you could do if your computer could see.

Eikonix® high performance digital imaging cameras give your computer the ability to see. Which in turn gives you the ability to improve the quality of your research, and open new markets.

Easy-to-use Eikonix cameras are compatible with IEEE 488, DEC Q-Bus, Unibus and Multibus based systems as well as IBM® PCs. They’re the most flexible, cost-effective, reliable, and accurate means available for getting high resolution image data into a computer for analysis, manipulation, display and storage. And they’re backed by a team of specialists that provides all the technical support you need for whatever applications you have—worldwide.

If you’d like us to focus on your particular application, please call us at (617) 275-5070. If you’d like some literature, simply write to us at Eikonix Corporation, 23 Crosby Drive, Bedford, MA 01730, Telex: 951231.

See Us At NCGA ’88 Booth #1252.

Protein G Sepharose® 4 Fast Flow is the new affinity chromatography medium for the specific separation and purification of polyclonal IgG and monoclonal IgG of different subclasses. With its wider binding specificity, it complements Protein A Sepharose CL-4B — a gel already documented in thousands of references.

Protein G Sepharose 4 Fast Flow has been engineered to perfection by matching the optimized ligand with the best available matrix. Our Protein G is an engineered, recombinant product from which the albumin-binding region has been deleted genetically. The base matrix, Sepharose 4 Fast Flow, was selected after extensive evaluation in search of optimal capacity and flow rate.

The new gel complements Protein A Sepharose CL-4B by binding:
- a wide range of IgG’s, including human, mouse, rat, cow, goat, sheep, horse, and many others
- specific subclasses, including human IgG3, mouse IgG1, IgG2a and IgG2b, and rat IgG2a and IgG2b.

Protein G Sepharose 4 Fast Flow is excellent for separating monoclonal antibodies from ascites and from cell culture fluid. The gel binds more than 20 mg human polyclonal IgG/ml drained gel; a capacity unrivalled by any other commercial preparation.

In addition, Pharmacia LKB also supplies unbound recombinant Protein G for testing and analysis.

Order your Protein G products today or ask your representative for the Data Sheet.

SEQUENASE™, GENESCRIBE™ AND
CLONED POLYNUCLEOTIDE KINASE

For scientific advances throughout a wide range of research biochemicals for molecular biology—as well as for unsurpassed quality and service in the supply of more than 6,000 general biochemicals, look to USB.

USB introduced Sequenase, the revolutionary T7 DNA Polymerase that extends the limits of sequencing.

USB's GeneScribe, the first commercially offered T7 RNA Polymerase, is the system of choice for transcription.

USB introduced the first and the purest Cloned Polynucleotide Kinase.

And USB's standards of excellence—plus the guarantees that go with them—also apply to over 6,000 general biochemicals.

For innovation, quality—and technical support—to protect the integrity of your research, turn to USB for proven product integrity in:

- Acrylamide
- AMV Reverse Transcriptase
- Cesium Chloride
- DNA Polymerase-Klenow
- DTT
- HEPES
- Nucleotides
- Restriction Enzymes
- SSB and RecA Proteins
- T4 DNA Ligase
- Terminal Deoxynucleotidyl Transferase
- Tris Enzyme Grade

For a free copy of our Molecular Biology Catalog, or our General Catalog, write USB at PO Box 22400, Cleveland, Ohio, 44122. Phone 800/321-9322. From Ohio or Canada, call collect to 216/765-5000. Telex: 980718. FAX: 216/464-5075.

*Patent Pending
AIDS RESEARCHERS:

DETECT HIV ANTIGEN IN LESS THAN 4 HOURS.

This assay is a dynamic breakthrough in specifically measuring HIV p24 core antigen levels, maximizing sensitivity, specificity, and accuracy while enhancing speed and convenience. Coulter Immunology is pleased to announce the availability of a new microplate HIV Antigen EIA that offers many improvements over existing test systems:

- **FASTER TURNAROUND:** The Coulter HIV Antigen Test delivers accurate results in less than four hours. Technologist time is only 40 minutes.
- **SUPERIOR SENSITIVITY:** Measures less than 10 picograms per milliliter of core-related proteins, primarily p24.
- **HIGH SPECIFICITY:** Monoclonal antibody capture with no cross-reactivity with HTLV-I, HTLV-II, Cytomegalovirus, Herpes Simplex I or II, Epstein-Barr virus, Legionnaires', Toxoplasmosis, Rheumatoid Factor, or Bilirubin.
- **CHOICE OF SPECIMENS:** Plasma, serum, or culture fluid with equal sensitivity.
- **EASIER TO RUN:** Color-coded reagents minimize pipetting error and allow internal and ongoing QC of test performance.
- **FLEXIBILITY/ECONOMY:** Removable 8-well strips permit assays of 8 to 96 wells per run. Therefore, one can perform 12 separate runs using just one plate.
- **MORE SAFETY FEATURES:** Employs non-infective sonified, detergent detoxified HIV. Lyse reagent detoxifies virus in sample during first step of procedure.

For more information about the Coulter HIV Antigen EIA (96-well microplate Kit), call us at 1-800-327-3778 (in Florida, 1-800-327-6531, Ext. 6880). Coulter Immunology, the company with the broadest line of human-specific cell surface monoclonal antibodies, provides solutions to investigations of the most pressing problems of the medical community.

Power amplifiers for every rf testing need. Power you can depend on. Power from one watt to ten kilowatts. And these power ratings are ultra-conservative: Whether you order a 10-watt or a 2000-watt amplifier, you can be certain of at least its rated output at every point in its frequency band.

Model 2000L, shown, delivers 2000 watts minimum cw saturated power over a bandwidth of 10 kHz to 220 MHz. In pulse mode (up to 25% duty cycle), you can almost double that output rating—a vital feature in NMR.

Our amplifiers are totally immune to damage from load mismatch—from wildly fluctuating VSWR to outright open or shorted output terminals.

The Amplifier Research line covers the frequency range from 10 kHz to 1 GHz. Bandwidth is instantly available without need for tuning or bandswitching. Our booklet, "Your guide to broadband power amplifiers," will tell you a lot more. Send for it.

Now in C...  

**Numerical Recipes**  
The Art of Scientific Computing  
William H. Press, Brian P. Flannery,  
Saul Teukolsky, and  
William T. Vetterling  

Some comments on Numerical Recipes:  
"Numerical Recipes is remarkably complete...it contains  
many more routines than many commercial mathematics  
packages and so provides the user with a great deal of  
flexibility for handling a variety of problems...it is an  
extcellent introduction to contemporary numerical  
methods." — Byte  
"Any technology company that doesn’t have a few copies  
of this work and the accompanying diskettes is wasting the  
precious time of its best researchers." — Forbes  

The product of a unique collaboration among four leading  
scientists in academic research and industry, Numerical  
Recipes fills a long-recognized need for a practical,  
comprehensive handbook of scientific computation.  
Seventeen chapters divided into 130 independently useful  
sections provide a self-contained treatment that derives,  
critically discusses, and actually implements over 900 of  
the most important numerical algorithms for scientific work.  

Numerical Recipes Diskettes  
These diskettes provide machine-readable source code of  
all the programs in the book Numerical Recipes. The user  
unpacks the desired programs into text files suitable for  
machine readable source code of for modification and incorporation into his or her applications.  
The files can then be compiled with any standard  
FORTRAN, Pascal or C compiler for IBM-PC, XT, or AT  
compatible machines, FORTRAN and Pascal versions are also available for the Apple Macintosh.*  

Numerical Recipes Example  
Books  
William T. Vetterling, et al.  
Available in C, FORTRAN or Pascal, these paperback  
example books contain short model programs that exercise  
and demonstrate all the Numerical Recipes routines.  

Numerical Recipes Example  
Diskettes  
William T. Vetterling, et al.  
Contains the demonstration programs from Numerical  
Recipes Example Book in C, FORTRAN or Pascal source  
code for IBM-PC, XT, or AT compatible machines. FORTRAN  
and Pascal versions are also available for the Apple  
Macintosh.*  

*Other formats (including UNIX and VAX/VMS) and license  
arrangements are available from Numerical Recipes Software, PO.  
Box 243, Cambridge, MA 02138.

It's Changing How We Understand Computers and the Brain.  

**NEURAL NETWORKS**  
Official Journal of the International Neural Network Society  

Co-Editors-in-Chief:  
Shun-ichi Amari (Australasia)  
Stephen Grossberg (N. and S. America)  
Teuvo Kohonen (Europe and Africa)  

Appearing in early 1988, NEURAL NETWORKS will  
publish original contributions on brain and behavior  
modelling and its application to computer technology.  

Topics will include:  
Vision and image processing * speech and language  
understanding * pattern recognition * associative learning  
and long-term memory * self-organization * cognitive  
information processing * cooperative and competitive  
network dynamics and short-term memory * sensory-motor  
control and robotics * parallel distributed processing * local  
circuit and systems analyses of brain-behavior relationships  
* combinatorial optimization * electronic, optical, hybrid, and  
virtual devices and neurocomputers.  
Authors' instructions may be obtained from the  
publisher's office.

NOTHING STACKS UP TO NEW CORNING CRYOGENICS

Pick any eight Corning® cryogenic vials with round, free standing, or self locking bottoms. Internal or external threads. Large marking area. Double graduations. Color coded cap inserts.

Set up your vials in exclusive Corning® workstation rack for sample prep right on your bench. Vials lock securely in the rack for one handed convenience.

Thaw in the rack directly in a water bath. Or put hot water in the workstation tray and thaw on your bench.

Ice up the tray of the Corning workstation to keep all your vials properly chilled. There's ample room for the storage vessels and tubes you need.

Pick up and carry the entire Corning cryogenic workstation wherever you need.

Sample Free
Call our USA number for a free assortment of Corning cryogenic vials and complete details today: 800-448-3400 ext. 917. Or send coupon for more. See for yourself how nothing stacks up to new Corning cryogenics.

FREE STACK

Send coupon on your letterhead for free Corning cryogenic vials plus literature. USA, Canada only. Corning Science Products, Attn: Cryogenics, PO. Box 7740, Corning, NY 14830.

Imagine what we can do together
The new Nikon TMS inverted microscope perfectly combines simplicity of operation with Nikon's high performance standards. It utilizes Nikon CF optics, famous for crisp, clear images. Precorrected phase objectives eliminate distortion caused by plastic vessels. The 3-place nosepiece accepts brightfield and phase contrast parfocal objectives from 4X to 40X.

All optics are quick-change, and the condenser is easily removed for scanning rollerbottles. The large stage is fixed for stability and easy micromanipulation. The 20 watt halogen illumination is pre-centered with built-in filter holders.

The Nikon TMS is the perfect inverted microscope for routine laboratory work—at an amazingly affordable price.

For more advanced microscopy, there is the renowned Nikon Diaphot. It is perfectly suited for documentation; from 35mm to large format and Polaroid® for CCTV and cinemicrography. The Diaphot has complete capability in phase contrast, fluorescence and Nomarski DIC.

Nikon now has the perfect answer to all your inverted microscope needs. For further information, contact Nikon Inc., Instrument Division, 623 Stewart Avenue, Garden City, NY 11530 (516) 222-0200.
New Nalgene® Cryoware™ beats the others cold.
The advanced labware system for improved cryogenic storage. All designed by Nalge, the first name in high-tech plastic labware.

Cool Control with Nalgene Cryovials.
We designed them right from the start. We put screw threads outside the vial where they belong. We gave the closure a longer skirt, for uncontaminated aseptic procedures. Our closure seals—without a gasket. And we gave the vial a conical bottom for easier sample extraction—and a flat base to stand on its own. Plus, an opaque marking area for your ID codes and an easy-to-read fill line. In 1.2- and 2-mL sizes.

Cool Storage with Nalgene CryoBoxes™.
Isn't it time you had all-plastic cryogenic storage boxes? Replace your flimsy cardboard or expensive stainless steel boxes with durable and economical Nalgene CryoBoxes. Grid and numbers on box top and inside keep track of inventory—oneway fits keeps grids lined up. In standard 9x9 array (81 vials) and a new 5x5 array (25 vials). Stackable. Autoclavable. Tough. Strong. Never brittle—even at -196°C!

Cool Handling with Nalgene Cryovial Holders.
Your lab deserves our new, all-plastic cryovial holders, too. Holder interlocks with up to 50 Nalgene Cryovials to allow single-handed operation. Molded-in alpha-numeric identification system. Autoclavable.

Cool Fit with Nalgene CryoBox Racks.
We didn't forget to design new stainless steel racks, either. Our racks fit your existing mechanical or liquid-nitrogen freezers and Dewars. Retainers hold new Nalgene CryoBoxes securely and separately—release quickly. Racks hold your existing cardboard or stainless steel boxes, too.

Order Nalgene Cryoware from your Authorized Nalgene Labware Dealer worldwide.

Nalge Company
Nalge® Brand Products
The ability to listen. The technology to respond.

Send for free samples.
Prove it to me that Nalgene Cryoware beats the others cold. Send free trial samples of Nalgene Cryovials and more information about advanced Nalgene Cryoware.

New Titles Available from AAAS

Scientists and Journalists: Reporting Science as News
Edited by Sharon M. Friedman, Sharon Dunwoody, and Carol L. Rogers
The public is interested in science and depends largely on the mass media for the latest information. But how well do scientists and journalists connect to communicate to the public? This book examines the human aspect of the links between scientists and journalists through the eyes of both.
1985, 352 pp., hardcover; $24.95, AAAS members $19.95

Science and Creation: Geological, Theological, and Educational Perspectives
Edited by Robert W. Hanson
The creation/evolution controversy is examined by scientists, theologians, educators, and historians. These authors view the controversy as a false dichotomy and as an attempt to force a choice between two ideas that are not mutually exclusive. Includes case studies from several states.
1986, 240 pp., hardcover; $24.95, AAAS members $19.95

Low Tech Education in a High Tech World: Corporations and Classrooms in the New Information Society
Elizabeth L. Useem
Are students in the U.S. developing the skills necessary for a high technology society, or will it be technological boom, educational gloom? Useem examines education in California’s “Silicon Valley” and Boston’s Route 128, two of the country’s leading high tech centers, and suggests ways for education and industry to forge a stronger partnership for the future.
1985, 256 pp., hardcover; $19.95, AAAS members $15.95

Science as Intellectual Property: Who Controls Scientific Research?
Dorothy Nelkin
Who controls research? A growing number of legal and administrative disputes raise critical issues of professional sovereignty, scientific secrecy, and proprietary rights. Nelkin offers cases illustrating the dilemmas that arise as the interests of scientists, the rights of citizens, and the security needs of government and industry come into increasing conflict.
1984, 130 pp., softcover; $10.00, AAAS members $8.00

The Gene-Splicing Wars: Reflections on the Recombinant DNA Controversy
Edited by Raymond A. Zilinskas and Burke K. Zimmerman
Questions of safety and ethics about recombinant DNA techniques continue to surface. This book takes a look at historical, political, industrial, scientific, and international aspects of these issues. The authors show how lessons learned from the experience can be used to cope with similar issues in the future.
1986, 256 pp., hardcover; $24.95, AAAS members $19.95

All orders must be prepaid. VISA, MasterCard, and Choice accepted; include account number, expiration date, and signature.
Send orders to: AAAS Marketing, 1333 H Street, NW, Dept. M, Washington, DC 20005. Please add $1.50 postage and handling per order. Allow 4-6 weeks for delivery.

Published by Macmillan, Inc., for the American Association for the Advancement of Science
RECOMBINANT DNA

WORKSHOPS

Beginning in March, 1988, IBI will offer monthly workshops in the basic concepts and laboratory techniques of recombinant DNA. The four-day "hands-on" course is designed for teachers, businessmen, or researchers with a scientific background but without previous experience in recombinant DNA technology.

Techniques covered in the workshop include:

- care and handling of bacterial cultures
- isolation and purification of plasmid DNA
- restriction enzyme digestions and mapping
- agarose gel electrophoresis
- recovery of DNA from agarose gels
- use of linkers and DNA modifying enzymes to join DNA fragments
- transformation of competent bacterial cells

Workshops will be conducted by David F. Betsch, Ph.D. of the IBI staff. Tuition will be $495.00 ($US) which includes all consumable materials. Arrangements for meals or lodging are left to the individual participants.

Upcoming Workshop sites and dates include:

<table>

If you are interested in sponsoring a workshop at your facility, there are only a few requirements.

Sponsors will provide:

- a lab facility with a capacity for 20 people and available for one week, Monday through Friday, 9:00 a.m. – 5:00 p.m.
- autoclave, incubators and refrigeration

For more information or registration, please call: David F. Betsch, Ph.D.

The Cutting Edge of Molecular Biology
"Oxymax" System

- Simultaneous measurements in 1 to 4 chambers.
- Can be used with small or large subjects (mice to pigs).
- Utilizes IBM-PC/XT compatible etc. as a controller.
- Open circuit indirect calorimetry method.
- Prints/store results in one minute intervals.
- Allows for simultaneous measurements of O2/CO2 consumption/production, respiration rate, respiratory quotient, animal locomotor activity, food consumption, body temperature and heart rate. 24 hour hands-off operation.
- Variety of sizes of measuring chambers.
- Animal exercisers available as an option.
